CONCERNING PLANETS.

The fanciful account of the discovery of a far away planet as recently given by a travelling evangelist in one of our city churches calls to mind the real story which perhaps may be told with interest and profit to many who are not familiar with it. Our immediate neighbors in the measureless space which surrounds this tiny globe of ours are the sun, himself a small star, and several bodies more or less similar to ourselves which like this earth revolve in annual motions about the sun. They too, like the earth have their daily motions about the sun. They too, like the earth have their daily motion on their own axis and are attended by moons which swing around their mother planets as does our moon about us.

Between the sun and ourselves are two planets, Mercury, a little fellow seen with difficulty because he is so close to the sun, and Venus, the most brilliant of the star bodies, at present seen in early evening near the western horizon. Venus has phases like the moon and if observed now through even a low power telescope will be seen to be crescent shaped like a moon in its first quarter. Beyond us in going away from the sun is Mars, at present a long way from the earth and showing like a little red star not far from Venus. Next in the visible planets is Jupiter the largest of them all having four moons, and at present a brilliant orb in the south eastern sky. Then a few degrees below it comes Saturn the planet with the rings. These rings however cannot be seen without the aid of the telescope.

For many centuries man believed that there were no more planets beyond Saturn and it was not until 1781 that Sir William Herschel in sweeping the sky with a powerful telescope discovered a little fellow with an appearance different from the surrounding stars. The latter are not magnified when viewed through a telescope on account of their immense distance from the earth, while the planets are enlarged on account of their comparative proximity to us although they are many millions of miles away. He noticed that this little star had a disc, also from continued observations that it changed its place in relation to other stars around, and although he at first thought the little body a comet he was not long in concluding that this was indeed a newly discovered planet. He named it Georgium Sidus after his royal patron George III, but the name did not stick and we now know it as the planet Uranus.

Between Mars and Jupiter in the year 1801 a miniature planet was discovered and given the name of Ceres. Since then and up until the present day some hundreds of these midgit worlds, many of them only a few miles in diameter have been observed and named but that it another story and not what we started out to tell.

The real story is about another planet beyond Uranus, the position of which was calculated before it was seen by mortal eye. For many years after the discovery of Uranus by Herschel, astronomers were much perplexed when it was found that this planet was not uprushing the path laid out for it from their calculations. It was finally suggested that this was caused by the influence of an unseen planet. In the year 1843 Mr. J. C. Adams a young Cambridge University man attacked the problem and in the autumn of 1845 had completed his calculations for the supposed position of the planet. He handed this information to Airy the Astronomer Royal in order that the planet might actually be located by observation but Airy was dilatory and put the paper aside. In the meantime Mr. U. J. J. Leverrier, a Frenchman had also undertaken the problem and in August 1846 had arrived at practically the same results as Adams. An Astronomer, Professor Challis, knowing this started his search at the Cambridge observatory while Leverrier asked his friend Dr. Galle of Berlin Observatory to do the same for him. Fortune favored Leverrier in the fact that a new star map had recently been issued in Germany but had not yet reached England and by the aid of this map inside of half an hour Dr. Galle found the new planet Neptune. It was afterwards shown that Adams had actually worked out the location of the planet several months before Leverrier and that the planet had been actually seen at Cambridge although not identified before it was seen at Berlin nevertheless much of the credit for the discovery has been popularly given to Leverrier.

It was really too bad that our friend from Massachusetts found it

necessary to send Mr. Herschel to the Lick Observatory in California to find that planet.

The proposal to shorten the hunting season in New Brunswick by having it open on October 1st, instead of on September 15th will be strongly opposed by the registered guides and not without some reason. September is a most delightful month in the woods of New Brunswick, and non-resident sportsmen who come for the outing and not for the sake of slaughtering game, naturally prefer that month. They can do some fishing in September and can also take photos of live game, but in October the conditions for this kind of sport are not so favorable. Many sportsmen who formerly hunted in New Brunswick now go to Quebec and Newfoundland and if the season is shortened more will be very apt to do so. There are many who think that if the Legislature should decide to cut off two weeks at the beginning of the season it should make the season end on December 15th instead of November 30th.

