

# DYING FROM GALL-STONES

Doctors Said Only An Operation Could Save His Life—"Fruit-a-tives" Enabled Him To Pass Nearly 200 Gall-Stones.

J. B. HARDING, Esq.

46 Grove Ave., Toronto, Ont., Jan. 10th, 1913.

"I suffered untold agony from GALL-STONES, for the past three years, and tried many doctors without getting relief. I also paid \$5.00 for one bottle of medicine which was useless. At times the pain from these gall-stones was so great that I lost consciousness, and my condition was desperate. I was quite satisfied that I was dying and the doctors said I must be operated upon.

"During one of these very severe, acute attacks, I was given some 'FRUIT-A-TIVES', and after taking a short treatment of this remedy, I passed gall-stones over an inch in length, and as many as one hundred and fifty or two hundred in number. 'FRUIT-A-TIVES' was the only thing that would relieve my pain. They are the greatest medicine in the world, and if there is anyone in Canada, or anywhere else, that suffers from gall-stones, I say 'Let them take 'Fruit-a-tives' and be cured'.

"If this testimonial will further the good work of 'Fruit-a-tives', publish it with my full authority."

Are you wondering how 'Fruit-a-tives'—a medicine made from fruit juices, can cure Gall-stones? We will tell you. The Gall bladder is the reservoir for holding the Gall, or bile, secreted by the liver. If there is insufficient bile, then the bile in the Gall bladder is thick and easily forms stones. When the liver is weak, it secretes very little bile and then the Gall bladder is partially filled with a thick jelly-like mass of bile and thus forms into lumps or stones. 'Fruit-a-tives' stimulates the liver to secrete more bile, and this increased bile softens the Gall-stones and by overfilling the Gall bladder, forces the passage of the stones through the Gall duct—and thus cures the disease.

'Fruit-a-tives' is the only medicine in the world made of fruit juices. By a wonderful process, the medicinal properties of certain fruits are greatly intensified—then valuable tonics and antiseptics are added and the whole made into the pleasant tasting tablets known in every section of Canada as 'Fruit-a-tives'. 50c. a box, 6 for \$2.50, trial size, 25c. At dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

## NEWS OF FREDERICTON TWENTY-ONE YEARS AGO

(From The Weekly Herald of Saturday, Sept. 24, 1892)

**PERSONAL**—Among the visitors during the week were Dr. A. B. Atherton of Toronto, F. B. Gregory of Victoria, Rev. Mr. Manning of Halifax, Mrs. George Botsford of Boston, and Chief of Police Clark of St. John.

**WHICH WILL WIN?**—Since the completion of the cotton mills at Marysville and Milltown there have been many marriages between operatives from each place so that now there appears to be a contest as to which town will have the most marriages to its credit.

**EXPRESSION OF THANKS**—Mrs. Medley wishes to express her heartfelt thanks for the kindness and sympathy of the community at large as well as the members of the Cathedral congregation during the bishop's illness and since his death. Mrs. Medley also wishes to express her deep

sense of gratitude for the esteem and respect shown by the editors of the St. John and Fredericton papers for her late husband, the bishop.

**PRINCE WILLIAM RAILWAY**—The work of survey on the Prince William Railway is completed. James Manchester of St. John, one of the company, has been on the survey route, visiting several of the farmers with respect to making arrangements for the railway. It appears from report that there are a few who think the road will go anyway and that they may as well get all possible. It is rumored that steps are now being taken toward the advertising for tenders and that some construction work will take place this fall.

**JIMMIE ON DECK**—James Patterson of Fredericton Junction, has been in charge of the trains on the Fredericton Branch of the C.P.R. for the past fortnight during the illness of Conductor Hagerman. He has

## FOREST RESERVES

Thirty-five Thousand Eight Hundred Square Miles of Reservation

Over ten thousand five hundred square miles were added recently to the existing area of Dominion Forest Reserves, making a total of over thirty-five thousand eight hundred square miles of reserved forest land in the Western Provinces under Dominion jurisdiction. Of this reserved area, three thousand seven hundred and eighty-two square miles are found in Alberta, one thousand eight hundred and seventy-two square miles in Saskatchewan and four thousand one hundred and eighty square miles in Manitoba. Over two-thirds of the total area is found in Alberta, owing to the fact that practically all the eastern slope of the Rockies has been set apart as a forest reserve, not only to perpetuate the supply of timber, but to preserve and equalize the flow of the large prairie rivers which have their source in this reserved area.

These western reserves are created by the Dominion Government as cited in the Act "for the maintenance, protection and reproduction of the timber growing thereon, or which may hereafter grow thereon, for the conservation of the minerals and the protection of the animals, birds, and fish therein, and for the maintenance of conditions favorable to a continuous water supply." To accomplish these ends the reserves must first be protected from fire, and under the direction of technical foresters and supervisors, fire-lines are being cut, telephone lines and lookout stations installed, "coaches" of tools distributed in accessible places throughout the reserves, and efficient patrols established in accessible places throughout the reserves, and efficient patrols established.

Nor is the timber so protected allowed to die of old age. The foresters determine at what diameter each section the maximum production is attained and when the trees reach this size, they are granted free or for a nominal sum to homesteaders who apply to the forest officials for cutting permits. Care is taken not to allow over-cutting, for it is the forester's aim to crop the forest perpetually and at the same time increase its producing capacity by proper methods of management. Thus, by this policy of forest reservation, instead of denuded hillsides, drifting sand and barren rocks and muskegs, these areas will in time be covered with great tracts of forest owned by the people and supplying their wants, not only now but to all future time, when countries with less foresight will be in the throes of a timber famine.

### Bomb Fire Signal

The contents of a can explode when a fuse becomes overheated and give an audible fire alarm in a recently patented device along that line.

