AUSTRALIA'S VACANT LANDS

The Australian Commissioner in the United States says that Australia has 150,000 to 250,000 square miles of coastal area alone available for settlement and that only 12,000 have so far been utilized. In addition there are, he says, vast areas of untouched fertile area in the interior but the objec-

tion to these is that they offer none of the conveniences of town life, and Australians, like the people of other countries, do not like to be cut off from such conveniences. Both Federal and State Governments in Australia are now endeavoring to devise means by which some at least of the conveniences of town life can be extended to outlying sections.

WANT MODEST GARB FOR JEWISH WOMEN

(New York Times)

Lax conduct and immodest dressing of women were denounced at the final session of the Union of Jewish Orthodox Congregations at the Jewish Centre 131 West Eighty-first street, which adopted a resolution urging Jewish women to abide by their religious code and while attending synagogue "to be attired in such manner as not to conflict with the holiness of the place."

The conference adopted the resolution after a heated debate, in which the Catholic Church was praised for barring from services women whose apparel was considered immodest, while others asserted the church should not attempt to prescribe styles. The conference adopted many resolutions, among them one providing for the presentation of a copy of the Liberty Bell to New York city and another condemning the misuse of the sacramental wine privilege granted by the Volstead Act. The Liberty Bell will be presented during the sequenti-centennial celebration and will have inscribed on it the Hebrew inscription: "U'gratham Dror Ba'aretz L'chal Voshveah" (Proclaim Liberty Throughout the Land to All Inhabitants Thereof).

The union endorsed the United Jewish Campaign for a fund of \$15,000,000 on whatever basis is adopted by the Philadelphia conference yet to be held. The same resolution urges the Jews of America "to make every effort to induce the Soviet Government to guarantee the integrity of Jewish religious life and organization in the Soviet Republic."

WRIGLEY'S

AFTER EVERY MEAL

THE FLAVOR LASTS

Probably one reason for the popularity of WRIGLEY'S is that it lasts so long and returns such great dividends for so small an outlay. • It keeps teeth clean, breath sweet, appetite keen, digestion good. • Fresh and full-flavored always in its wax-wrapped package.

TO INDICATE EARTHQUAKE

The reported invention of an apparatus which will indicate an approaching earthquake is attracting the interest of Japanese scientists. The inventor is Dr. Jun Shida, a professor of the Kyoto Imperial University. The apparatus is intended to transform the initial earth tremor into a sound.

The new contrivance consists mainly of a pendulum, an electric coil and an amplifier. The pendulum is so delicately poised that it is susceptible to the slightest horizontal or vertical motion. When it is set in motion, electricity is instantly generated in the coil which affects an apparatus similar to the receiver on a telephone. This sound is amplified and issues through a sort of loud speaker. The volume of sound is in proportion to the magnitude of the vibration. During the tests, even such slight vibrations as those caused by tapping on the table or walking across the room, caused the apparatus to function.

Professor Shida made the discoveries which led to the invention while constructing a seismograph delicate enough to register the slightest possible vibration and record it 20,000 times larger than its actual strength. This seismograph provides records of minute disturbances, but an expert would have to watch it constantly to tell instantly when a major shock is on the way.

NERVES AND FAINTING SPELLS

Sent Woman to Bed. Great Change After Taking Lydia E. Pinkham's Vegetable Compound

Sarnia, Ontario.—"After my girlie was born I was a wreck. My nerves were too terrible for words and I simply could not stand or walk without pain. I suffered with fainting spells until I was no longer any good for my household duties and had to take to my bed. The doctor said I should have an operation, but I was not in a fit condition at that time. My neighbor said, 'Why don't you try Lydia E. Pinkham's Vegetable Compound?' I am sure it will do you good and will save those doctor's bills. So I was advised by my husband to try it after I told him about it. I am very thankful to say that I was soon able to take a few boarders for a while as rooms were scarce at that time. My baby is 17 months old now and I have not yet had an operation, thanks to your medicine. I have recommended your Vegetable Compound to a few people I know and have told them the good it has done me. I know I feel and look a different woman these last few months and I certainly would not be without a bottle of your medicine in the house. You can use this letter as you see fit, as I should be only too glad for it had done for me."—Mrs. ROBERT G. MAC-GRONOR, R. R. No. 2, Sarnia, Ontario.

A recent canvass of women users of the Vegetable Compound report 98 out of 100 received beneficial results. This is a remarkable proof of its merit. C

A WORD FOR THE WOMEN

(Boston Transcript)
Women have long since demonstrated their disposition, as well as their privilege, to be about everything that a man is. They are governors, congressmen, judges, bank presidents, policemen. They evince little disposition to be soldiers, but that is not because they cannot be soldiers. Antiquity, with its Amazons, and contemporary Russia, with its Battalion of Death, have demonstrated women's martial capacity. That they should in time become jockeys was a foregone conclusion. We have long since seen them doing dare-devil equestrian stunts in the circus, and they have, no doubt, appeared as jockeys in American races. But England, it is said, had never seen them as jockeys in an historical race until the other day when, at the Newmarket Town Plate, a contest said to have been founded by King Charles II. in 1666, five of the eight horses entered were ridden by women; and the race was won by Hogir, ridden by Miss Eileen Joel, aged 18. This was an unprofessional race, so that it does not mark the entrance of women into the jockey's profession. But it proves the tendency. Presumably we shall next see women jockeys in the Derby.

