## PLANS FOR CONSERVATION DISCUSSED

Washington, D. C., Nov. 17.—For the first time since the historic conference of governors at the White House, as which the conservation movement started five years ago, a national report has been compiled, showing just what conservation has accomplished in the different States. The National Association of Conservation Commissioners, a newly formed organization made up of conservation commissioners from all the States, held its initial meeting at the New Willard Hotel today, preliminary to the opening of the National Conservation congress tomorrow. Dr. George E. Condra of Lincoln, Neb., presided at the meeting. The commissioners reported what has been done in their States since the White House conference, and discussed ideas and plans for extending the scope of their work.

LOW PRICES THERE

Go to Antioch if You Would Escape the High Cost of Living

"The cheapest place in the world is Antioch, in Syria," said a returned traveler. "Being on the Mediterranean the climate is just right in the colder months. I once passed a winter there, and all it cost me was \$5.00 a week, though I rented a fine house and kept three servants. For the house I paid \$5.00 a month rent, while the servants were satisfied with 50c a week. Mutton cost there 1c a pound. Eggs were 2c a dozen, and chickens 5c each. The finest of fresh fruit and vegetables (in February, too) were so cheap that they were not sold in quantity. You got all you wanted for so much per week. All I required for my household cost me 25c weekly. An American resident of Antioch told me that he and his family lived comfortably on \$175 a year."

Apply Zam-Buk to all wounds and sores and you will be surprised how quickly it stops the smarting and brings ease. It covers the wound with a layer of protective balm, kills all poison germs already in the wound, and prevents others entering. Its rich healing herbal essences then build up from the bottom, fresh tissues and in a wonderfully short time the wound is healed!

Zam-Buk's popularity is based on merit. Imitations never work cures. Be sure and get the real thing. "Zam-Buk" is printed on every packet of the genuine. Refuse all others, 50c all druggists and stores or Zam-Buk Co., Toronto.

# ZAM-BUK

## CANADA DO WHAT DENMARK HAS DONE?

Toronto, Nov. 15.—"The creed of a Canadian Imperialist" was the subject up for discussion before the University Liberal Club last night. Mr. Arthur Hawkes delivered the principal speech. Hugh G. McLaughlin, President of the club, acted as Chairman.

"What has made the British Empire the political miracle of the ancient and modern world?" asked Mr. Hawkes. It is that men and women have gone out from a small country and taken possession of the great, empty, untamed spaces of the earth, and have planted and reared and expanded and ennobled institutions whose motive powers are the same as those which produced Magna Charta, the Petition of Right and the Instrument of Government, which, for the first time fixed the salary of the Monarch as a yearly sum, renewable, reducible or increasable at the pleasure of his subjects.

"The Highland family which came to the shores of Lake Ontario hewed a home out of the forest, and made this territory what it is today, performed a vastly more Imperial work than any of those who stayed in England where their fathers had stayed for centuries, exploiting the toil of those who tilled the ground and talking about their right to govern the earth on that account."

Referring to the naval question Mr. Hawkes said:

"Would there have been a Canadian navy if Canada had been alone on the national track? There would, unless the Canadian people had been so craven as to want to live in the costless shelter of the United States. Are we to assume that Canada can't do what Denmark does? Denmark, with a population a little less than that of Ontario, has four thousand Danes in her navy. She could not do much against the navy of a nation twenty times as large as herself that had determined to gobble them up. But her men would go down fighting in defence of what they hold most dear."

Following Mr. Hawkes, short speeches were made by Mr. Wilcott, Mr. Hill and Mr. Beaton.

## Notes from the Rural Districts

KINGSLEY

Nov. 14.—The weather this last week is a lot milder again which gives the farmers a chance to get the rest of their vegetables out of the ground.

Quite a number of the farmers lost considerable lot of potatoes by that cold spell coming so suddenly that they were frozen in the ground.

Service was held in the Baptist church on Sunday afternoon by the Rev. Mr. Daggett, Fredericton.

Miss Alice McFarlane who has been visiting friends at Plaster Rock has returned home.

Our school is progressing rapidly under the skilful management of Miss Iona Evan's.

The many friends of Mr. Daniel Seymour are very sorry to hear of his sickness.

