

THE CANADIAN BANK OF COMMERCE

SIR EDMUND WALKER, C.V.O., LL.D., D.C.L., President
ALEXANDER LAIRD General Manager
JOHN AIRD Assistant General Manager

CAPITAL, \$15,000,000 REST, \$12,500,000

SAVINGS BANK ACCOUNTS

Interest at the current rate is allowed on all deposits of \$1 and upwards. Careful attention is given to every account. Small accounts are welcomed. Accounts may be opened and operated by mail.

Accounts may be opened in the names of two or more persons, withdrawals to be made by any one of them or by the survivor.

G. W. HARRISON, Manager. FREDRICTON BRANCH,

BOB ROGERS METHODS IN MACDONALD

(Toronto Globe)

Do Sir Rodmond Roblin and the Hon. Robert Rogers imagine that the unsetting of Alex. Morrison in Macdonald because his "friends" had been guilty of corrupt practices wipes the slate clean? Do they think such a confession of corruption will enable them to escape the condemnation of the people of Canada for the grave offences committed in the name of the law, offences by which innocent men were sent to prison and kept there until they could not take part in the Macdonald election?

Never in the history of Canadian politics has there been such interference with the liberty of the subject as in the contest of a year ago in which Sir Rodmond Roblin and Mr. Rogers directed the Government forces. Even the Family Compact in its most high handed proceedings scarcely ventured so far. Five men who were canvassing for the Independent candidate, Mr. Richardson, were arrested. Premier Roblin boasted publicly that there would be more arrests, yet in no single case was there a trial of any man arrested, or an attempt to prove in court that he had committed an offence against the law. D. H. Walkinshaw of Winnipeg was arrested at Rathwell and rushed to Winnipeg. When it was found that an attempt was being made to have him liberated on bail he was kidnapped and railroaded to Portage la Prairie, where he lived on porridge and water until released after the election, without so much as a chance to answer the charges against him. In fact he never knew until the day he was released what the charge against him was. J. J. Sullivan of Melville, Sask., was arrested at Carman and sent to Winnipeg. After three days in jail he was offered liberty if he would get out of the Province. He refused to accept such terms and was turned loose. Later he tried to force a hearing of his case, but failed. U. J. A. Prince was another young Liberal worker arrested and later released. Capt. W. B. Sifton of Minitonas was arrested, refused bail, and also utterly failed to get a hearing of his case.

The disgraceful scenes in the Provincial Police Court when Sifton and Sullivan attempted to have their cases heard so that they could prove their arrest and detention to be entirely unwarranted were no doubt responsible for the removal from office a short time afterwards of Police Magistrate Alex. McMicken.

BAD BLOOD IS THE DIRECT CAUSE OF Pimples.

Pimples break out on the face and body, and it is impossible to get rid of them, unless you cleanse the blood of all of its impurities.

Burdock Blood Bitters is without a doubt, the very best medicine for this purpose.

This old, and reliable medicine has been in use for nearly forty years, and has a reputation unequalled by any other preparation for removing all the impurities from the blood and banishing the pimples.

Mr. Edward Paquette, Navan Centre, Ont., writes:—"One month ago my face was covered with pimples and a rash. I had tried a number of these so called blood purifiers with no avail. Seeing an almanac of yours in which you strongly recommend Burdock Blood Bitters, I decided to try a bottle, and after I had taken it I could see a decided change, and after using three bottles more all the pimples had completely disappeared."

Behind the political bandits who so abused the processes of the law stand the men who inspired and directed their action. To Roblin and Rogers free speech is but a byword and Magna Charta a joke. They have evaded the exposure of their lawless deeds by giving up the seat in parliament so foully won and as Sir Rodmond is himself the custodian of "British law and liberty" in Manitoba there is no danger of the attorney general instituting proceedings for conspiracy against the premier and his former colleague.

Unwhipped of justice, this pair of brazen debauchers of public morals stand today before the bar of public opinion. Their punishment must come from the people at the ballot box if it is to come at all. The first blow should be the election by the voters of Macdonald of a member who will stand up in parliament and confront Mr. Borden with the record of the crimes committed in his name and that of the Conservative party. The next should be the utter rout of the Manitoba government when next spring it goes before the electorate. It is unthinkable that the citizens of that province will longer tolerate the men who perpetrated the infamies of the Macdonald election.

Wood's Phosphodine,
The Great English Remedy.
Tones and invigorates the whole nervous system, makes new Blood in old Veins, Cures Nervous Debility, Mental and Brain Worry, Despondency, Loss of Energy, Palpitation of the Heart, Fading Memory. (Formerly Windsor.)**

PROVINCES LOSE FIGHT ON SUCCESSION DUTIES

(Toronto Globe)

Cable advices received in Toronto yesterday that the Privy Council had reversed the judgment of the Supreme Court of Canada and decided that succession duty may not be levied on personal property situated outside the province will have a serious effect on local revenues.

