and

# A higher form of engineering and science requires a higher form of calculator.

The further you go in engineering, math and other technical courses, the more you need a scientific calculator that speeds you through complex problems. With 254 powerful advanced scientific functions, the TI-68 from Texas Instruments is both a smart choice and an exceptional value.

A convenient feature lets you last equation replay check your

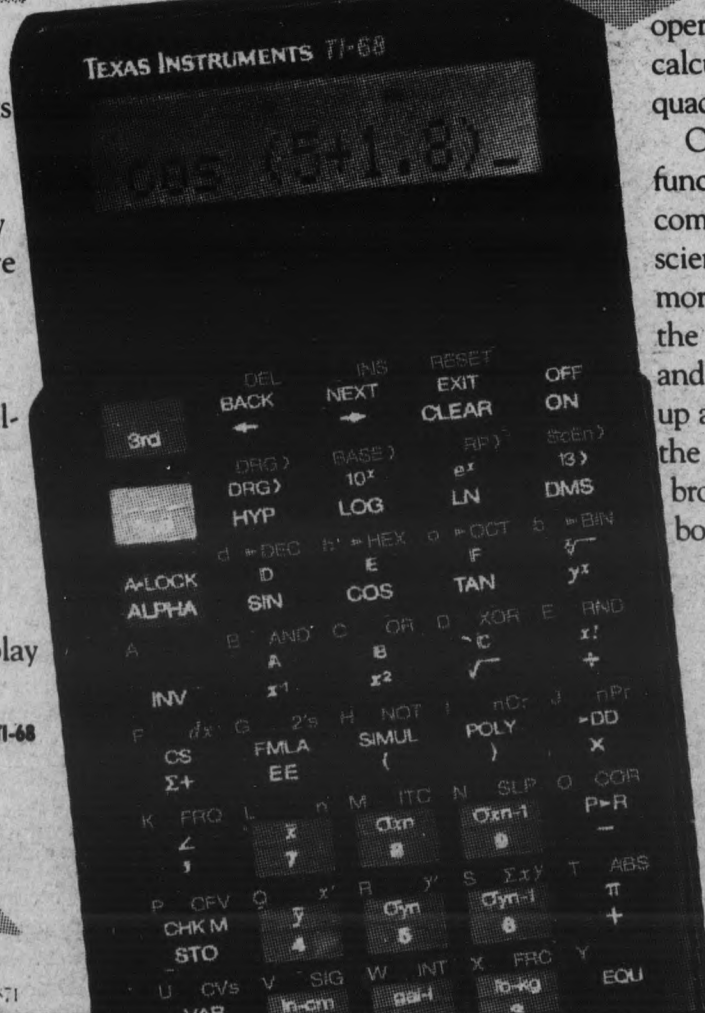

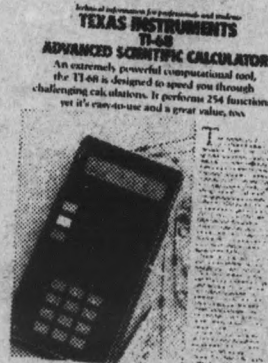

TI-68

answers without re-entering them. Formula programming provides up to 440 program steps for as many as 12

user-generated formulas. Perform operations in four number bases, one- and two-variable statistics, and Boolean logic operations. The polynomial root finder calculates real and complex roots of quadratic, cubic or quartic equations.

Only the TI-68 delivers so much functionality, value and ease in one compact, advanced scientific tool. For more information on the TI-68's features and functions, pick up a free copy of the TI-68 technical brochure at your bookstore.

**TEXAS INSTRUMENTS**

WIN A TI-68! SEE YOUR CAMPUS BOOKSTORE FOR CONTEST ENTRY FORMS.
