the roomier, more private, Castle Hall.

This year all arrangements were made well in advance to carry on as last year, but due to the recent fire, The Castle Hall is no more, nor is the Princess Grill which was to do the catering. This meant that at the last minute the Arrangements Committee, consisting of Ben Downman, Chairman, Nelson Macnab and Gerald Estey, had to remake all arrangements, finally deciding to hold the Wassail Bout at the I. O. O. F. Hall. The other Committee, the Committee of Spiritual Welfare, under the capable leadership of Bob Grant suffered no change of plans due to the fire.

great love of classical music and possesses many of the best classical records. Amateur photography proved to be another of Ken's hobbies.

While in attendance at U.N.B. he made many friends and they will regret to see him leaving the campus.

NOTICE

The Brunswickan would like to point out to all students that each undergraduate is entitled to one Brunswickan only. In the past there have been many who have taken more than this, home with them. In some instances, one person has laid claim to as high a number as FIVE. Since there is only a limited number of papers printed, this action has meant that some students have had to do without.

The management of the paper regrets to state that unless the students co-operate and the situation is remedied, in future each issue will have to be handed out at The Brunswickan Office and the receiver's name checked off on a list. Such a procedure would entail inconvenience both to the students and to the staff. Your co-operation is requested.

Origin of University Seal Creates Mystery

Contrary to popular opinion, the present seal of the University of New Brunswick does not date from 1860, the birthyear of the University. In the Senate Minutes for 9 Aug. 1860, we find the Senate permitted the seal of King's College to be used until further orders. At the following year's meeting, 26 June, 1861, the Senate appointed Mr. Justice L. A. Wilmot and Hon. Mr. J. S. Saunders, a committee, to arrange for a proper seal. This committee's report was not received until 11 Mar. 1864. They had "procured" a seal. It was adopted by the Senate. In the same minutes the old seal in use was ordered defaced.

Questions as to where the new seal was "procured", the description of the seal, the selection of the motto, "Sapere aude", and so on, are not revealed.

If you can add any facts towards the completion of the seal story, The Brunswickan will be very grateful to receive and record them.

HIGH WATER

A travelling salesman, caught in a torrential rainstorm, stopped overnight at a farmhouse. In the morning, he looked out on a flood coursing through the front yard. He watched pieces of fence, chicken coops, branches, and an old straw hat floating past with the current. Then he saw the straw hat come back, upstream past the house! Then he saw it go down again. Pretty soon it came back upstream — and by now the salesman wondered if he had gone crazy.

Finally he called the farmer's daughter. "Oh," she said, after a glance out the window, "that must be Grandpa. He said yesterday that in spite of hell or high water he was going to mow the yard today."—Reader's Digest.

She (cooly): "You bad boy, don't you kiss me again."
He: "I won't. I'm trying to find out who has the gin at this party".

Psalm to An Engineer's Sweetheart

Verily, I say unto ye, marry not an engineer;

For an engineer is a strange being and possessed of many evils.

Yea, he speaketh always in parables which he calleth formulae.

He wieldeth a big stick which he calleth a slide rule,

And he hath only one bible, a hand book.

He thinketh only of strains and stresses, and without end of thermodynamics.

He showeth always a serious aspect and seemeth not to know how to smile.

He picketh his seat in a car by the springs thereof and not by the damsels.

Neither does he know a waterfall except by its horsepower, nor a sunset except that he must turn on the light, nor a damself except by her weight.

Always he carrieth his books with him, and he entertaineth his sweetheart with steam tables.

Verily, though his damself expecteth chocolates when he calleth, she openeth the package to discover samples of iron ores.

Yea, he holdeth her hand but to measure the friction thereof, and kisseth her only to test the viscosity of her lips, for in his eyes there shineth a far away look that is neither love nor a longing look—rather a vain attempt to recall formulae.

Even as a boy he pulleth girl's hair but to test its elasticity.

But as a man he deviseth different devices.

For he counteth the vibrations of her heartstrings,

And seeketh ever to pursue his scientific investigations.

Even his own heart flutterings he counteth as a measure of fluctuation,

And enscribeth his passion as a formula,

And his marriage is a simultaneous equation involving two unknowns.

And yielding diverse results.

Verily, I say unto ye, marry not an engineer.

History Of

(Continued from Page Two)
store room, built with its own proceeds, in the upstairs hall of the Engineering Building. The following year it became evident that the store needed a manager and a Student Manager was appointed and placed in complete charge. It is under this system that the Store now operates.

The objects of the Engineering Society are, to quote the Constitution:—

"(a) The promotion of increased interest in engineering science among the undergraduates of the University of New Brunswick.

(b) The forming of a bond of union between undergraduates and graduates living in the vicinity of Fredericton.

(c) The promotion of good fellowship between the Society and other engineering societies in New Brunswick by holding joint meetings.

(d) To maintain a Co-operative Store for the purpose of obtaining Engineering supplies for its members."

Meetings of the Society are held from time to time throughout the year. When possible, guest speakers are invited to give addresses, and at other meetings, members of the Society give talks. For the past few years one or two meetings have been given up to public speaking contests to encourage members to get used to public speaking—a very important phase of engineering which is unfortunately beyond the scope of the University course. These student talks may be on any subject whatsoever that would prove interesting to the society as a whole. A "mug-up" of coffee and biscuits is the inevitable ending to all meetings.

The main annual event of the Society is the featuring of the Wassail Bout, which is described elsewhere in this issue.

When asked about membership, Herbie said that the Club is always looking for new members. Even though it is quite late in the season there is still plenty of opportunity to join the Club.