### Kills Weed Roots

Spring tongs, terminating in pointed blades, have been patented by a Connecticut inventor for removing weeds, roots and all, from the ground.

done his work satisfactorily to all.

**THE NORMAL SCHOOL**—Public exercises at the regular opening of the Normal School took place Wednesday morning. On the platform were Sir Leonard and Lady Tilly, Dr. Harrison, Sheriff Sterling, the teaching staff and Principal Mullen, who presided. Among the many visitors present were the Rev. Messrs. McDevitt, Crawley, Weddall and McDonald. Principal Mullen announced an enrolment of 204, the largest in the history of the institution.

**TO THE FRONT**—Miss Lizzie Bridges and Miss Laura Burpee of Sheffield, have secured diplomas at the St. John Business College for proficiency in shorthand and typewriting.

**PROFESSORS ARRIVE**—Prof. Davidson has sailed from Liverpool and will reach here in time for the opening of the University term. Prof. Dixon has arrived and also Prof. Hatt.

**SPORTS**—Several of the local sports have requested Edgecombe & Sons, carriage makers, to provide them with pneumatic tired sulkies. One will be seen on the track in a short time.

**PARTRIDGES PLENTIFUL**—Harry and Charles Beckwith left on Saturday for the Narrows for partridge shooting. On the same day Frank Merritt and Fred Power went to Little River for similar sport. Partridges are said to be plentiful.

**WEDDING BELLS**—Daisy, an old squaw of the St. Mary's Reserve, aged seventy-seven, was married on Monday last to Louis Paul, a fourth time widower.

**LOST IN WOODS**—Dr. Atherton and Dr. Coburn had a rather unpleasant experience in the Nashwaak woods on Monday night. They were out partridge shooting and got lost in the woods and had to remain all night. Dr. Atherton caught a heavy cold and was confined to the house next day.

**THE LOST CHILD**—The Doak Settlement mystery remains a mystery still. No tidings of the lost child have been gleaned, all reports that it had been found being false. The most plausible theory is that it is lost in the woods. All talk of foul play is regarded by most as being worthy of no credit.

## FAITH IN DOMINION

Quiet Years Mere Breathing Spells Says Big Railroad Man

Speaking at Cochrane, Mr. A. W. Smithers, chairman of the Grand Trunk Railway Board, declared his belief in Canada's future greatness and prosperity in the following words: "The spirit that animates you all to go forward and conquer will lead to a continuance of prosperity in Canada and if we have a little quieter year or two I do not think we should look upon it with any fear, but rather as a good omen that it will give us time to take breath to make the next big stride forward. I believe in the main Canada is sound, because as long as her immigrants come in, and as long as new land is broken up every year, that is the real source, the real standard of the wealth of Canada; and as long as that goes on I think the prosperity of Canada—although it may ebb and flow slightly—I do not think there is any considerable setback to be apprehended, but that she will go on and show continued progress as she has done in the past."

## CANNOT LOSE CLOTHES

Locking Device Designed to Frustrate Hotel Thieves

Necessity is the mother of invention and the inventor of the lock for wearing apparel shown in the accompanying illustration, was probably prompted by an unfortunate experience in a restaurant of some busy city. He probably discovered that some persons keep themselves supplied with hats, umbrellas and coats by picking at the best at hand when they are ready to leave such a public place as

LOCKS HIS CLOTHING ON THE HOOK. a restaurant. If they make their getaway, all right, but if detected, it is a very simple matter to ask pardon and say mistake.

This device, which has been recently patented in this country by a Canadian, consists of a bar with a removable head and a small chain and a key for locking the two parts together. If it is desired to relieve oneself of hat and coat, the garments are secured on the bar and the chain passed through an opening in the wall hook and they can then be left with perfect safety so far as stealing the garments is concerned. This bar is adapted to hold hat, coat and umbrella or cane.

# AGONY ON OPERATING TABLE

Did Not Remove Stone In Bladder  
GIN PILLS Passed it.

JOLIETTE, P. Q. CANADA.

"During August last, I went to Montreal to consult a specialist as I had been suffering terribly with Stone In The Bladder. He decided on an operation and was assisted by another doctor. They said the calculus was larger than a bean and too hard to crush and they could not take it out.

I returned home suffering greatly and did not know what to do but was recommended by a friend to try GIN PILLS. I bought a box and found relief from the pain at once. I took a second and third box of GIN PILLS after which I went back to the specialist. He told me the calculus was reduced in size, still he could not relieve me of it although he tried for two and a half hours.

I returned home again and continued to take GIN PILLS as they reduced the pain very much, but I did not expect that they would relieve me of the stone but to my great joy, I passed the stone on October 3rd, and am now a well man and very happy.

I am sending the stone in to you so that you can see for yourself what a great work GIN PILLS did for me. GIN PILLS are the best medicine in the world and because they did so much for me, I will recommend them all the rest of my life."

J. ALBERT LESSARD.

What glorious news to those who are almost going insane from the pain of Stone In The Bladder! Here is ease and comfort! Here is relief! Here is a certain means of getting rid of the stone without being cut to pieces by the knives of a surgeon. GIN PILLS dissolve Stone or Gravel in Kidneys or Bladder because GIN PILLS are the greatest solvent for uric acid the world has ever known.

If your trouble is like Mr. Lessard's, follow his example and take GIN PILLS. Money refunded if they fail to give relief. At all dealers, 50c a box—6 for \$2.50. Sample free if you write us, mentioning this paper.

National Drug and Chemical Co., of Canada, Limited, Toronto. If the bowels are constipated and liver torpid, take National Lazy Liver Pills 25c a box.

## DESIRABLE HELP WANTED