The case in point is that of the King vs. Cotton, province of Quebec, which stripped of its legal aspect, simply decides that only that portion of an estate situated within the province may be taxed for succession duty. Real property heretofore has been exempt under such circumstances but personal property, has been assessed for succession duty by the province where the deceased was domiciled at the time of death. In the Cotton case most of the personal property was situated in the United States, and objection was made to paying a double tax, one to Quebec and another to the state where the property was held. The Supreme Court of Canada held with Quebec, but the Privy Council, by the cable yesterday, has reversed that decision.

Inquiry at the parliament buildings yesterday revealed the fact that this decision will probably mean hundreds of thousands of dollars annually to the provinces of the dominion. Between Ontario and the other provinces of Canada, except Quebec, there has been a reciprocal arrangement so that double duty would not be exacted from an estate. Quebec in view of the fact that a large number of big corporations had their head offices in Montreal, chose to keep out of any such arrangement, with the result that the Cotton litigation arose, and it now loses what might have come from a reciprocal arrangement.

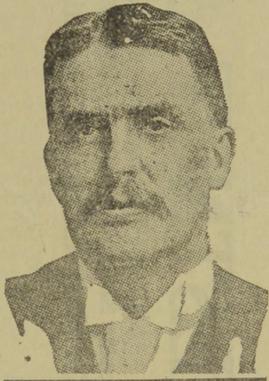

Mr. J. B. Lucas, in discussing the Cotton case, declared to be determined to see a decision to that effect. He said that he would be proactive, and that he would be an appropriate effect on the provincial exchequer, he could not see just what course would be pursued.

TRUTH ABOUT CANADA

No Trouble Finding a Job "When Y' Ken Y'r Business"

"I am going to close this letter with an example worth while," wrote an Englishman to his cousin in Canada. "I met a young Scotsman named Wilkie, hailing from Glasgow, the other day. Wilkie heard a lecture on Canada at the C.P.R. moving-picture show at the Glasgow Exhibition and became fired with Western fever. He landed in Winnipeg without a friend and with very little money. He had been in a piano house at home. Arrived, he applied at the McLean Rand Company on Portage Avenue. 'What salary do you want?' said the manager. 'It's work I'm thinking about maist!' says the Scot. Within an hour he was ripping up an old tin-pan piano which had lost most of its heart and most of its tone as well. But Wilkie went at the old rattle-bang-thing in a way that showed he knew his business, and to be brief he stayed with McLean and Company one year. Then he saw that the mechanical piano was coming to the fore, but knowing nothing of the 'inards' of the machine, he took some of the money he had saved, went to Toronto, was engaged by a piano-machine factory, worked there six months, went back to Winnipeg, found his place filled at Mac's, walked into Lindsay's piano house, and was taken on at an advance of five dollars per week over and above what he had been getting. In Wilkie's own words: 'My sister came out then, she got work at the big Massey-Harris house, office work, with good pay. We took a comfortable flat, we live there happy and contentedly; we have a fine piano and we'll be glad to have ye' call on us.'

"How does the pay for work compare with the Glasgow pay, Wilkie?" I asked.
"It's just double," he says.
"And how do you compare living?" says I.
"You pay more for luxuries!" says Wilkie, "but otherwise I am thinking it's just as cheap livin' in Canada, as anywhere else, an'," said he meaningly, "there's no trouble about findin' a job when y' ken y'r business!"
"Wilkie," says I, "can I tell your story to a newspaper?"
"Aye," he said, "some of the Glasgow folk'll know me fine."

THOMAS MOTT OSBORNE philanthropist, reformer and millionaire, who entered Auburn penitentiary as a convict in order to find out how a convict lives and is treated.

MICROBE EATS METAL

This Bacillus Has an Action Upon Iron and Steel

Although science knew a hundred micro-organisms that devour the human tissues and cause all sorts of maladies, and also many that eat plants, roots, dirt, wood, and clothing, it had never been imagined that there was one capable of eating up bits of steel and iron. Yet a discovery made by E. M. Mumford, an English student, showed that this is the case.

This species of bacillus varies in its digestive action upon iron and steel compounds according to whether it acts in the presence or absence of air. When oxygen is present the iron is precipitated by the germs as iron bog-ore, while in the absence of oxygen no iron salts are formed. This iron-eating germ is a short microbe about one-thousandth of an inch long. It grows readily on potatoes and then looks greenish-brown in color. It also colonizes in milk, gelatine, and agar.