SPRINGFIELD

Springfield, Nov. 13.—Mr. Coburn Moore of Middle Hainesville, while hunting in this place shot a moose with a spread of fifty eight inches.

A number of the farmers are hauling potatoes to different sections for sale.

Mr. Larry Hersey is laid up with a very lame wrist, and is not able to do any work.

Mrs. Grace McGuire and Miss Alice Macdonald spent a week visiting at the Macdonalds.

Our first snow appeared yesterday. As flocks of wild geese are seen going over we expect more.

Mrs. Joseph Graham has gone to Fredericton to spend a week. Mr. Pickard is driving the mail.

## SIGNIFICANT NAMES

There is a Marked Difference in Place Names in Ontario and Quebec

The place names of Ontario and Quebec eloquently reflect the historical background of the respective peoples. Journey through Ontario and you are confronted with names of counties, townships, towns and villages lifted almost bodily from England, as in Middlesex, Lincoln or York. Go through Quebec and we meet the names of French Kings, Governors and explorers, not to speak of innumerable saints held in close reverence by a devoted people. In Ontario we find in the nomenclature a solemn march of heroes, Governors, poets, philanthropists, statesmen, discoverers and martyrs, connected with the expansion or glory of England, such as Sir Isaac Brock, Sir Guy Carleton, General Haldimand, Governor Hamilton, Governor Hope, General Prescott, the Duke of Richmond, Lords Durham, Sydenham and Aylmer, Governor Simcoe, Sir Charles Bagot, Hilton, Collingwood, Wellington, Nelson, Raleigh, Hampden, Palmerston, Pitt, Harvey, Franklin, Wilberforce, and Macaulay, with such reminders of victory as Blenheim, Trafalgar, Vincent, Waterloo and Sebastopol.

In Quebec how different are the scenes called up by the names of cities, rivers, counties and parishes: Champlain, after the founder of Quebec; Chicoutimi, the first French Viceroy; Montmagny, who succeeded Champlain. Two officers of the Carignan regiment, St. Louis and Richelieu, perpetrate the name of Monarch of France and his long-trusted Minister; Frontenac, Vaudreuil, and Beauharnois were three of the most able and energetic of the French Governors of Canada, while Bishop Laval, Cardinal Richelieu, Charlevoix, and other celebrities are similarly remembered. As to the names of saints, the calendar and Acta Sanctorum seem to have been ransacked, and not even the most obscure result of canonization overlooked.

## EMPIRE BUILDERS

Such Are Poets Whether of Words or of the Axe and Pick

Like the Greeks who made no distinction between thinking and doing, we who speak the English tongue were above all a practical people, who loved being and doing and the strong, free life, said Mr. F. R. Benson, the great interpreter of Shakespeare's dramas.

A transcontinental railway builder was a poet, not of words but in vision, leader of a band who carved out empire, not "writing his sorrows on the bosom of earth, making dust his paper," but in terms of pick and ax and dredge, in tunnel and train, wedding east and west. He was one who could identify himself with the living principle of all things, who saw the relation between the particular and the universal, surely a practical man for our generation, and all generations to come, and that was the meaning of poet. A concrete example was given at the Stratford-Upon-Avon festival, where people were joined in a mighty realization of the brotherhood of man, not in the pink-blooded terms of the copybook heads, but with the vital intensification of national feeling and patriotism. Mr. Benson had a vision of a great empire of English-speaking people, of which Shakespeare's drama would be one of the chief links.

In a time of strikes, a striker told him how at Shakespeare's shrine he had gathered a sense of the harmony of life, and had seen the due relation of things. He added: "Shakespeare has shown me a better way than dynamite." Another man had prayed God's blessing on the Stratford Theatre. "It has shown me in Shakespeare's plays how we British became what we are, and how we may keep so."

## INDIAN BREWERIES

A Mounted Policeman Found Many of These in the Far North

One of the mounted Canadian police, who patrol great stretches of almost uninhabited land in the northwest, discovered a band of Indians, who had breweries and were making "fire water" constantly for their own use, east of the Hay River, and 600 miles from civilization. The Hay River is a thin black line running through the white terra incognita south of the Great Slave Lake.