The Federal Government is expected to muster up sufficient courage today to issue the writ for the by-election in York-Sunbury. Saturday, May 21, is said to be the date agreed upon. Possibly with the announcement of the date of the election may come the news that Hon. A. R. Slipp, K. C., of this city has been appointed a Judge of the County Court.

Hon. Mr. Robinson has a bill before the Legislature which will make some important amendments to the law for the prevention of forest fires. The public domain the chief reason and it is of the utmost importance that every precaution should be taken to prevent waste by fire. The hearty co-operation of all the people in this work should be cheerfully given.

The resolution calling for a plebiscite on the importation of intoxicating liquor into the province will come up for discussion in the Legislature on Tuesday. The indications are that the resolution will carry and that the Dominion authorities will take the plebiscite some time during the coming summer.

Two of the members for York the ancient Mr. Pinder, and the youthful Mr. Richards had their pictures in the local graft organ this week. Being a veteran in the political game it is safe to say that there was no sight draft accompaniment in the case of Mr. Pinder.

THROUGH OUR SIEVE

Still-man—and still another woman
 If women's blouses were sold by weight they would be cheap.

Sweating to pay an indemnity will help Germany get the war fever out of her system.

Farmers want God's time. As we remember God's time, you followed your shadow to dinner.

The thermometer is simply taking limbering exercise to get in trim for a high-jump record.

Mention is made of the man who sold his wife for a lot valued at \$500. Well, real estate is stationary.

Who remembers when a sensational drop in the price of eggs brought them down to twenty cents a dozen?

An optimistic girl is one who buys a box of silk stockings with cotton tops. She doesn't think skirts will be any shorter.

After hearing a woman's scream when she sees a mouse, one wonders what kind of a scream would result if she saw a burglar.

"A genius is needed," remarked the Man on the Car, "to invent a factory whistle that sounds as sweet in the morning as the whistle that blows at night."

SOOTHES IRRITABLE THROAT,
 RELIEVES BRONCHITIS QUICKLY

No Drugs to Take. No Medicine to Upset the Stomach—Just Breathe "Catarrhazone."

Count ten—a bad cold is relieved by Catarrhazone; wait one minute and you will find its soothing influence on a sore irritated throat. No failure with "Catarrhazone"—it is effective because you can breathe a healing vapor to the very spot that needs help. The big thing to remember about Catarrhazone is this—you just breathe a healing piney vapor that is full of the purest balsams, that is rich in the greatest healing agents known to science. This wonderful vapor dispels all sureness, kills all germs, gives nature a chance to completely destroy the disease. Colds and throat troubles cannot last if the pure healing vapor of Catarrhazone is breathed. Catarrh will disappear, bronchial attacks will cease, coughs and winter ills will become a thing of the past. Complete outfit lasts two months, price \$1.00; smaller size 50c.; sample size 25c., all dealers or the Catarrhazone Co., Montreal.

CHURCH SERVICES

St. Paul's Presbyterian.
 Rev. J. S. Sutherland, D. D., minister. Services at 11 a. m. and 7 p. m. Sunday school at 2.30 p. m. All are welcome.

Methodist Church.
 Rev. Geo. M. Young, pastor. Services at 11 a. m. and 7 p. m. The pastor will preach. Sunday school at 2.30 p. m. Lecture by Major Clark, M. C., Monday at 8 p. m. "Siberia and the Russian Problem."

DIET NOT EVERYTHING IN KEEPING HEALTHY

Your table may be loaded with food digestible and wholesome, yet you can't get strong. What's the trouble? The liver is lazy, stomach is overloaded, the bowels are not active. Relief is quickly supplied by Dr. Hamilton's Pills. They make weak, sickly people strong and well because they keep the system clear of impurities. Those who regulate the system with Dr. Hamilton's Pills don't have indigestion or constipated headaches, they feel enlivened all over, because their system is kept in smooth running order. To revitalize and stimulate your whole being, to shake off lethargy and tiredness, nothing compares with Dr. Hamilton's Pills, which certainly bring good looks, good spirits, good health. 25c., all dealers, or The Catarrhazone Co., Montreal.