American Sponge Fisheries

While sponge fishing in the Americas is rather a modern industry, it produces more than two-thirds of the world's supply in weight. The fisheries of the Mediterranean now produce about one-half of the world's supply in value. Sponge fishing is believed to be most highly developed at Tarpon Springs, Florida, and Batabano, Cuba. As early as 1822 the inhabitants of Key West, Florida, learned from specimens thrown up on the beaches of the presence of several species of useful sponges. For some time they were limited to domestic use among the inhabitants, but not until 1849 was a cargo sent to New York.

Valuable Fisheries

With respect to the fisheries of Canada, it may be surprising to some to be told that since 1870, the first year for which figures are available, Canadian fishermen have taken from the seas, rivers and inland waters of this country, fish valued at nearly a billion dollars, the exact figures being \$829,910,756.

Many Telephones in Toronto

Toronto has 120 telephones for every 1,000 of population as compared with 105 in New York.

WHEN APPETITE FAILS AND DIGESTION IS BAD

There is Danger Ahead for the Man That Neglects Nature's Warning

Dyspepsia Tendencies are Serious and Should Be Treated Accordingly

There is a strong moral in the statement of James Schrum of Pleasant street, Dartmouth, N.S. Like thousands of people he was falling in health because his stomach and digestive organs were out of repair. His vitality was slipping away; he was losing ground every day.

"I could not have held on much longer. I was wasting away simply because no remedy I used gave tone and strength to my stomach. The vital forces of my system seemed to have been sapped. Headaches have never come to those who use Dr. Hamilton's Pills and this fact is vouched for by the Assistant Manager of the Poultry Success Magazine of Springfield, O., Mr. J. H. Callander, who writes: 'No better medicine than Dr. Hamilton's Pills. We use them regularly and know of marvelous cures that resist ed everything else. They cleanse the whole system, act as a tonic on the blood, enliven digestion, help the stomach and make you feel strong and well. For headaches, indigestion that the one prescription is Dr. Hamilton's Pills.'

Being composed of natural vegetable remedies, Dr. Hamilton's Pills possess great power, yet they are harmless. They aid all organs connected with the stomach, liver and bowels. In consequence food is properly digested, the blood is pure and nourishing, the body is kept strong and resists disease. All druggists and storekeepers sell Dr. Hamilton's Pills, 25c. per box, 5 for \$1.00, or by mail from the Catarhazone Co., Buffalo, N.Y., and Kingston, Canada.

BOSTON WHOLESALE MARKET PRICES

(Continued from page two.)

BEEF

There is very little change in the market for beef. Demand continues quite moderate and only choice quality commands outside figures.

Mutton and yearlings are moving fairly and yearlings are firmer. Lambs are in steady request and are selling at full. Veals quiet and hard to sell at over 15c. Hogs are firmer but not yet active.

Beef, whole cattle, choice per lb.	12 1/2 @ 13
Beef, hind quarters, choice	13 1/2 @ 14
Beef, common to good	12 1/2 @ 13
Beef, forequarters, choice	11 @ 11 1/2
Beef, common to good	11 @ 12
Beef, forequarters, common to good	9 @ 10 1/2
Beef, cow, country dressed	8 @ 10
Eastern spring	13 @ 14
Veals, choice Eastern	15 @ 15 1/2

BUTTER

Receipts	Pounds
For 7 days	720,656
Last week	790,623
Same week 1912	1,136,985
Since May 1, 1913	53,709,161
Same time 1912	53,709,697

A stronger tone had been developed in the market, in sympathy with the advance quoted in New York but no such high prices can be obtained here because little or none of the fancy grades in demand there are offering here and we have to keep on a comparatively low basis to correspond with the actual business in this market. Receipts are running light with a short supply of strictly fine creamery.

For the past few days 31 1/2c. has been a full selling price for most of the extra offering, but at close receivers are getting 32c. for the best Western. This at present is considered a full selling rate but some fancy lots are held higher. Firsts are in good command at 28 to 30c., with some averaging net and extra held higher.

Dr. de Van's Female Pills

A reliable French regulator never fails. These pills are exceedingly powerful in regulating the generative portion of the female system. Refuse all cheap imitations. Dr. de Van's are sold at 50c. a box, or three for \$1.00. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.

"In the Case of MY Little Girl -"

In choosing and using a soap for your "Little Fairy" you will find no soap so mild, so neutral, so agreeable to tender skins as FAIRY SOAP.

Being made from products that you could eat, FAIRY SOAP agrees with even the tender skin of a babe.

FAIRY SOAP

is white—pure—floating. It comes in a handy oval cake. We could charge you five times the price asked for FAIRY SOAP and we could add nothing to its quality.

In higher-priced soaps you are paying for high-priced perfume and fancy wrappers—not better soap.

Made by THE N. K. FAIRBANK COMPANY Montreal

"Have you a little 'Fairy' in your home?"
