: THE MAIL VOTING COUPON :

This coupon is good for Five votes in Library Voting Contest. Yearly subscriptions for Daily or Weekly will be entitled to votes.

Cut out and fill in blank line with name of Church, School, Lodge, Club or other organization you wish to vote for and deposit in ballot box at Chestnut's Drug Store.

FIVE VOTES FOR.....

Thomas R. Shipp, who has received the Republican nomination for Congress in the 7th district of Indiana, is widely known as the secretary of the National Conservation Congress.

Addison T. Smith, clerk to the senate committee on manufactures and private secretary to Senator Heyburn, has been nominated by the Republicans of Idaho for representa-

tive at large.

The decision of Woodrow Wilson that he will not resign the governorship, but remain in office, follows a precedent set by Governor Hayes of Ohio in 1876 by Grover Cleveland, who in 1884 retained the governorship of New York, and by Theodore Roosevelt, who was a candidate for Vice President in 1910 while governor of New York.

TO HAVE ENORMOUS WATER POWER DEVELOPMENT

Quebec, Aug. 26.—Mr. Robert H. Reid, of the Montreal family of that name, and Vice-President of the Labrador Pulp and Paper Company has been in Quebec from New York, for the past few days, and has chartered the steamer Wampagoag to take down himself and a party to Newfoundland and Labrador where the properties of the company are situated. The trip will be in connection with one of the biggest pulp and paper propositions ever launched in this country, as it means the increasing of the capitalization of the concern from \$3,000,000 to \$15,000,000, the development of vast water-powers second only to Niagara, namely the falls on the Hamilton River, and the construction of two large pulp and paper mills that will give employment to between fifteen hundred and two thousand laborers and their families and, at the same time when in operation will have an annual output of something like 150,000 tons per annum.

MILLS WILL HAVE DAILY OUTPUT OF 500 TONS

When interviewed at the Chateau by the Telegraph representative, Mr. Reid said the mills would be erected at Hamlet Inlet and Sandwich Bay and would have a combined daily output of about 450 or 500 tons. At first only about 50,000 horse power would be developed at Muskrat Falls but the capacities of development were enormous. The engineers of the company has ascertained that there was at times as much as a million and a half h. p. going over the falls.

The company, said Mr. Reid, would not build any dams or storage reservoirs for the present as these were unnecessary. They would simply have an intake built. The company which has its headquarters in Montreal, and a Federal charter since 1908 and this charter gives its power which are very broad in scope. Among other things it has the right to construct and operate railroads and later on it is the intention of the company to connect its road with the proposed extension of the proposed extension of the Quebec and Lake St. John Railway or the Quebec and Saguenay Railway, or whatever line will continue right through to Cape St. Francis or somewhere in the neighborhood. It will be remembered that Sir Rodolphe Forget has intimated that one of his concerns may make such a continuation.

OUTPUT CONTRACTED FOR

Contracts have already been made for the purchase of the output of the mills, and it is understood that most of it will be shipped to the old country or to the Atlantic Seaboard of the States, that is to say, to Bangor, Boston and New York. Shipments will also be made to Wisconsin and Michigan. It is said that one large English syndicate that has placed a large number of orders with Labrador Company, is the Wall Paper Company.

The President of the Labrador concern is Mr. John McMartin, of Colalt and Porcupine connection and his brother, Mr. Duncan McMartin, is also one of the directors.

NEW VILLAGES WILL SPRING UP.

At present about five hundred men are engaged in the work of constructing the mills and it is expected that some large villages will soon arise as a result of the new industry. One of these will be named Grand Village and is situated at Hamilton Inlet. Already a sum of \$800,000 has been spent by the company at this place and Sandwich Bay, where these will be another centre of the population near Cartwright the Hudson Bay post. Engineers of the company have been working there for the last six years and it has operated lumber and saw mills there for three or four years. All the money has been raised by private subscriptions and the bonds will not be placed on the market even to raise the extra capitalization desired. The outlay of the pulp and paper mills will amount to four and half millions and it is calculated that these will be in full going order before the end of the year.

40,000 SQUARE MILES OF LIMITS

The Company has more than forty thousand square miles of limits to draw upon, all of which is well wooded. Ninety per cent. of the wood is spruce, the black spruce being far more frequent than the white. At first only mechanical wood pulp will be manufactured. All of the spruce that measures more than twelve inches at the small end will be utilized for lumber, and Mr. Reid calculates that there will be 4,000 feet of wood between 12 and 28 inches for every acre. He also says that it is the intention of the company to cut scientifically a task that will by no means be difficult, for the reason that only about a fifth of the area of the limits will be cut over each year. There will be an extensive reserve growth under six inches, and as a spruce tree usually takes from 25 to 40 years to be fit for cutting there should be a never ending supply for the mills.

All the buildings, including the operators' houses, will be in concrete and there will be work for at least 1,500 men and their families—regular work at that.

The Labrador Pulp and Paper Company intends to make Quebec its base for all supplies and will, said Mr. Reid open an office here next spring. The mills will be distant 1,050 miles from here, and this will mean only about three and a half days' direct route, instead of about seven or eight days by other routes, which would under ordinary circumstances, necessitate a round about journey via St. John's, Nfld.

