

THE BLOOM OF HEALTH

HOW TO KEEP LITTLE ONES BRIGHT, ACTIVE AND HEALTHY.

Every mother knows that little children need careful attention—but they do not need strong drugs. When baby is peevish, cross or unwell, it is an unfortunate fact that too many mothers dose them with so-called "soothing" medicines which stupefy and put the little one into an unnatural sleep, but do not remove the cause of the trouble. What is wanted to make the little one bright, cheerful and well, is Baby's Own Tablets, which will promptly cure colic, sour stomach, indigestion, constipation, diarrhoea, simple fevers and teething troubles. They give children sound, refreshing sleep, because they remove the cause of the trouble. These tablets are guaranteed to contain no opiate or other harmful drug. Mrs. James Found, Valatie, Ont., says:—"Before I got Baby's Own Tablets, my baby was very pale and delicate, and so peevish that I had to walk the floor with him day and night. The first tablet I gave him helped him, and that night he slept soundly. Since then the tablets have made him perfectly well, and he is now a fine, healthy looking baby, and is getting quite fat. I would not be without the tablets if they cost a dollar a box."

Baby's Own Tablets are good for children of all ages and are taken as readily as candy. Crushed to a powder they can be given with absolute safety to the youngest, weakest baby. Sold by all druggists or sent postpaid at 25 cents a box, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

News of the Week

New Brunswick.

Anderson charged with stabbing Paterson at New Denmark, N. B., has been committed for trial.

A baby, 3 weeks old, was left at the door of the home of Mrs. H. Green on Metcalf St., St. John. It was in a valise and was nicely dressed, and a note accompanying said, "Please take me. I was born Apr. 6th 1902. My name is Edgar Stuart." The child has been adopted by Mr. and Mrs. Taylor Bond. The mother has not yet been found, though it is believed he is known.

A SCIENTIFIC HORSE.

A friend of mine once shared the box seat with the driver of a stage coach in Yorkshire, and, being a lover of horses, he talked with the coachman about his team, admiring one horse in particular. "Ah," said the coachman, "but that 'oss ain't as good as he looks; he's a scientific 'os.'" "A scientific horse!" exclaimed my friend. "What on earth do you mean by that?" "I means," replied Jehu, "a 'oss as thinks he knows a deal more nor he does."—London Telegraph.

You Can Lead a Horse

to water but you can't make him drink.

You can't make him eat either. You can stuff food into a thin man's stomach but that doesn't make him use it.

Scott's Emulsion can make him use it. How? By making him hungry, of course. Scott's Emulsion makes a thin body hungry all over. Thought a thin body was naturally hungry didn't you? Well it isn't. A thin body is asleep—not working—gone on a strike. It doesn't try to use its food.

Scott's Emulsion wakes it up—puts it to work again making new flesh. That's the way to get fat.
