FIFTH ANNUAL WASSAIL TOMORROW NIGHT

Scene Changed from Castle Hall to The Old Gaiety

Expected to be the Largest Yet

The main annual event of the Engineering Society the Wassail Bout, is scheduled to take place tomorrow night at 6.30 o'clock in the I. O. O. F. Hall above the Old Gaiety.

As in the past years, it will consist of a banquet followed by short speeches and toasting, with possibly a story or two being told. The college orchestra will be on hand to lead a sing-song at the close of the programme.

In years gone by the main event of the Engineering Society was the staging of the "Dance of the Year". At this function formal dancing was enjoyed from 9 to 11.30 p.m. at which time all adjourned to one of the local theatres to attend a special movie, lasting for something over an hour. Following this, the couples returned to the dance hall and danced till 3.00 a.m.

This custom was carried on for many years up to 1937. The following year, however, due to the increased number of dance "Up The Hill", the engineers decided to give up the "Dance of the Year" and to hold a stag party instead. For the next two years this party, known as the "Wassail Bout", was held very successfully at Woodbridges' Camps. In 1940 the boys, remembering the three mile walk out and the six miles back to town, decided to hold a banquet in town at the Waverley Hotel. This proved very successful and the following year, last year, it was held in (Continued on Page Five)

S. C. M. DISCUSSION ON LOVE ETHICS

The S.C.M. held its weekly meeting last Sunday in the gym of the Brunswick Street Baptist Church with the president Lloyd Smith in the chair. Grace Love opened the meeting with a brief devotional period which was followed by the regular business session. It was decided to send twenty dollars of the money received at the concert to the work of the International Student Service. The need of funds for the spring camp and the fall conference was brought before the meeting but was left in the hands of the executive.

The president then introduced the speaker of the afternoon, the Rev. Mr. Elgee, pastor of the Brunswick Baptist Church. As posted, the subject of his talk was Social Ethics but he narrowed his talk to Love Ethics. His talk was very interesting and he told something of the present day German's attitude towards Life.

After completing his talk he opened the meeting to all those who wished to ask questions and discuss the subject. There was a short hymn-sing after the meeting in which many of the members took part.

Kenneth Vavasour Leaves for R.C.A.F.

Last Saturday saw the departure of another Senior student to the armed forces. This time it was Ken Vavasour, a Science student, who was granted a commission in the R. C. A. F. as radio technician. He is to take up radio locator work. He went to the Manning Depot, Toronto.

Ken came to the University of New Brunswick as a freshman from Edmundston in the class of '42. He lived in the Lady Beaverbrook Residence during his last two years at college.

In his senior year Ken was President of the Chemical Society. He was also a member of the Science Club and was one of the most active and outstanding members. Ken was also a good student.

He was intensely interested in radio and its study proved to be his main hobby. He built the amplifier for the college rink. He has a (Continued on Page Five)

GLEE CLUB REVIEW

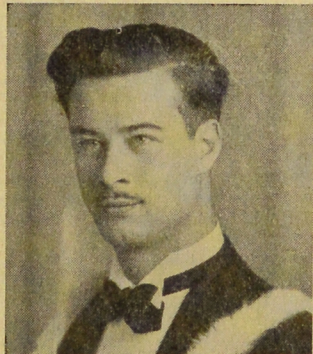

In an interview with The Brunswickian, Herbie Loane, the President of the Glee Club, stated that the members had been practising some time for the spring plays. Among the selections to be sung will be a group of well-known Stephen Foster songs.

Later on in the spring the Glee Club is planning a performance with the Cecilia Singers a renowned group of lady singers. At that time they will sing the Gilbert and Sullivan Operetta "The Pinafore".

IMPORTANCE OF ISSUE STATED BY SKELTON

When the Editor-in-Chief of The Brunswickian approached me some time ago to ask me if the Engineers would put out an issue of the paper, I was somewhat taken aback, but I assured him that we would try

E. T. SKELTON

Engineering Society President

anything once. When the matter was brought before the Society, the Engineers proved to be all for it and in no time an ample staff had volunteered. Practically none of these had ever done any journalistic work before. Considering that, and the full time-table of an engineer, the staff is to be congratulated for doing an excellent job.

Speaking for the Engineering Society, I would like to thank Mr. Carter for making it possible for us to publish this issue and for the assistance he has lent us.

It is the sincere hope of the Society that the Engineering Edition of The Brunswickian will become an annual event.