In this case, we are told, all the jockeys "rode after the manner of men." There is nothing surprising about that. When a woman takes a man's job she usually takes it after the manner of men. Does not Mrs. Ferguson govern the State of Texas after the manner of her husband "Jim"? She does. Nor is there any reason apparent why a woman should not ride a horse as well as a man. The only question that might arise, in professional races, would be whether a woman jockey would have the nerve, the doggedness, the coolness and resistance that might be necessary to the winning of a particular race. Here again all the precedents are in her favor. Endurance, resistance to hard physical conditions, the ability to "stand the gaff," are qualities that not only do women exhibit every day, but that they have to possess in order to live at all. And assuredly they are quick thinkers. There is no reason why a woman should not have nerve and resource enough to be a good jockey.

BURN IT TO KILL
MOSQUITOES AND FLIES

WORLD'S GREATEST ALUMINUM PLANT

What is to be the largest aluminum plant in the world is being established by the Aluminum Corporation of America at Chute a Charon, Quebec. The initial step was the development of 600,000 horsepower at the falls, known as Chute a Caron, on Lake St. John. Plans call for the expenditure of \$75,000,000 to \$100,000,000 upon power development and the construction of the plant. The power equipment contemplated in the present plans include ten of the largest turbines in the world, with a capacity of 8,000 horsepower each. Twenty boats will be operated on the Saguenay to meet the requirements of the company. The plant is expected to employ 8,000. To accommodate them and their families a model town is being laid out which is likely to have a population of 50,000 persons in two years.

ARTIFICIAL LAKE AS POWER SUPPLY

As a preventive of floods and a means of power development an artificial lake is to be created in New York at Sacandaga. The lake will be 25 miles long with a maximum width of four miles and the depth will vary from 70 to 40 feet. Construction of lake will involve the destruction of sixty miles of highway and eight miles of railway track and flooding the sites now occupied by a few decadent hamlets and a good deal of poor farm land, as well as an unhealthy area of swamp. Incidentally it will necessitate the removal of fifteen public and nine private family cemeteries. Up to the present nearly 2,500 graves have been identified and relatives of the dead are to be allowed to select the cemeteries to which the remains will be removed. For the unknown dead those carrying out the work will provide new resting places. The undertaking is expected to cost \$9,000,000 in all, but besides preventing loss by flooding it will increase the amount of power available from 25,000 to 135,000.

DIRECT RESULTS

of attending a wide-awake, progressive school is the progressive training received in that institution. You reflect the atmosphere of the school you attend and your success is determined very largely by that fact.

CHANCERY SALE

There will be sold at Public Auction in front of the Post Office at Butter-nut Ridge in the Parish of Havelock in the County of Kings, on THURSDAY, the TENTH day of DECEMBER A. D. 1925 at the hour of TWO o'clock in the AFTERNOON, pursuant to a Decree of the Supreme Court, Chancery Division, dated the EIGHTEENTH day of AUGUST A. D. 1925 in an action therein pending wherein Mabel M. MacDonald is Plaintiff and Ernest Alward and Alpha Alward are Defendants, the lands and premises in the said Decree and in the Plaintiff's Statement of Claim, described as:—
"ALL that certain piece and parcel of land and premises situate lying and being at Butternut Ridge, in the County and Province aforesaid, and lying on the northerly side of and adjoining the Highway Road leading from Butter-nut Ridge Corner to Lower Ridge and bounded and described as follows: Northerly by lands of Clair Perry; Easterly by lands of or in possession of Alexander Cummings; Southerly by lands of the said Clair Perry. The same meaning and comprising all that certain piece of land conveyed to the said Ernest Alward by Clair Perry and Gertrude Perry his wife by their Deed bearing date the fifth day of May A. D. 1922, and registered in the Registry Office in and for the said County of Kings on the 8th day of May A. D. 1922, as Number 78100, entered in Libro No. 5, pages 187 and 138, and also being all that certain piece and parcel of land conveyed to the said Ernest Alward by Elizabeth Hayes by her Deed bearing date the second day of February A. D. 1921, and registered in the Registry Office in and for the said County of Kings on the 15th day of February 1921 as number 76570, entered in Libro No. 2, pages 319-320; in reference to the said records the same will more fully and at large appear."

The said land to be sold with the approbation of the undersigned Master of the Supreme Court pursuant to "The Judicature Act 1909" and Amending Acts.

All parties have leave to bid. For terms of sale and further particulars apply to Messrs. King & Rice, Solicitors for the Plaintiff.

DATED this TWENTY-EIGHTH day of SEPTEMBER A. D. 1925.

JACK H. A. L. FAIRWEATHER,

A Master of the Supreme Court.

It does no good to fume and fret
About the dirty deal you get;
They longer live and always win
Who early learn to lose and grin.

A FAMILY MEMORIAL

should be a record for the ages

THE extra cost of a good monument over the other kind is a duty to those who come after quite as much as to those remembered.

THE value of our guarantee is evident in thousands of monuments erected by us from Halifax to Campbellton during the SIXTY YEARS we have been in business.

NEW LAMP BURNS 94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, J. M. Johnson, 246 Craig St. W., Montreal, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him to-day for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.
