

COMPLETELY BROKEN DOWN

Another Lady Thinks "Fruit-a-tives"
Greatest Tonic In The World.

HAGERSVILLE, ONT., Aug. 26th, 1913.
I can highly recommend "Fruit-a-tives" because they did me an awful lot of good. About four years ago, I commenced taking "Fruit-a-tives" for a general break-down and they did me a world of good. We bought a good many dollars' worth, but they did all that your advertising claims for them, and as I said before, I cannot speak too highly for them. Their action is so pleasant, compared with other medicines, that I am glad to say so and I trust that some other woman may start taking "Fruit-a-tives" for I know the results will be all that you claim."

MRS. W. N. KELLY.

50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or from Fruit-a-tives Limited, Ottawa.

A PRIMITIVE RACE

"North Pole Natives" Really Belong to the Stone Age

The "North Pole natives" were discovered by Captain Amundsen while he was navigating his little craft, the Gjoa, through the North-west Passage in 1903-7.

He christened them "Nechilli," and considered them to be the most primitive race on earth. No white man had ever before invaded their icy fastnesses. Consequently, they were ignorant of the use of iron. Their fishing implements were long spears, fashioned out of reindeer horn. They knew no other method of procuring fire than that of rubbing two pieces of wood together. They were, in short, still in the stage of civilization reached by our ancestors of the Stone Age.

So cut off were they from others of their kind that they imagined their tribe was the only one in the world, and displayed the utmost astonishment when told of populous countries far to the south, where neither ice nor snow was. The Gjoa and her crew they thought to have dropped from the moon, and the first Nechilli to come aboard felt the deck, masts, boats, oars, all the while whispering to one another in amazement: "How much wood there is in the moon—how very much!"

THREE GENERATIONS

Kept Healthy By
Dr. Morse's Indian Root Pills

Over fifty years ago people began to find out the effectiveness of Dr. Morse's Indian Root Pills in correcting constipation and toning up the system.

Since then the popularity of this reliable old family medicine has grown steadily, and the increase in sales during the past year was the greatest in the whole half century.

As long as livers get sluggish, bowels constipated or kidneys inactive, just so long will

Dr. Morse's Indian Root Pills

cure these conditions and banish their distressing effects for those who are wise enough to use them.

Sick headaches, coated tongues, indigestion, biliousness, dyspepsia, rheumatism and similar disorders are almost invariably caused by impurities which should be removed from the system by the bowels, the kidneys and the pores of the skin. By toning up these organs so that they can do their work properly, Dr. Morse's Indian Root Pills cure, or prevent altogether, a large proportion of the common everyday ailments which keep so many people miserable.

Made by W. H. Comstock Co., Limited, Brockville, Ont., and sold by all dealers at 25c. a box.

ELECTRIC COOKING BLOCK

A Piece of Metal Which is Storing up Heat at all Times

The electric cooking block is a substitute for the stove in that it performs a great many of the offices of the stove in a very satisfactory manner, but from the standpoint of the electrical manager it has the additional advantage that it does not make its demand for current during the hours of the greatest load. On the contrary the general adoption of the block

ELECTRICAL COOKING BLOCK
WHICH STORES UP HEAT

would make a constant call for current which is what the electrical companies are desirous of cultivating.

The stove consists of a block of iron imbedded in heat insulating material. Within this block is an electrical heating unit. The surface of the iron block forms a smooth plate on which a cooking utensil may be placed. But normally, when the stove is not in use it is covered by a lid, also filled with heat insulating material. As there is practically no outlet for the heat generated by the heating unit, the iron block is steadily heated and rises in temperature until the cover is removed for a cooking utensil to be substituted. After one dish has been cooked the cover is applied to the stove again and it is permitted to store heat until the next dish is to be cooked. As compared with the ordinary disk stove the heat-storage stove uses very little current.

The Drain on Scotland

Nearly 200,000 Scottish persons emigrated from Scotland during the past four years. This number is equal to two-thirds of the population of Edinburgh, or nearly to the combined population of Grimsby, Ipswich and Reading.

Looking Both Ways

A new motor cycle rear light, to be mounted on a handle bar, can be covered with a mirror in the day time so a rider can watch the road behind him.

BETTER PAY UP

An Exchange says:

A subscriber who comes in these days and pays for his paper is blessed and in the kingdom to come he will be given a place a little higher than the angels. His name will be written at the top of the column next to the reading matter and nothing in the house will be too good for him. He will get complimentary to all the bar recitals and have a reserved seat beside the editor, while all delinquent subscribers will have to carry water for the performers and sit up in the gallery.

