

Have Writ will travel

Halifax (Special) — This staid old town was pepped up on the weekend of January 15 by a visit by the UNB Law School, en masse. The trip came as a result of an invitation by the Dalhousie Law students for their UNB counterparts to visit the port city for a weekend of discussion and athletic competitions.

The festivities began with a tea party in the Lord Nelson Hotel on Thursday evening, as some thirty odd UNB lawyers arrived by car and began to meet their hosts. The tea was followed by a social hour at one of several fraternities. The UNB Sports Car Drivers then took to the streets for a rally which ended at a downtown Chinese restaurant under the supervision of the Halifax Police Department.

On Friday morning, the UNB contingent had the opportunity to visit the classes at Dal Law School. A picnic lunch was then enjoyed at the Citadel Inn, followed by a fast-paced basketball tilt which saw the UNB Tortfeasors Five demolish Dal 58-26, sparked by Angry Angers and Pretty Woman Tingley. An evening dance to the music of the Shot Hot Five gave the UNB Swim Team, led by McLean and Coldwell, a chance to perform.

The UNB Curling Rink . . . consisting of only two emaciated bodies for the Saturday morning match . . . was stoned under by Dal, 17-0. The Sick Six fared little better at hockey on Saturday evening, being on the receiving end of a ten goal shutout by Dalhousie's Olympic hopefuls. However, assists were racked up by Stewart, Elgee, and Ashfield.

Sunday sports events take place as the UNB party prepared to return to Fredericton, but the complete box scores were unavailable at press time. Parroway, Webster and Nicholson lost their contests, while Riordon and Russell each scored goals, with an assist by Gorman. LeBlanc and Gaudin were ruled ineligible to play, having lost their amateur status.

Both the single and the married members of the UNB contingent considered their trip an unqualified success, and plans are already being laid for similar trips in the future. The Dalhousie Law School has been invited to UNB during a February weekend, when UNB will attempt to return their hospitality in Halifax.

Ski trip a success

Shown here are a few of the UNB Ski Club members who went on last weekend's trip to Stowe Vermont, the ski capital of the East.

Stan Rust, president of the club, centre to left of Judy Murphy, said that the trip was a tremendous success. Sixty members of the club were able to make the trip in two buses. Rust said that the management of the Round Hearth, where the group stayed, told him, "There are groups and there are groups but UNB had one of the better groups". Friends were made among the many American college students who ski at Stowe and the trip did much to prove that college students from both sides of the border have similar interests.

CAREERS WITH Chemcell

Chemcell (1963) Limited with annual sales of over 90 million dollars, ranks as one of Canada's major producers of chemicals, synthetic fibres and fabrics. The head office is located in Montreal and the two operating divisions, Canadian Chemical Company and Canadian Celanese Company, together employ over 6,000 personnel in plants, laboratories and offices across Canada.

The keynote of Chemcell is growth and diversification. Started by a petrochemical operation launched in 1955, Chemcell's history has been marked by a continued expansion of capacity, diversification into new products, and a steady growth of markets and earnings.

CANADIAN CHEMICAL COMPANY

The main plant at Edmonton, Alberta produces a wide range of organic chemicals — solvents and intermediates — which serve a host of industrial uses such as the manufacture of paints and lacquers, pharmaceuticals, cosmetics, plastics, adhesives, herbicides, etc.

At Two Hills, Alberta, Western Chemicals, a recently acquired subsidiary, produces inorganic chemicals including chlorine, muriatic acid, caustic soda and calcium chloride.

Canadian Chemical has a modern research centre at Edmonton. Sales offices are located in Montreal, Toronto and Vancouver and extensive

export sales are handled by agents throughout the world.

CANADIAN CELANESE COMPANY

The Canadian Celanese division manufactures a wide variety of synthetic textile products, including the chemical intermediates which receive further processing. The end products include fibres in both staple and continuous filament form, cigarette filter tow, woven and knitted fabrics and tufted and woven carpets. Cellulose acetate and polypropylene are the principal fibres processed. The main plant and research centre is located at Drummondville, Quebec, with other Quebec plants at Sorel, St. Jean and Coaticook.

A plant producing cellulose acetate flake and fibre is located in Edmonton in conjunction with the chemical operation of Canadian Chemical Company. Sales offices are maintained in Montreal, Toronto, Winnipeg and Vancouver.

Types of Graduates Required:

The diversity and growth of Chemcell provides the opportunity to fully utilize a broad range of skills at the graduate and post-graduate levels. Requirements include chemistry: chemical, mechanical, electrical and textile engineering; physics and engineering physics. As a chemist or engineer, you may work on research, product development, process engineering design,

construction or production; or your qualifications and interests may suggest a career in marketing or technical service.

Requirements also occur in other disciplines, notably commerce, mathematics and business administration and graduates are utilized in such functions as accounting, data processing, operations research, planning, marketing, industrial relations, etc. Post-graduate requirements occur most often in research.

Salaries and Employee Plans:

Our salaries and benefit plans are designed to meet part of our overall objective of attracting and retaining a highly qualified work force.

Opportunities for Advancement

Chemcell is a growth Company and personal professional growth can be achieved through varied, interesting and challenging experience in a fully integrated and highly diversified operation.

Our representatives will be visiting your campus and we cordially invite you to make an appointment for an interview through your placement officer.

For further information, just write to: Administrative Officer, Chemcell (1963) Limited, 1155 Dorchester Blvd. West, Montreal 2, Quebec.

Representatives of the Company will visit this Campus for interviews on February 1, 1965.
