REMOVAL.

U. J. CLARK, BOTANIC PHYSICIAN. has REMOVED from Germain to Leinster Street, near the Catholic Chapel, where he will keep constantly on hand a supply of such VEGETABLE MEDICINES as have proved effectual in the cure of nearly every complaint incident to the human frame, with full directions for their use, purchasers will receive Gratis, a small pamphlet containing a list of the various preparations, with several useful hints to the sick and also to those in health.

Certificates in abundance have been received from some of the most respectable inhabitants of New Brunswick and Nova Scotia, who have been cured of various diseases of long standing after all other remedies had failed, some of which may be found in the pamphlet, above referred to, others can be seen at the office of the Subscriber. Also respectable individuals residing in this city, may be consulted, who can state plain, unvarnished facts, relative to the effects of these medicines, sufficient to satisfy every unprejudiced mind, that they are indeed the most efficacious ever yet offered to the public; and let those narrow contracted individuals who condemn that about which they know nothing, prove, if they can, that these medicines have ever done harm in one single instance.

The great and good Dr. Rush after bewailing the defects and disasters of medical science, consoled himself with the animating prospects of that hope, that all diseases shall yet yield to the power of medicine, for such is my confidence said he, in the benevolence of the Deity, that he has placed on earth remedies for all the maladies of man, and if that period shall arrive, when the heart strings shall no more be torn and lacerated, who would not exult in the joyful anticipation of that coming day, when medical knowledge shall have attained to that apex of perfection, that it will be able to remove all the diseases of man, and leave not for life, a single outlet, a single door of retreat but old age.

The earth is covered over with vegetables, the simple vocabulary of which, no scholar, no academy, no nation whatever, will ever be able perfectly to acquire. No, nor all the human race, in their united wisdom, shall be ever able to find out the limits, the name and nature of her innumerable millions! We therefore, with all humility, in consideration of our profound ignorance, should be willing to glean from every source, which promises an accession to our stock of materials. Amidst all the innumerable branches of knowledge which solicit the attention of the human mind, there can be none of so much importance, (religion only excepted,) as that of the healing art. Therefore let those who have reached a boundary at which they have designed to stop, not envy, nor impede the progress of him, who is determined to press forward till his journey shall end in the dark valley of the shadow of death. Prove all things, hold fast that which is good.
