U. N. B. CLAIMS RECORD IN ATHLETIC PARTICIPATION

CO-ED SPORT ON UP-GRADE THIS SEASON

Tennis and Track Popular Innovations

COACH COFFEY GETS TRIBUTE

Preparations for Basketball Season Underway

It would appear that in former years very little interest and support was accorded Ladies Sports in the University, basketball being the only sport in which they indulged. Last year, there was marked extension in the athletic programme for the girls. This was chiefly due to the appointment of a full time athletic director.

This fall, the second annual tennis tournament is being held. The number of entrants is larger, compared with last year. If the weather man would only give us a break, perhaps it would be even more successful than last year.

Softball is a new event in the annals of Ladies' Sports in the College. This has proved so popular that inter-class games are being run off. This particular sport affords great amusement to the male population of the college, who in turn give a (heartily?) support, judging from comments on the side lines.

With the holding of a Track Meet last week, the girls were given a place in the programme. Regular training had been given by Coach Coffey, and the benefits of his instruction were evident. However, either due to lack of time or of interest, the Junior and Senior girls were not represented, but it is to be hoped that in the spring they will give their support.

Speaking of Ladies' Basketball, this sport has more or less (mostly less) been neglected in the college. Last year it took on a new lease of life with the inauguration of inter-class games. Although the first team entered no league, it was a decided improvement over the teams of former years. When the basketball season starts, let's have a good turnout, girls, from all classes, and help to boost this sport even more!

It is fortunate that the "Powers that Be" realize how important college sport is in advertising the University, to say nothing of the fact that it is the truest test of sportsmanship. Let's hope that the interest now shown in Ladies' Sports may be sustained, and that greater efforts will be made to help it along.

THE COUNCIL SANCTIONS ARTS CLUB

Hold First Meeting Tuesday—Anderson Elected Secretary
Prof. B. Kierstead to Read Paper

A meeting of the newly formed Arts Club recently sanctioned by the Students' Council, was held in Prof. B. S. Kierstead's lecture room Tuesday at 1 p.m.

President F. Bentley was in the chair. R. Bayley and E. Anderson were nominated for Secretary, the latter being elected.

Prof. R. E. D. Cattle spoke briefly, referring to similar clubs at Cambridge and saying how much he enjoyed them. The Professor also expressed his pleasure over the fact that this was an altogether new step in student activities of the University.

The meeting decided to hold its first discussion meeting (of which there are to be three a term) on Wednesday, Oct. 28, at 8 p.m., when Prof. B. S. Kierstead will read a paper, and the discussion will be opened by Prof. R. E. D. Cattle.

Don't forget the Orchestra Benefit Dance.

HOOP PROSPECTS BRIGHT DESPITE LOSSES IN RANKS

Sixty Percent of Last Year's Squad Gone

D'ALTON MIX NOT TO PLAY

New Uniforms to Make First Appearance

Due to the fact that 60% of last year's first string will not be with us, it is possible that there are those who may be inclined to look askance at this year's basketball prospects, nevertheless anyone on the inside track will tell you without a moment's hesitation that the prospects are bright and a good season may be expected.

The "old timers" left are the blond Lee who sets feminine hearts pit-a-pat whenever he hoves into view; while some get tired Dick is still 'Nelling, and then we have the cautious Christmas who spends his Friday, Saturday and Sunday evenings, and sometimes the afternoons down town with? Well your guess is as good as mine. However this will stop as soon as training starts. You must keep in shape Lyn.

D'Alton Mix will not be out for the team this year. His claim is that he is falling prey to senility but we suspect that he requires all his spare time for "taking walks" with the Titian-haired Marjorie. All that, is however, neither here nor there, and the team is losing a good man in Mix, even though he always was tired.

The rest of last year's team namely Fraser, Barbour, Brist and McAllenan have been lost to us through graduation in its various forms.

Ted Coffey will be the Mentor of the team again and is going to get the team out for pre-season workouts at an early date. Ted has already been scouting around among the new students for material and he is optimistic concerning results.

The team will make its appearance this season in snappy new uniforms, which will be a big improvement over the non-descript outfits worn last year.

It is hoped by the members of the team that the girls basketball squad and other feminine beauties will put in a frequent appearance at the gym, as the presence of the fair sex seems to have a considerable amount of inspirational and aspirational value.

The finishing touch to all the games will be the usual dance, and what's more no other sport gives the spectators such opportunities for a good time.

Apparently we have forgotten a very big item, but lo! not so. Arn Peck will be managing the boys' squad as well as partly managing a certain individual on the ladies' squad. But no kidding, we think Arn will make a swell manager and keep the gym warm.

SOPHOMORE FORESTERS DRINK MILK
Room No. 301 in the Residence witnessed another wild party on Friday evening, when the Sophomore Foresters gathered and imbibed deeply of toast and milk amid songs and fairy tales, as told by "Daddy" Mix and Prof. Fleiger.

The Sophomore Foresters are to be congratulated on their efforts to become an organized class group, an effort which until now, has not been yet attempted by any single class within a faculty. The aims of this group are to bring the members together in a closer friendship and to stimulate interest in their future profession.