SEAWEED UTILIZED

A Valuable Commodity Created From a Nuisance

Prince Edward Island, which became famous as a fox farming country, has extended its activities into another field. Business men of the Island were carried away with the phenomenal success of fox farming, which in some cases returned them 900%, while the average dividend reported by thirteen companies was 208%. These large returns from what is a unique and unusual enterprise led some of the more ambitious Islanders to go into another untried field—the using of seaweed for commercial purposes. It is well known that seaweed is very largely used in furniture making, the dried product selling around \$40 per ton. Companies were formed to put the business on a commercial basis. A gasoline-driven motor mower controlled from a motor boat cuts the seaweed which is then loaded into a scow, brought to the shore and dried in the sun. According to the optimistic promoters, the industry has an almost unlimited future and will be very profitable as they create a valuable commodity out of something which has heretofore been regarded as of no value and rather as a nuisance. It will be somewhat unique if Prince Edward Island makes as great a success out of seaweed as it has out of fox farming.

What Day Were You Born?

Among the innumerable superstitions about babies is the old saw about the day of birth: Monday's child is fair of face. Tuesday's child is full of grace. Wednesday's child is full of woe. Thursday's child is full of joy. Friday's child is loved and given. Saturday's child must work for a living. But the child that is born on the Sabbath Day Is blithe and bonny and good and gay.

Only Sardine Fishery in Canada

The province of New Brunswick has this distinction: it possesses the only sardine fishery in Canada. The fishing is carried on in the waters of Passamaquoddy Bay and the waters around the Islands of Grand Manan and Campobello, and the West Isles. In the Bay of Fundy. Of such importance is this fishery, and in such masses do the fish appear that the fishermen who prosecute their calling amongst those islands depend largely upon it for their livelihood.

Ageing New Cheese

By treating freshly made cheese with alternating currents of electricity for 24 hours a Dutch electrician has found he can give it all the properties of age.

Nerves Were So Bad

THOUGHT SHE WOULD

GO OUT OF HER MIND.

Diseases of the nervous system are very common. All the organs of the body may be sound while the nerve centres may be affected.

Many women become run down and worn out by household cares and duties never ending, and sooner or later find themselves with the nerves shattered, and the heart action weakened.

On the first sign of any weakness of either the heart or nerves, flagging energy, or physical breakdown, do not wait until your case becomes hopeless.

Milburn's Heart and Nerve Pills will at once quieten the nerves, strengthen the heart and build up the entire system.

Mrs. Archie Goodine, Tilley, N.B., writes:—"When I was troubled with my heart two years ago, I was very bad. My nerves were so unstrung that sometimes I would almost go out of my mind. I doctored myself with everything I could get, until at last I got four boxes of Milburn's Heart and Nerve Pills, and they have cured me. I cannot speak too highly of this wonderful remedy, and will recommend it to all sufferers."

Price, 50 cents per box, or 3 boxes for \$1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

AT 60 ENJOYING PERFECT HEALTH

Because He Takes GIN PILLS

A prominent Consulting Engineer of New York City, thus heartily endorses GIN PILLS:

"I bought some of your GIN PILLS at Victoria, B.C., last September. Your remedy I find, at 60 years of age, to give perfect relief from the Kidney and Bladder Troubles incident to one of my age. I urgently recommend GIN PILLS to friends as being the one thing that does me good." E. G. WOODFORD.

By the time a man or woman is 60, the Kidneys and Bladder need a little help to keep in good working order. GIN PILLS are what they need. GIN PILLS keep the urine neutral, prevent colds settling on the kidneys or bladder and ward off Rheumatic attacks.

Remember, every box of GIN PILLS is sold with a positive guarantee to give perfect satisfaction or your money promptly refunded.

HEART SURGERY

Remarkable Operations Are Performed on This Vital Organ

Probably the most daring chapter in modern surgery is that which treats of operations on the heart. "The road to the heart is only two or three inches long, but it has taken surgery nearly 2,600 years to traverse it," was one writer's striking remark. Many shrewd observers in the course of the ages had noted that all heart wounds did not result in instantaneous death. But it was not until 10 or 15 years ago that surgeons began to act upon this knowledge. In exceptional cases death did not result immediately from a heart wound; there were intervals of a few minutes, a few days, or a few weeks. Why not utilize this interval in an attempt to sew up the wound? Medical history of late years reports many successful operations of this kind.

An especially noteworthy one, performed upon an Alabama negro boy in 1902, illustrates the resources of modern heart surgery. This boy had been the victim of an especially nasty stab wound. The knife had penetrated the apex of the heart and passed into the left ventricle, making a wound nearly half an inch long. When the boy was placed on the operating table in a little negro cabin the signs of death had already appeared. His feet were cold, and his face showed signs of the utmost distress.

The surgeons made a little window-like opening just above the heart. Through this they could readily see the injured organ, the blood spurting from the wound at each pulsation. One surgeon put in his hand, pulled the heart upward and held it while another sewed the wound with a catgut. The operation—performed without an anæsthetic—lasted 55 minutes; on the sixteenth day the boy was sitting up; in a short time his heart was as good as new.
