## Advertising is News

WITHOUT ADVERTISEMENTS this paper would not be as interesting to you, because the information about goods for sale in the stores is news—just that.

Many people read newspapers as much for their advertising columns as they do for other news.

This is particularly true at this time of the year.

Stores are now advertising Spring Wearing Apparel and a host of things that are bought for household use, incident to spring cleaning.

Think of the money that will be spent by women for spring clothing. The new frocks, hats, shoes, lingerie, corsets, gloves, sweaters, neckwear, light wraps and blouses that will be bought.

The same is true of men's buying. Think of the suits, light top coats, hats, shirts, collars, ties, gloves, socks, shoes—the sporting goods and the incidental wearing apparel bought for golf, tennis and so on.

Think of the new things that will be bought for spring cleaning and home convenience at this time. The vacuum cleaners, carpet sweepers, brooms, gas and electric heaters, ranges, washing machines, paints, varnishes, floor wax, cleansing fluids, curtains, upholstery, garden and porch furniture, lawn mowers, garden tools, etc.

Think of the lighter foods coming into use. Cereals, fruits, salads.

All these new demands are incident to the changing season, and they all are Trade Stimulating.

People feel livelier at this time and consequently loosen up their purse strings.

The opportunity for local merchants to get over effective Local Advertising News at this time is so evident that it needs no emphasis.

LEAGUE LEADERS BATTING BETTER  
BUT STILL ARE POOREST BATTING  
TEAM OF YORK COUNTY LEAGUE

C. Seely, New Y. M. C. A. Second Sacker, Has Highest Percentage but Fred McLean Still is Real Leader of the League—J. Bolster Climbed Rapidly—Devon Formidable With the Stick.

The York County Baseball League finished another week with some changes in the batting averages. The five games played gave many players a chance to climb somewhat and others slipped backwards. Fred McLean of the Imperials still holds his position as the real leader of the league batters although C. Seely the new second baseman of the Y.M.C.A. has a higher percentage for the few games he has played. Following Fred McLean come three Devon men the Devon team in spite of occupying the cellar position, wielding the willow with great effect. If team batting would do the trick all alone Devon would be heading the league. The two Keenes who have been batting well all season are still high in the list but Jack Bolster has come wonderfully also. Burke and Donovan of the Y.M.C.A. are still sticking close to gether and are batting steadily. Kierstead of the Y.M.C.A. has joined them, Sloat of Marysville although having a bad week still is the best batter of his team. Davis is another Y.M.C.A. player who has improved his position in the list. Fraser and Coyle of the Imps are both in the .300 class now doing better work with the stick. McDonald now permanently with Devon has dropped from the high position which he held at first but in spite of that is batting well.

## Marysville Improves.

The league leaders, Marysville, improved generally in batting, but even with the improvement it is the weakest batting team of the league. The members of the club are now batting more together than they were before. If the other clubs should take to batting the Marysville pitchers and the Marysville batters not do better than they have, a change in the league standing should take place.

## Y. M. C. A. Closer Together.

In batting the Y.M.C.A. does not look quite as good as it did last week but the club is strong with the stick in fact is the best batting club of the league. Its members are batting closer together as far as averages go.

Devon last week batted about as it had the week before and has a strong batting team. Jack Bolster and the two Keenes make a formidable "big end" in the batting order.

Imperials are showing better with the bat, Fraser improved last week and so did Currie and Wandless. This club should be heard from later in the season.

The average are:—
