TOBACCO CULTURE ON PACIFIC COAST

Splendid Results Achieved by Irrigation Methods in the Okanagan Valley of British Columbia

That tobacco culture is fast assuming the importance of a national Canadian enterprise is a fact appreciated by but a small proportion of the citizens of this country. For many years when Canadian tobacco was spoken of one immediately thought of the crudely cured French Canadian Twist, one pipe full of which was liable to leave lifelong impressions, but to-day not only has Quebec-grown tobacco been brought to superior quality but the countries of Essex and Kent in Ontario produce annually in the neighborhood of 15,000,000 pounds of tobacco, which find a ready market in a popular brand of cigars, pipe and chewing tobacco.

But now British Columbia looms upon the horizon as a producer of tobacco of a most superior quality. Fifteen years ago in the Okanagan Valley it was first attempted but with varying success. Seven years ago a local company formed at Kelowna putting in 50 to 70 acres, and so successful was this company in growing a superior leaf that it has given impetus to a new commercial product which will in a short time become one of vital importance to the Rocky Mountain Province.

Leaf for cigar purposes constitutes the principal crop, the varieties being Cuban or Havana, Comstock Spanish, Wisconsin and Sumatra. There is money in growing tobacco. A good average crop of Havana runs to about a thousand pounds per acre, worth say 25 cents a pound to the producer. Wisconsin and Comstock Spanish yield heavier, fourteen to eighteen hundred pounds per acre, and bring the producer from 15 cents to 20 cents a pound. This would make a range of profits average from \$125 to \$175 an acre.

No fertilizer is yet required in the growing of tobacco in British Columbia, but irrigation plays an important part. This irrigation is of the simplest kind, however, and presents few difficulties. One irrigation has proved to be sufficient, and is generally done at a season when water is most plentiful. The field is thoroughly soaked before planting begins, and with careful cultivation there is then sufficient moisture stored in the soil to last the tobacco plants during their growing season.

WINSTON SPENCER CHURCH- HILL IS 39 TODAY

Lundon, Nov. 29.—The Rt. Hon. Winston Spencer Churchill, First Lord of the Admiralty and one of the most conspicuous among the younger men in British public life, will enter upon his fortieth year tomorrow, having been born Nov. 30, 1874. He is the son of the late Lord Randolph Churchill, one of the most brilliant men of his day. His mother was Miss Jennie Jerome of New York. After the death of her first husband Lady Randolph Churchill married George Cornwallis-West, from whom she has just obtained a legal separation.

TO TRY FATHER AND SON FOR MURDER

Marion, Ind., Dec. 1.—The case of William W. Brown, township trustee of Ingalls, charged with the murder of Albert Hawkins, a constable of Anderson, was called for trial in the Grant county circuit court today. The case was brought here on change of venue from Madison county.

The killing of Hawkins occurred in the town of Ingalls on the night of July 9 last. The tragedy was one of the direct results of a reign of "blind tigers" at Ingalls. Some time previously Constable Hawkins had raided a hotel conducted by Brown and his son, George William Brown. On the date of the killing he had returned to the hotel to obtain further evidence desired by the prosecution. Witnesses heard a violent altercation between the constable and the Browns. Later the same night the body of the constable was found in the street a short distance from the hotel.

The following day a younger Brown surrendered to the authorities and stated that he had stabbed Hawkins in self defense. The elder Brown asserted that he had nothing more to do with the killing than being with his son at the time. The grand jury, however, returned a joint indictment accusing the father and son of the murder. The defendants asked for separate trials and the elder Brown elected to be tried first. Both of the accused have been in jail since the night of the murder.

FARMING IN THE NORTH

The Upper Mackenzie Valley Can Probably be Tilled

No. 1 hard wheat, grown 800 miles north of Edmonton, prize vegetables raised on the Arctic Circle, and spruce trees six feet in diameter, are some of the wonders of the Northern Territories which Mr. Henry A. Conroy, Inspector of Indian Agencies, saw on a northern inspection tour.

Known officially as "Treaty No. 8," the territory over which Mr. Conroy exercises supervision is inhabited by about 8,000 Indians. Once a year Inspector Conroy visits the 18 agencies located in Treaty 8, and distributes to the Indians about \$35,000 in money and several thousand dollars' worth of food, ammunition, fishing nets, and other necessities of aboriginal life.

"Our agent there experimented with three varieties of wheat, the yields from which were taken down to Edmonton and graded No. 1 hard," said Mr. Conroy. "He grew also 300 bushels of oats. They weighed 38 pounds to the bushel. Rye and barley were also successfully grown."

"The very best gardens I saw on the whole route are at Fort Good Hope, still further north. In the upper Mackenzie Valley there is a country as large as Manitoba and every bit of it fit for settlement."

The Largest Chrysanthemum

There seems to be almost no limit to the size of fruit and flowers that plant-breeders can produce. They have doubled or trebled the size of some of the common vegetables, and many of the flowers that fill the florists' shops, but in no case, perhaps, have they accomplished more remarkable results than in that of the chrysanthemum. By removing all the flower-buds except the terminal they have produced the large globular heads with which we are all familiar. A French amateur succeeded in winning a prize for the largest chrysanthemum, with a flower that measured more than 64 inches in circumference. That is many times the size of the original flowerhead. What will happen when the same methods are applied to tomatoes, cherries and other fruits and vegetables?—Horticulture.

Reading to Workmen

In a Toronto cigar factory where nearly all of the thirty-five cigar makers are Cubans, a curious custom is observed—that of having a man read aloud all day long to the workers. He reads the daily newspapers in the mornings and usually a novel in the afternoon. The firm pays his salary and is glad to do it for it makes the men contented and does not interfere with their work which goes on quite as well when their thoughts are miles away from it. In Cuba nearly all the cigar factories employ readers.

Two Doctors Said He Had Consumption.

**DR. WOOD'S
NORWAY PINE SYRUP
CURED HIM.**

Mrs. John Eliff, St. John's West, Ont., writes:—"My little boy was very bad with whooping cough and severe cold. I went to two doctors with him, and they said he had Consumption. I could get no relief for him, he would cough all night long, with a dry hacking cough."

I was persuaded to try Dr. Wood's Norway Pine Syrup, and was surprised to see the first bottle did him good. I have had five bottles, and they cured him, he rests well at night now, and is well and hearty. If he gets a cold we always give him Pine Syrup and he is soon better. I did not think I could raise him, but I am thankful to say Dr. Wood's Norway Pine Syrup saved him from being a consumptive."

Too much stress cannot be laid upon the admonition to all persons affected by the earlier stages of throat and lung trouble, as failure to take hold at once will cause many years of suffering, and in the end that terrible scourge "Consumption."

Dr. Wood's Norway Pine Syrup is without an equal for all affections of the Throat and Lungs.

Price, 25 and 50 cents.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Electric Restorer for Men