In an informal manner D'Alton Mix, the organizer, is president, Prof. Fleiger is honorary president, with Tommy Stephens as keeper of seals and shekles.

These brawls are merely necessary stimuli to all Foresters, a sort of monkey gland affair to rejuvenate the individuals.

Seventy-four Percent of the Student Body Engage in Supervised Athletics—Freshmen Class Give Strongest Turnouts—Ted Coffey Deserves Credit

The University of New Brunswick claims a Dominion record for average student participation in athletics. No less than 74% of the entire student body are at present engaging in supervised games of one type or another according to statistics compiled by Coach Ted Coffey. This is believed to be far in advance of participation in other non-military universities of the Dominion and the United States.

The Freshmen with a percentage of 95 are either the most athletic or the most enthusiastic of the students. The Juniors are next with 71%, the Seniors show a 65% turnout, and the Sophomores trail with 62.5%. The percentage check-up was made by Coach Coffey on football, track, softball, tennis and golf, participation in both intramural and varsity sport being recognized.

Coach Coffey is to be congratulated for the energy and capability with which he has handled his games program this year. Through his effort and encouragement a very large section of the student body is getting direct benefit from athletics. The busiest man on the campus, Ted is being recognized as a genuine asset to the University. His achievement is one which might be emulated to advantage by other Canadian Universities.

MERMAN CLUB SHOULD BOOM THIS WINTER

With an excellent, up-to-date swimming pool, an early organization of the Swimming Club and lots of promising material in sight, swimming should have a big year at U. N. B. Already plans for two meets are being made. The first will be an intramural event, The Beaverbrook Residence vs. The Swimming Club. The events will be 20, 40 and 100 yds. sprints, free-style; 40 yds. back-stroke; 440 yds.; 100 yds. breast-stroke; plunge, and a relay event. The point-winners of this meet, thus combining the Residence and Swimming Club, will compete in a meet against the Saint John or Moncton Y. M. C. A. N. M. MacLeod, Pres. of Swimming Club.

MORE PULL IN SENIORS THAN FROSH

Thursday afternoon, Oct. 15, the Seniors proved conclusively that they have more pull than the Frosh. Led by Ed. Whittaker, who was particularly inspired, the Seniors had little trouble in upsetting the upstarts in the second and third pulls, although losing out in the first. The presence of Bob Ogilvie in the Freshmen line-up was not quite enough to turn the trick for his mates. The teams:

Seniors—Douglass, Adams, March, E. Anderson, Pond, Fowler, Whittaker, Lee, Baston.

Frosh—McElman, Burke, Ogilvie, McAuley, Pringle, Fradsham, McKnight, Thomas, Chalmers.

U. N. B. Ready for Caledonia As City Soundly Squelched

Adams and Pickard Score as Red and Black Win 6-0—"Did" Burke Played Outstanding Game—Team Vastly Improved

"Hail Caledonia!" sang U. N. B.'s fifteen marching off the field Tuesday afternoon after clearly and cleanly trimming their old and able Fredericton City rivals with two tries to none.

Six points to zero gives an excellent indication of the play that excellent weather and two striving, ambitious, and well balanced teams put forward to a good crowd on the College field. And Saturday's contest will be, after Burdo has questioned and found out the cause of those dozen penalty kicks, at worst a treat for Rugby fans, and a classic for the students of U. N. B.

The play of the first period was snappy, and exciting, providing several thrillers, the chief of which was "Did" Burke, the Freshman contribution to "Big Doug's gang."

The pace tired both teams in the second period, the City holding up remarkably well under the conditions, while the College squad gave the appearance of always having something to finish with when pressed.

From the first try, which was engineered by the diminutive Burke, when he gracefully made the opening for Adams and then passed perfectly to the "left bulwark," who scored, the University appeared as well in command of the situation. However this fact, and Pickard's try in the second failed to convince the plucky Capital boys—they played fifteen men from whistle to whistle and shared territory almost evenly.

The forwards played a fine game showing much improvement. They worked as a unit, controlling the ball most of the time in the scrimmages.

Their dribbling and open field running was also a feature.

Captain Douglass played a fine game all the way. He was in every scrum play and never stopped encouraging the boys and urging them on until the final whistle.

Pickard celebrated his return by playing a fine aggressive game. He was particularly prominent in the first half. His try near the close of the game was made on a fine play when he threw aside two tacklers to step over the line. Oldham played an aggressive game throughout, his one "bad" play marring an otherwise fine display. Pond, Goodine and Lee showed a marked improvement over former games, and Hyslop, playing his first big game, proved that he is not to be stopped by a little maltreatment. After a none too bright start Chalmers settled down and in the second period kept the scrum working in fine shape.

Patterson, playing his first game of the season, got in some good work getting his backs away time after time on fine runs. His passing could have been better at times but with practice this fault will iron out.

The backfield gave a fine display in every department of the game in the first period, but fell down both offensively and defensively in the second.