The patrolman made a personal investigation and found a happy lot of Indians among whom "fire water" was quite as common as it used to be down in Kentucky. He found that nearly every "buck" was the proprietor of a "brewery," and that life south of the Great Slave Lake was one long and joyous spree.

A strange white man had sold the secret of making "fire water" to the Indians, and they were making a "brew" of potatoes, hops, sugar and yeast, which, when allowed to ferment, was strong enough to cause intoxication. During the warm summer months the Indians raised potatoes for this brew, but in scarcely any instance could they be persuaded to grow anything for food.

## Hotel Don'ts

Don't carry a big roll—there's a safe in the office if you must carry a roll. Don't fold big yellow-backs outside little green-backs.

Don't fancy hip pockets are safe as a bank.

Don't think watches won't go if worn loose on a fob.

Don't get the notion you're as swift as an auto.

Don't allow strangers to persuade you they're old friends.

Don't take it for granted your coat is well tethered.

## THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girls! Try it! Your Hair Gets Soft, Fluffy and Luxuriant at Once

If you care for heavy hair, that glistens with beauty and is radiant with life; has an incomparable softness and is fluffy and lustrous, try Danderine.

Just one application doubles the beauty of your hair, besides it immediately dissolves every particle of dandruff; you cannot have nice, heavy healthy hair if you have dandruff. This destructive scurf robs the hair of its lustre, its strength and its very life and if not overcome it produces a feverishness and itching of the scalp the hair roots famish, loosen and die, then the hair falls out fast.

If your hair has been neglected and is thin, faded, dry, scraggy or too oily, get a 25 cent bottle of Knowlton's Danderine at any drug store or toilet counter; apply a little as directed and ten minutes after you will say this was the best investment you ever made.

We sincerely believe, regardless of ever thing else advertised, that if you desire soft, lustrous, beautiful hair and lots of it—no dandruff—no itching scalp and no more falling hair—you must use Knowlton's Danderine. If eventually—why not now?

## Sawdust Bread

There is a bakery in Germany that turns out 20,000 loaves of sawdust bread daily and finds a ready market for this output. Although this "wooden bread" is intended for consumption for horses only, it is claimed by the manufacturer that in case of famine it would furnish a nutritious and highly satisfactory food for human beings. The sawdust is first subjected to a process of fermentation and various chemical manipulation, and is mixed with one-third part of rye flour. It is then formed into loaves and baked in an oven like any other bread.

## Death Toll of Workmen

United States records show that every hour 232 workmen are killed or injured; that every 15 minutes a workman is killed; that every 16 seconds a workman is injured. Every year 2,035,000 workmen are killed or injured.

## Two Doctors Said He Had Consumption.

DR. WOOD'S NORWAY PINE SYRUP CURED HIM.

Mrs. John Eliff, St. John's West, Ont., writes:—"My little boy was very bad with whooping cough and severe cold. I went to two doctors with him, and they said he had Consumption. I could get no relief for him, he would cough all night long, with a dry hacking cough."

I was persuaded to try Dr. Wood's Norway Pine Syrup, and was surprised to see the first bottle did him good. I have had five bottles, and they cured him, he rests well at night now, and is well and hearty. If he gets a cold we always give him Pine Syrup and he is soon better. I did not think I could raise him, but I am thankful to say Dr. Wood's Norway Pine Syrup saved him from being a consumptive."

Too much stress cannot be laid upon the admonition to all persons affected by the earlier stages of throat and lung trouble, as failure to take hold at once will cause many years of suffering, and in the end that terrible scourge "Consumption."

Dr. Wood's Norway Pine Syrup is without an equal for all affections of the Throat and Lungs.

Price, 25 and 50 cents. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

## The Reversible Falls

The notion of water falling uphill is against our preconceived ideas of gravity. It may, it is true, be induced to climb with the aid of a pump or water-tower; but, short of these aids, it always finds the descent easier. Yet it certainly falls uphill, in full view of the suspension bridge just over the St. John River, New Brunswick, twice in twenty-four hours. A visitor who goes on the bridge just before low water, after a short interval of slack tide, will actually see the falls going the wrong way! The Bay of Fundy drives the proud St. John, famed for its lumber and its salmon, back into the forest of New Brunswick, and the spectator has no difficulty in realizing the simple principle of force majeure which brings about this seemingly unnatural result.
