On the 30th inst., the southern division of the Central railway, from Hampton to St. Martins, will be closed until further notice.

W. H. Burnett, who left Hampton about six weeks ago with the inteation of visiting Fredericton and Woodstock, has not been heard from, and the belief has been gaining ground that possibly he may have met with foul play. Mr. Hayes, his brother-in-law, after a thorough search of the hotel registers found that Burnett had been in Fredericton on the 30th of September and had put up at Long's hotel, but no further trace of him could be found.

The contract stipulates that preference is to be given to all freight coming from the western provinces, and that the rates shall be as low as from any port in the United States. Another condition is that the steamships shall be able to carry each trip on an average four hundred head of cattle or the equivalent thereof in horses and sheep.

Mr. E. H. Wilmot, who last year donated Wilmot Park to the city, has purchased the Odell Grove between St. John and Church streets, and it is said will also pass this over to the city to be used as a pleasure park or for any other purpose desired. The price paid was $2,500.

Of Grand Manan fishing, the *Courier* says some of the weirs are doing very well in herring fishing, mostly large herrings. Medium are scarce and in good demand. There is very good cod fishing off Gull Cove. The fish are plentiful and run fairly good size, but the weather has been so rough lately that only one or two days in the week can be counted on. Pollock fishing is practically over for this season.

The *Gleaner*:—A Wednesday despatch from Woodstock says the water is falling and that the logs are now running quite slowly past that place. At Mactnaquac and further up the run of logs to-day is also very slow; very few indeed are coming into the boom. The lumbermen now say that without further rains the prospects of getting any important quantity of logs into the booms before the ice makes are poor indeed. They fear that nearly the whole lot will be frozen in the river for the winter. Even with another rain there would be great difficulty in handling the logs, owing to the scarcity of men who will work at driving at this season of the year.

Obdur M. Hartt of New York, who for some time, has been endeavoring to establish a shoe factory in Fredericton, has submitted a prospectus to the president of the board of trade. He estimates that a capital of $50,000 will be required to establish a factory with an output of 50,000 pairs of boots per year.

As a general thing investors are pleased to receive only two dividends a year, and if they are paid with regularity are fully satisfied. When one, however, can receive fifty-two dividends in a year upon an investment of only three dollars, the matter deserves very serious attention.

It is understood that a conspiracy has existed in St. John's, Nfld., for several years to scuttle vessels and defraud the insurance companies. Many thousands of dollars have been thus fraudulently obtained. One party of conspirators are reported to have scuttled five ships with their cargoe in five years. A number of prominent business men of the city are involved. The clues were found through the recent smuggling investigations.

An immense deposit of iron ore, discovered on the west side of Port-au Port Bay, Newfoundland, has been purchased by a large combination in the United States. The length of the seams is 210 feet on the surface, and there are eight veins varying in width from 5 to 12 feet of solid "prill" ore, of which seven cubic feet weighs a ton. Prof. Maynard says there are 12,000 tons in sight on the surface, and that the supply below ground is practically inexhaustible. The one is worth $32 per ton for iron, and $47 per ton for chrome, and the purity of the deposit makes it especially valuable. The mine is only a mile from the water. When spring comes 400 men are to be put at work.

The Fools not all Dead yet.

Even a blind man can see that more clearly than daylight, or else why should so many continue to use ill smelling, oily, and often useless preparations for the relief of pain, when a preparation just as cheap, elegant, more powerful, and penetrating as Nerviline is can be purchased from any dealer in medicine? Nerviline cures instantly aches and pains. Nerviline is the most efficacious remedy for internal pains. Nerviline applied externally subdues the most intense pain almost at once.
