The "vague anticipations," of which he speaks, as accompanying the complaint in question, are still, as many can testify, among its unwelcome satellites.

IN FRANCE the artificial cultivation of oysters has been a success. The Standard says,-The Bay of Archacon used to abound in natural beds, but by he is. excessive dredging they became exhausted. Some genius made a bed by immerging a layer of tiles covered with his blood. My prayers were soon mortar, to which the oysters might | answered. The Holy Spirit suggested adhere. He found the bivalves to grow so fast that he would have to raise the tiles occasionally to scrape off the surplus and put them on other tiles. Each tile has a surface of two square feet and accomodates six hundred young oysters. There are now 12,600 acres of artificial beds in that bay, and it looks as if this delicacy could be supplied in unlimited quantities by extending the artificial culture to all waters adapted to it.

A HYMN sung in a village dayschool in Yorkshire, Eng., is published in an English paper as a specimen of the Romish teaching which is "sedulously inculcated from many of the pulpits of our villages, and especially in the schools." We quote a verse or two from this precious production : I'm not a little Protestant,

When I first visited the villages which surround Matha I was how easily they could be evangelized. The sight of these sheep without a shepherd oppressed my heart. How painful to see a vast population know. ing nothing of Christ's Gospel, mistaking God for a cruel tyrant, having no idea that God is love, compassion, wisdom, justice, holiness ! From that time I had only one preoccupation; to avenge God's honor, to rehabilitate him in the eyes of these poor people by making him known to them such as

"I laid before God the needs of these men created in his image, tho fallen in the mud, and for whom Christ had shed to me a plan of campaign and at the same time he put it into the heart of two evangelists and two Bible women to offer me their services.

"As soon as these four friends were settled in Matha, we began to work systematically with the help of six colporteurs, three of the latter being voluntary workers.

"During the first winter we opened mission halls in thirty-six villages or hamlets. Besides the public meetings we preached the Gospel from house to house, selling the Bible and leaving everywhere a tract or a paper. In many villages we visited every house, without a single exception, evangelizing young and old, taking the good news to the dying, and inviting to our meetings all that could come.

"The second year we reached fortythree villages instead of thirty-six, the third year sixty-four. The workers were three evangelists, three Bible women, three colportours, and a good many of the church members besides myself. The blessing of God rested upon the work accomplished in his name. Within three years and a half the church membership has grown from 120 up to 172; and yet these figures can give but an imperfect idea of the spiritual work that is carried on. For Lord.

are seven or eight outsiders whose WOMAN'S FOREIGN MISSION funerals we are asked to conduct ; and so by addressing the crowd gathered round the tomb we evangelize thousands. "Religious indifference is great in our districts. The Catholic churches are empty. But when the Spirit of God is at work these same people become zealous to counterbalance our McLEOD, FREDERICTON.] influence. The priests preach against us, arouse the population, and blaspheme the Word of God. The new converts are persecuted. One thinks they have become mad. They often are beaten, often also shut up, that they may not attend the meetings. Last winter I met a new convert, a man of about forty: his face was bleedwas the answer, ' because she thinks she is dishonored by my conversion.' was frequently beating him, and besought him with tears to give up his which she should be particularly mind- have truer conceptions of life, its

"At present we have Christians in twenty-three localities. Every Sunday and every Wednesday evening the friends that are within meeting distance meet to edify each other. Every one caved from above. One or two new ttle congregations were formed in hat way last winter.

"How many things I would have to ay to give a clear view of the work in he region ! The Spirit of God meets with many obstacles. The populations are nominally Catholic, but in reality brought up in the belief that when one is dead, all is dead; that there is neither Heaven nor Hell, nor resurrection, nor judgment, nor God, nor Devil. And unbelief is so deeply rooted in the minds and in the hearts, it is so much the result of secular education, that it still happens, even to very spiritual new converts, to doubt, tho only at times, the fact of the resurrection, as it happened in former times to the Christians at Corinth.

"In this rapid review I have chiefly lwelt on the encouraging features of the work. I might also speak of our larger towns and cities have, we believe sadpess, of our tears, of our brokenheartedness, when we face the hideous immorality, the victories of Satan and the opposition of the sinners. PROFIT SHARING .- To arrange the affairs of a manufacturing or other business so that the employees shall share the profits with the employers, is a question which has engaged much thought of progressive business men and philanthropists. Many attempts have been made, some of which have succeeded, but more have failed. A Mr. Dolge, manufacturer of feltings in New York, has been working under a plan which has had pleasant results. His scheme, as stated in the Herald,

"It is "to divide the earnings of his factories equitably between the pro Seas. when Mr. Dolge delivers an address, going carefully over the work of the year, criticising kindly where needed, or praising where merited. The Jews in Russia may be divided into two classes-those who live within the Pale and those who live outside of it. Census statistics are not as accurate as they might be in Russia. However, it is estimated that within the Pale dwell-or perhaps it would be equally proper to say are confinedfour to five million Jews, and that in the other parts of Russia, there are about one million more Jews. What is known as the Pale consists of fifteen provinces in the southwestern part of Russia, embracing a territory n y eight times as large as England and Wales.