Production of Dramatic Society Play Uncertain

Debating Society Discuss Plebiscite

On Monday evening, March 9th, the Men's Debating Society held a meeting in the Economics lecture room with the President Linden Peebles in the chair. Due to unfavourable weather conditions the meeting was poorly attended. The Society planned to select team members for the coming debate with Mount Allison University on April 24th, but due to the small number of members present this was impossible.

Instead Lyman Purnell and Okechukwu Ikejiani presented their views on the subject "Resolved that a plebiscite is necessary before introducing conscription". Professor Burton Kierstead was present and offered many helpful criticisms.

It was decided that a date would be set for a practice debate with the Delta Rho before the ladies' team leaves for Mount St. Vincent's in Halifax.

S. R. C. MEETING

At an emergency meeting of the S.R.C., held in the Economics lecture room on Tuesday, March 11th, the Council affixed its seal of approval to a Maritime final Intercollegiate hockey game between U. N. B. and Saint Marys College, Halifax.

It was the opinion of the council that a game at Saint John would be more feasible than one at Halifax and Manzer Bunker was appointed to assist the hockey manager, Reg. Johnston, in making arrangements for the game.

Opera House Ruled as a Hazard

Up until press time it was uncertain whether or not the spring play "The Male Animal", would be produced. A special meeting of the Dramatic Society was held Thursday at noon in Prof. Smethurst's lecture room, to discuss the possibility of production.

Some discussion was held as to the time of production, and it was decided that March 24 was the only possible date. As that left only twelve days, Mrs. Springford, the director, indicated that the cast would have to practice 3 or 4 hours every day from now until the show was produced.

One of the men in the cast, said that due to the fact that he could not spare the required time he would have to withdraw. This left three characters not cast.

A long discussion followed on whether or not the play could be produced. It was generally felt that none could spare the time, but all would co-operate if it was decided to go on with production.

A vote, taken of the members of the cast came out tie leaving things deadlocked. After some more discussion it was decided to defer the final decision until the rehearsal that had been called for Thursday evening.

It was also brought to the attention of the meeting that the Opera House could not be used for production as it had been condemned by the Fire Marshall.

The meeting was then adjourned until 8.00 p.m.

NEWMAN CLUB HOLDS INTERESTING MEETING

The Newman Club held its regular meeting last Sunday evening in St. Dunstan's Rectory. The president Bernard Power conducted a short business period after which the guest speaker, Dr. J. S. Hynes, radiologist at the Victoria Public Hospital, was introduced. The speaker dealt with the necessity for well rounded education. He pointed out the great need for technical students to supplement their specialized training in order to fit themselves for a useful role in life, not only as technicians, but as good and capable citizens.

Capt. the Rev. H. V. Dysart briefly addressed the club. Speaking on education, he pointed out that too many people were omitting religion in their daily education. "The main thing in this life is to save our souls", he said, "so we must put forth a greater effort to acquire a good religious education".

The meeting was well attended and among those present were two former U.N.B. students, Mary Neville '40, and Mary McKenna '41.

An open discussion was held during which refreshments were served by the social committee under the direction of Eileen Crotty.

Newly Formed Guinea Pig Club Hears Duties at Second Meeting

At the second meeting of the newly formed Guinea Pig Club of McGill University, members of the Montreal Neurological Institute and the Department of Endocrinology spoke briefly to a gathering of over a hundred students on the duties which will be required of the volunteers for War Research.

One of the speakers stated that volunteers for this type of research will probably be called upon only once during the remainder of the year. Students should come prepared to spend a half day on the experiment, however, because, although it is probable that they will be needed only for an hour, the nature of the experiments is such that they may extend over a longer period of time.

The neurologist expressed his

appreciation to those volunteers who have already been working with him and pointed out that the group of McGill students who are doing this work is the only organized group of its kind in Canada.

The speaker for the Department of Endocrinology took the opportunity to thank the students who have been faithful in showing up weekly for their experiments in his department and added that about twelve more volunteers are necessary. This work differs from that of the other group in that students will be needed for half an hour at a time once or twice a week for the remainder of the term.

The speaker requested that only those students should sign up who are sure that they will be able to

continue the experiments and who will be able to appear at the time for which they have been signed, since each experiment involves the time of twelve people besides the student himself.

After the addresses were concluded, a discussion was held among the students present and it was decided to organize the volunteers into a definite club and a temporary executive committee of seven members was chosen by nomination from the floor.

The Executive Committee met on Friday to draw up a constitution for the club and to outline a definite programme of activity, which will be presented for the approval of the members at the next meeting of the club, to be held in the near future.