FISH DINNERS POPULAR

Served at Reasonable Prices on "National" Trains.

According to officials of Canadian National Railways, the delicious fresh fish for which the Maritime Provinces are noted is becoming a very popular item of diet with the public while travelling through the Provinces by the Sea. So popular, that on January 24th it was decided to serve "Special Fish Dinners" on the Maritime Province Dining Cars.

These dinners are served at 75c. per order and include a liberal portion of fish with boiled potatoes and bread and butter. From January 24th, the day of their inauguration on the menu, until February 15th, 1,492 fish dinners were served and officials of the railway state that they are in as great demand as ever.

Miss Dot Gremley left yesterday for her home in Newcastle to spend a few days.

PROBATE COURT, COUNTY OF YORK

To the devisees, legatees and creditors of Exca Lehr, late of the City of Fredericton, in the County of York, Spinster, deceased, and to all others whom it may concern.

Dated this 1st day of April, A. D. 1921.
 A. A. STERLING, Principal Assessor.

Anticipating Every Need For SPRING SEWING

Spring Sewing Week has as its aim, inspiration to women who have their sewing done in the home.

The Store looks forward each year to assembling fabrics, trimmings and every other essential to Spring sewing along with timely style suggestions for creating all sorts of lovely things right in the home. The season of tubables is practically in sight. Blouses, lingerie, children's school clothes, new spring suits and frocks will soon be urgently needed. With this store's many available resources at hand every woman has a storehouse of ideas at her command. Moderate prices in all fabrics do much to revive interest in the making of pretty things.

SILKS

Printed silks and plain crepes are here in gay colorful array, simply waiting to be chosen for blouses, frocks and linings.

WOOLENS

Pique twill, twill cord and pique are much in demand for suits, while peruvia, velours, duvetyne, and orlando make smart wraps.

COTTONS

A glimpse of the new tubables and you will want to start making new frocks of gingham, organdie, and Swiss immediately.

PATTERNS

With one of this Store's reliable patterns as your trusty guide, nothing becomes too great a task in the field of sewing.

TRIMMINGS

Upholstery braid is one of fashion's latest whims for trimming new cloth frocks—but just one—there are others just as delightful.

NOTIONS

Half the battle is won if one attacks Spring sewing well supplied with needles, pins, snappers, buttons, thread and all the rest.

John J. Weddall & Son

FARM and FIELD FENCE 7 Line Fence 48in. High

A Strong Fence, heavy enough for general purposes, and easy to erect.

Price, Freight Paid per rod 71c. Also in stock, Barb Wire, Plain Wire, Wire Staples, etc.

R. CHESTNUT & SONS, Ltd.

53,000 Square Feet of Floor Space in Use Supplying

"CHESTNUT'S HARDWARE SERVICE."

During January, February and March our store will close at 6 p. m. Saturday evenings.

SEEDS For the Best Crops You Ever Grew.

Every square inch of backyard garden this year can be made to produce.

We sell seeds in packages for flowers and vegetables.

Cut down the high cost of living by having your own garden.

STAPLES' PHARMACY

ALONZO STAPLES, Prop.

While it is announced that the ships of the Canadian Mercantile Marine earned a profit of about a million dollars last year over operating expenses there was no return on the investment and no account has been taken of depreciation. Most of the ships were built during war time when prices were at the top notch and it is said that there has been a depreciation of at least fifty per cent. Ocean freights are now away down and going lower and it is beginning to look as if in its Mercantile Marine Canada has another white elephant in her hands.

GAIETY TODAY and SATURDAY

JACK PICKFORD in

"Just Out of College"

You must not miss this George Ade story of a young man who had to win a fortune in twenty days or lose the girl he loved. It sparkles with humor and is superbly acted. It is the topnotch laugh picture of the screen year.