Burke played the game of his life. In addition to being the fastest man on the field he passed, kicked and tackled well. He made the nicest play of the game when he gave the ball to Adams for the first try. Adams and Watson played steady (Continued on Page 3)

DR. M. EASTMAN GAVE A TALK ON LEAGUE

Students Attend Meeting in Memorial Hall

DESCRIBES LABOR BUREAU

On Coast-to-Coast University Tour

"The Functions of the Labor Bureau at Geneva" was the subject of a well-received address delivered by Dr. Mack Eastman, of the Research Division of the International Labor Office at Geneva, before the students and the faculty of the University on Wednesday, the 14th, in the Memorial auditorium.

As an example of the problems confronting the Labor Bureau, Dr. Eastman referred to the matter of wages, pointing out that differing conditions and varying relations of employer to employee in different countries rendered it extremely difficult to agree on wage systems applicable in all countries. The speaker mentioned also the question of the number of working hours for the laborer, stating that even small reductions in the length of the workman's day had frequently had a very desirable moral effect on the worker in that he felt that his demands were being given a sympathetic consideration. The Bureau deserved credit for abolishing child labor in industry, on the sea, and in agriculture.

In describing the organization of the Labor Bureau, Dr. Eastman told how each of the fifty-five countries represented had four votes, two of them being governmental, one by labor, and one by the employers. In contradistinction to the League of Nations proper, the Labor Bureau may pass a measure by a two-thirds majority vote. The work of the Office is carried on the year round by a governing body of twenty-four members, judiciously chosen from the representatives of the parliament, labor, and employers of the various countries. In this connection Canada is especially fortunate in having two members in the governing body; this speaks well for the calibre of Canadians, inasmuch as the members of this body are to a considerable extent chosen for their high personal qualifications. Dr. C. C. Jones, the President of the University, occupied the chair.

RANGE PRIZE DONATED BY LOCAL MAJOR

Major J. A. Kirkpatrick Has Keen Interest in R. A. His Father a Bisley Man. M. Floyd Winner

The spoon this week, won by Milne Floyd, was generously donated by Major J. A. Kirkpatrick, whose father was at one time a member of the Canadian Bisley team. Maj. Kirkpatrick is extremely interested in the past records of the R. A., and is taking this means of encouraging them to even greater efforts, which this year, with luck, should culminate in the winning of the Canadian shield.

Due to the vagaries of the weather the inter-class shoot scheduled for this week was postponed, as only two ranges could be shot and the last relay on the 500 was rather damp at that.

The high scores for the two ranges were:

M. Floyd, 67; M. Downey, 64; T. Ozonne, 62; D. Corey, 60.

A hearty vote of thanks should be given the four markers, whose services were certainly appreciated after one day's shooting with no markers present.

Help put over the College Orchestra by coming to the Orchestra Benefit Dance.

POSSIBILITIES IN PROMOTING INTRAMURALS

Opportunity for Non-Varsity Men to Participate

VARSITY BENEFITS

Organized Sport vs. Verandahs Discussed by Ted Coffey

During the past few years educators have seen the folly of devoting all the attention of athletic coaches to a few individuals, who after hours and sometimes months of toil were molded together in a machine known as the "Varsity."

While all these men were patiently giving their "best" for dear old Bogus or Siwash or whatever college they represented, there were approximately 90% of the student body of the same institution sitting on their hands or doing about as much in the athletic world.

Often, a man would be discovered in his Senior or Junior year and inveigled to turn out, one or two of these "finds" and the old brains started in to buzz, and the saying "There's gold in them thar hills" originated. This little parable girls and boys is likened to any college, the gold being the "finds" and the hills the student body in that part of it which is known as the supporters.

Now just pin back your ears for another little story.

Once upon a time, there was a father who was called "Daddy," this man was the "pop" of several beautiful daughters.

Every afternoon when "pop" came home from work the verandah was cluttered up with collegiate "boy friends" and "pop's" cigars were taking an awful licking, and "pop" was getting pretty well fed up on current events, so one afternoon after "pop" spent fifteen minutes looking for a drink, and it was all gone too, he said to himself: "If I could just think of something to keep these 'boys' busy in the daytime, a man might have a little comfort around this joint, suddenly a great light dawned, why not give these birds a bat and ball, or a football or basketball and put them to work, that ought to leave me with a balance in two months after deducting the cost of bats and balls, etc.

Now my children unpin your ears and go to sleep and remember this, "That instead of getting booted off verandahs to start your athletic career at U. N. B., you can come out at almost any time and thereby gain the benefits of exercise, competition and good fellowship.

TWO CONCERTS TO BE STAGED BY DR. TOOLE

The College Concert Orchestra got away to a splendid start on Wednesday, Oct. 14th, with about fifteen in attendance. It is expected that this number will be considerably augmented by the time the orchestra meets again.

The conductor, Dr. Toole, mapped out a very ambitious programme for the coming year. It is hoped that the orchestra may be able to stage a concert during each term. These concerts will be featured with selections by the orchestra, assisted by undergraduate soloists.

To make this year an outstanding success, the orchestra needs the co-operation of every college musician. If you play an instrument and want to learn to perform in public concert the best in music, get in touch immediately with Dr. Toole, Prof. Stanley Perry or James McCallum, at the Residence.

At a clear store in Times Square, New York City, a telephone book is completely worn out in three days.
