

HON. MR. FIELDING ON THE NAVAL QUESTION

Montreal, Nov. 6.—A cable from London to The Daily Telegraph today says:

"Hon. W. S. Fielding, former Finance Minister of Canada, writing today in The Morning Post on the letters of Richard Jebb, Admiral Sir G. R. Fremantle, who urged the Admiralty to drop the policy of colonial contribution, says:—

"Canadian Liberals will rejoice to find their views practically endorsed by such high authorities. It was natural that at first the Englishmen should hurrah for those who offered a gift of seven million pounds and to assume that Canadians who questioned the policy were lacking in pa-

triotism and loyalty, but light is dawning.

"Recent discussion shows the principle of local control, for which Canadian Liberals contend, is supported by Australia, and now New Zealand is taking the same position. Canadian Liberals sincerely believe the contribution policy does not advance the cause of Imperialism, but rather checks sane Imperialism. The Admiralty and the Canadian Government can yet reconsider their action and return to the policy of the resolutions unanimously adopted in 1909.

"Referring to a remark of Admiral Fremantle's about the neutrality of Canada in the time of war, Mr. Field-

ing says:—

"There has been much misconception, to use no stronger word, as to Sir Wilfrid Laurier's position on that point. Sir Wilfrid knows that no part of the Empire can be neutral when Great Britain is at war. But England has, under the constitution, no power to decide what Canada shall do. Only the Canadian Government and Parliament can decide when, in what manner, and at what cost Canada shall aid the mother country in such a crisis. The aid given by Canada to South Africa was all the more valuable because it was entirely voluntary. Sir Wilfrid Laurier and Canadian Liberals only ask that the rights which Canada enjoys will remain unimpaired, but no one who knows of Canada's part in the South African war, no one who knows the loyal sentiments of the Canadian people, can doubt that if at any time Great Britain should become involved in a war with any of the great powers Canada would spring to her aid and be ready to make any sacrifice of blood or treasure that might be necessary for the maintenance of the honor or the interests of the Empire."

HAD INDIGESTION.

Almost Despaired of Ever
Getting Well.

When your food has not been properly digested, your body has not received the benefit it should. The exertions of the gastric juice have been confined entirely to removing the unassimilated, undigested portions of food, which they cannot properly digest as speedily as possible from the body, therefore only giving the blood a small percentage of nourishment with which to feed the tissues. No wonder then that Indigestion and Dyspepsia attack the stomach. No medicine can surpass Burdock Blood Bitters as a cure for this particular disease. It regulates the bowels, promotes perfect digestion, makes pure blood, tones the stomach, and thus restores perfect health to the debilitated system.

Mrs. Mary MacKay, Hunter's Mountain, N.S., writes:—"I was troubled with Indigestion for more than ten years. I tried several Doctor's medicines claiming the power to cure, but all without success. Having heard of the many cures effected by Burdock Blood Bitters, I decided to give it a trial. After taking two bottles I was completely cured. My appetite which was very poor, is now good, and I can eat most everything without any disagreeable feelings. I can strongly recommend B.B.B. to anyone suffering from Indigestion."

DIGGING FOR FOXES

Alaskans Dig Not Only Gold But Foxes
Out of the Ground

Gold is not the only valuable thing which Alaskans dig out of the ground. As a matter of fact, those who dig solely for something else have been more fortunate financially. They dig for foxes.

Strange as this may seem to most folks, it is the plain truth. Before the fox pups are old enough to leave their dams white and Indian trappers dig into their holes and capture them. The live little foxes are more profitable than the furs taken from grown animals.

A steamship of the Canadian Pacific Company arrived at Vancouver from Skagway with 126 cub foxes, valued at \$100,000, or nearly \$800 apiece on the average. The owner brought them for fox farms which were established in several Eastern states and in New Brunswick and Prince Edward Island. One special lot of ten young black foxes was sold to a New York firm for \$30,000.

Even more valuable than the black fox is the silver grey of Alaska. There is practically no limit to the price of its fur. A Montreal firm sold for \$7,000 a boa and small muffs of silver fox, and it was called by experts a "bargain price."

Within the necessity limits of demand for an article of luxury purely, it is evident that digging for foxes is more profitable than digging for gold. Also there is greater certainty of return for the effort.

The Miner's Inch

On the Pacific coast, the unit for measuring water in mining is known as the miner's inch. This varies greatly in different localities, and is now generally defined by legislative enactment. In British Columbia, under the Water Clauses Consolidation Act, a miner's inch is declared to be a flow of water equal to 1.68 cubic feet per minute. Therefore, a miner's inch is equal to .028 cubic feet per second, and 1 cubic foot per second is equal to 35.71 miner's inches, approximately.

Volcano Growing Smaller

Professor Ricco states that the crest of Mt. Etna has lowered sixty-five feet on the south since 1868, and almost twice as much on the north. It is supposed that the top has been slowly blown away by the wind.

Girl barbers are growing in popularity in London and there is an increasing demand for them.

Teachers in Ontario receive a subsidy of \$30 per year if they maintain a school garden.

If you are doing a local business talk over your advertising problems with the Advertising Department of this newspaper.

If you are doing a provincial or national business it would be well for you to have the counsel and assistance of a good advertising agency. A list of these will be furnished, without cost or obligation, by the Secretary of Canadian Press Association, Room 503, Lumsden Building, Toronto.

Advertisements have been well called "The Poor Man's University," but other than poor men have been schooled thereby.

Much of what the average individual knows concerning personal and domestic hygiene, modern office methods, books and authors, electricity, precious stones, investments, and almost everything else, he has learned from advertisements.

Advertisements have stimulated our intelligence, added enormously to our knowledge, and given us aspirations which have raised us to higher levels of thinking and living. Advertising is indeed "The Poor Man's University."