WHERE LABOR WILL BE DRAWN FROM

The unskilled labor will be drawn mainly from the fishing population of Newfoundland and Labrador, and according to Mr. Reid, a series of poor fishing seasons and other combinations have made these fishermen rather inclined to prefer the steady work of the woods and mills to the more hazardous and precarious occupation which they have been accustomed to practise. Besides they are all good woodsmen. Such skilled labor as is needed for the mills will be recruited from the Province of Quebec.

NEW YORK CAPITALIST INTERESTED

The party that will accompany Mr. Reid is composed of New York capitalists or representatives of various concerns interested in the plans of the company. One of them is Mr. G. A. Massey, who is connected with the Harvester and Standard Oil and other big American trusts. Another member of the party is Mr. Reid's engineer, Mr. Leigh Stanton, who represents Mr. Mortimer Foster, the well known Hydraulic Engineer and pulp expert.

There is a boy living here. He finds that the general domestic life of the people has advanced in as much as the isolation of the farm life is now of the past, the people are more in touch with the world and wealth is more evenly dispersed. As to the future, Dr. Eaton believes that Maritime Union would be a most effective remedy for some existing ills, "if," said he, "it provides you with a Government that would carry out a statesmanlike policy of immigration financial and industrial expansion. I have always felt that we have in our governmental system of the East too large a team to pull so small a load. Maritime Union would reduce cost, give a wider outlook and more diversified schemes of advancement."

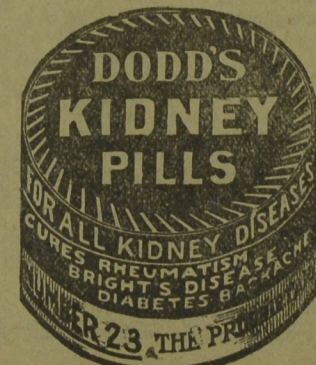

HONOR TO BE A CANADIAN

"And now as to my concluding message. Let me say the Nova Scotia must wait until the West has performed its miracle, wait until the west has at least laid the foundation and then I would not advocate too much hurry. The best thing about Canadian life is its comparative slowness."

We have been rich in manhood, while poor in money, I should fear to see these terms reversed. This world has probably a good many centuries ahead of it yet, and we need not try to anticipate too much of the future. It would be well to leave some land for the unborn generations and confine our intentions to improve the cultivation of that which we now have. I consider it a great honor to be born a Canadian and I would urge Canada to go slowly, and especially to take to heart the mistakes which the Republic has made, and avoid them.

"One more word," said Dr. Eaton, as the reporter was leaving. "I want to say a word regarding the Canadian papers as a rule do not consider life must be looked at abnormally before it is of interest to the public. In seeing things normally and presenting them as such, they are freeing themselves of that individual sensationalism of the press elsewhere."

Dr. Eaton has been three weeks in Nova Scotia, spending most of his time fishing in Annapolis County. He visited however, many scenes of his earlier days in the Province, and preached last Sunday in Wilfrids, the University of Acadia of which he is a graduate.

PIONEER FOX RANCHER TELLS HIS STORY

Mr. Charles Dalton of Tignish, Prince Edward Island, discussing fox ranching, said:

"In the year 1887 I bought one pair of silvers in the Island of Anticosti. There was not then in captivity another pair of breeding foxes in this province. I had one litter from them the next year but not having the stock I desired I procured another pair of first class blacks and killed the silvers. From this pair sprung the stock and business now of such fame all over the world."

"When other breeders can succeed, as I have done, in obtaining record prices each year for the last fourteen years, and obtain for skins such prices as \$580, \$540, \$460, \$410 and ranging down rarely to \$200, then they can claim to have as good foxes as mine."

"The value of my skins is due almost entirely to many years of careful selection of quality and color of fur. The pure black skins, other points being equal, will always bring a much advanced price, and it is a mistake to say that a little silver will not lower the value and it is always understood that the more silver the less price. For instance, a typical pure silver may bring \$215, a three-quarter \$50, a half \$300 and one-quarter \$200 and a black \$400 or upwards. This would mean first class of fur in all cases."

"The idea of limo affecting the fur and of black foxes having a different skull, is all 'moonshine.' The black fox is the same family of foxes, as the red but a different color variety and if a red or cross fox should throw a black it would not change the shape of the skull or any other part of the animal. I would not be afraid to build a fox ranch in a lime quarry as it would not affect the fur one particle. The system will not absorb more time than is required."

Dr. de Van's Female Pills
A reliable French regulator, never fails. These pills are exceedingly powerful in regulating the generative portion of the female system. Refuse to cheap imitations. Dr. de Van's sold at 25c a box, or three for \$1.00. Mailed to you, address The Quebec Drug Co., St. Catharines, Ont. Sold in Fredericton by A. J. RYAN.

"In the Case of MY Little Girl—"

In choosing and using a soap for your "Little Fairy" you will find no soap so mild, so neutral, so agreeable to tender skins as FAIRY SOAP.

Being made from products that you could eat, FAIRY SOAP agrees with even the tender skin of a babe.

FAIRY SOAP

is white—pure—floating. It comes in a handy oval cake. We could charge you five times the price asked for FAIRY SOAP and we could add nothing to its quality.

In higher-priced soaps you are paying for high-priced perfume and fancy wrappers—not better soap.

Made by THE N. K. FAIRBANK COMPANY Montreal

"Have you a little 'Fairy' in your home?"
