Telephone in the Clouds

A telephone-exchange three miles in the air! This station, said to be the highest in the world, is in the meteorological observatory on the top of Mount Rosa, in the Pennine Alps, 15,450 feet above sea-level. At this elevation snow is always found, and advantage is taken of the high insulation given by dry snow, the wires in the last section, at the peak, being simply laid on the snow-covered

COULDN'T BREATHE THROUGH HIS NOSE STUFFED WITH CATARRH

Catarrhozone Inhaler The One Means of Relief, and it Cured Quickly

The extraordinary efficacy of Catarrhozone is without a parallel. A sneezing cold is cured in ten minutes, a harsh cough is eased in an hour, the most offensive catarrh is thoroughly drawn from the system. In case of asthma and bronchitis the relief and certain cure that comes from the healing balsamic extracts in Catarrhozone is simply wonderful.

"For more than twenty years I suffered with a cough, bronchitis, asthma and nasal catarrh," writes J. F. Fenwick of Staunton P. O. "Every attack I had seemed to grow worse and I could hardly breathe on account of an accumulation of phlegm in the nose and throat. One day I tried Catarrhozone and in ten minutes was wonderfully relieved. I could breathe freely and naturally through the nose and blood spitting was stopped—the phlegm was cleared away and my regular breathing restored. No remedy can do more than Catarrhozone."

There is no remedy so certain and safe as Catarrhozone, but being a good remedy it is imitated. Beware of the substitutor. Large Catarrhozone lasts two months, price \$1.00. Smaller sizes 25c. and 50c. At all storekeepers and druggists, or The Catarrhozone Co., Buffalo, N.Y., and Kingston, Canada.

THE NEW WELLAND

Twenty-five Miles Long With a Fall of 325 Feet

As finally located the enlarged Welland ship canal will conform closely to the route of the present canal from Lake Erie to Allandburg, a point about midway between Lakes Erie and Ontario. From Allandburg an entirely new location will be followed. This will cross the present canal twice, finally reaching Lake Ontario at the foot of Ten Mile Creek—three miles east of the present terminus at Port Dalhousie. The total length will be 25 miles. The fall of 325½ feet will be accomplished by seven locks, each having a lift of 46½ feet. Each lock will be 800 feet long and 80 feet wide, with a minimum depth of water over miter sills of 30 feet. The canal will be 200 feet wide at the bottom, designed for a depth of 30 feet, but excavated for only 25 feet for the present. This will permit dredging out the remaining 5 feet at any future time. At Port Colborne, the Lake Erie terminus, a new breakwater will be built on the west side of the entrance to insure quiet water in the harbor during storms, the present breakwater being insufficient for the purpose. The new breakwater will consist of an immense rubble mound of stone from the excavation north of Port Colborne, and will terminate in a timber-and-concrete headblock located some 2,000 feet farther out in the lake than the present breakwater.

One Leg Cricketers

At the Cripples' Home at Alton, Hants, there is an inmates' cricket team. Many of the players have only one leg, but despite this disadvantage the team has won two matches this season. There is also a football team at the home, and although the team can only muster seventeen legs, yet of the seven matches played last season they won four and lost only one match, the other two being drawn.

Montreal's Narrow Streets

"Montreal is wrongly built," said Dr. Louis Laberge, Chief Medical Officer of Health of that city. "The streets are too narrow, and do not let enough sunlight reach the ground for the prevalence of good health. The sun is a good decomposing force. If it is allowed to shine on the ground the heat penetrates several feet and in the night it evaporates and breaks up all the putrescent vegetable matter. With our narrow streets this cannot be done. It is certainly a most serious problem for us to face. It cannot be remedied without the spending of much money."

The BOSTON AND MONTANA DEVELOPEMENT COMPANY, authorized capital 3,000,000 shares, par value \$5.00 each, is a consolidation of large copper mining properties in the famous French Gulch District, Deer Lodge County, and the Elkhorn District in Beaverhead County, Montana. The Company has taken over all the developed and known valuable claims in these districts, and to insure the permanent and economic development of which it will build a standard gauge steam railroad, to be known as the BUTTE, WISDOM AND PACIFIC RAILWAY, running up the Big Hole River to Ralston, Wisdom and Jackson, with branch lines extending to the French Gulch Mines and up the Wise River to the Elkhorn Miding District. In addition to furnishing transportation for the great quantities of copper-bearing ore from the French Gulch and Elkhorn Districts, this road will furnish transportation facilities to the entire territory known as the Big Hole Basin, the richest and most extensive agricultural, timber and mining District in the State of Montana, now without the benefit of railroad facilities. The Company owns water rights from eight streams in the French Gulch territory, with approximately fifteen miles of ditches and flumes, also large acreage of virgin timber.
