Asthma and Bronchitis cured.

HALIFAX, N S.

C. E. PUTTNER, Esq., PH. M. :

SIR,—I consider it my duty, not only to yourself, but to my fellow creatures who are suffering from Asthma and Bronchitis, as I had for some time previous to using your "EMULSION OF COD LIVER OIL with Hypophosphites," to give my testimony to the most wonderful good effect it had. Having suffered for some time with Asthma and Bronchitis, accompanied with great nervous exhaustion, and having carefully read your Essay on the combination and uses of your EMULSION, I was persuaded to give it a trial, and on using two bottles I began to receive great benefit and relief, and after using three bottles I was completely revived and am to-day perfectly free from either Asthma or Bronchitis, and my nervous system much invigorated and built up. I have found it very pleasant and palatable, and with no taste of oil whatever, and can with great confidence recommend it to those suffering as I did previous to taking your compound. I am, yours, &c.,

ALEX STEPHEN, SR.,
Merchant.

PRIZE SHORT STORIES.—Some months ago the Dr. Williams Medicine Co. of Brockville, Ont., announced a literary competition in which they offered $300 in prizes for the best five short stories by Canadian writers. The amount was divided into five prizes of $100, $75, $60, $40, and $25, and the interest which the competition created may be judged by the fact that more than seven hundred manuscripts were received from all parts of the Dominion. These stories were placed in the hands of competent judges, who handed in to the Company the names of the five stories which they considered best worthy of the prizes. These stories have just been issued in a pamphlet called "Prize Short Stories." In the preface to the work it is announced that the ultimate decision as to the merit of the stories is left to the readers of the pamphlet, and a voting paper is given upon which they are asked to express their preferences. A copy of this pamphlet will be mailed, post paid, to any of our readers who send their address (plainly written) to the Dr. Williams Medicine Co., Brockville, Ont.

Where the Day is Born.

The maritime powers of the world have agreed to make London the time centre, and the one hundred and eightieth degree of longitude from London (or Greenwich) as the point where the day changes. This meridian, therefore leads the day. Its passage under the one hundred and eightieth, or midnight, celestial meridian, marks the beginning of a new day for the earth; here to-day becomes to-morrow.

It is here, then, that Sunday is born, just to the west of Honolulu. But bear in mind that the day travels westward. Therefore, this new-born day does not visit Honolulu until it has made the circuit of the globe. Honolulu and New Zealand are only about thirty degrees apart in longitude; but they are a whole day apart as regards any particular day, because the point at which the day changes lies between them. Sunday born on the one hundred and eightieth meridian is a long way off from Honolulu. It is morning there, too, but it is Saturday morning; while in New Zealand it is not yet day, but the Sunday dawn is breaking. It is blear, then, that, if it is Friday (near midnight) at Honolulu to the east of the line, and Sunday (near 1 A. M.) to the west of it, a ship which sails from Honolulu to New Zealand, or from east to west, must sail out of Friday into Sunday, and thereby skip the intervening Saturday, and gains a day; and, *vice versa*, a ship which sails from New Zealand, where Sunday has begun, to Honolulu. Friday has just ended and Saturday begun, or west to east, must lose a day.—

MY DUTY.

BOIESTOWN, N.B. June 6th 1895.

DR. GAES:—Meeting your agent to day reminded me of my duty.

Over two years ago he called on me when he introduced your syrup, then I was strongly opposed to patent medicines.
