I. H. C. GASOLINE ENGINES

It is a pleasure to sell I. H. C. Engines because the customers are always well satisfied.

In building I. H. C. Engines highest quality is always the first consideration. These Engines have stood the test for eight years and no change has been necessary except in the cooling system, that is conclusive proof that the working principle is the very best.

It will be to your advantage to see us and get all possible information about I. H. C. Engines before buying any other make.

1,000 bushels of grain threshed and only 7 gallons gasoline used. That is the record of one of our customers with an engine 6 years old.

WIN OF TITLE IN
INTERNATIONAL**

Copped Championship Sunday Winning
Double Header From Jersey City---
Has Good-sized Margin

Newark, Sept. 21—Newark won the 1913 championship of the International League here today by taking the Jersey City team into camp both games of the double-header, 2-1 and 4-3, the second game ending in the seventh inning by agreement. This is the first time Newark has won the pennant in this league.

RAISING GEES

A Profitable Side-line on the Farm—
Pointers on Management

The breeding and raising of geese calls for altogether different treatment from the breeding and raising of ducks, the necessary conditions being very dissimilar. While the ducks will do very well when closely confined in yards and fed such green food as we have, geese will not thrive if kept in this manner. The breeding birds need a large, practically free, green range, and if well watered, either by pools or streams, the breeding results will be much more satisfactory than if the runs are unwatered.

Breeding geese require very little grain food. Through the winter they should be fed largely on vegetable foods. Cabbage, turnips, beets, cut clover, and other vegetable matter may be fed freely, together with a good quality of bran and oats. Corn and meal will prove rather too fattening, and should be fed sparingly even in the coldest of weather.

Very little shelter is required. A rough shed, free from extreme draughts, is all that is absolutely necessary. It should be littered with some dry material, and cleanliness will add much to the health and worth of the birds.

Old geese do not lay as many eggs as young ones, but they hatch good, vigorous birds. To the amateur it would be well to say, if your young geese (females) are but one year old, do not expect too many goslings, as you will do well to raise any from one-year-old females. Many a would-be geese raiser has given up the business because he did not know this.

The birds generally mate in February, and at this time such birds as are to be mated together should be shut apart from the others.

There is some question as to which is the best breed for general purposes. The three breeds which have the strongest following are the Toulouse, African and Embden. Each has its special virtues. The Toulouse is the largest of the three and produces a very strong and quick-growing gosling. The goslings require very little attention, except for the first day or two when they should be kept dry and warm.

A green run is really one of the necessary aids in the proper growth of young goslings. A little grain can be fed, say three times a day. This, with an abundant supply of green food, will cause them to grow and yield a profit to the producer.

Let them have free access to grit and oyster shell. They should be ready to kill when the first flight feathers are grown, and should be full fed at that time with corn, oatmeal and animal food.

Coach Campbell Has
Them out for First Real
Practice this Afternoon
--- Big Bunch of Fresh-
men Available and great
Majority of 1912 Team

The real start in senior Rugby in Fredericton will be made today when the U.N.B. squad will practise for the first time, the work-outs held last week not being considered practices. Coach "Hump" Campbell will be in charge of the squad and according to appearances will have abundance of material with which to work.

It is expected that fourteen men who were selected to play with the first XV of 1912 will be available. These have the benefit of experience, gained while "Babe" Church was instructing the team during the past two seasons. In addition there is to be a big squad of players who will enter in the Freshman Class. These have played high school and preparatory school Rugby and should be first class stuff.

The Red and Black is making no predictions of what it will do in the Intercollegiate Series. Past experience has shown that the league is not won until the whistle blows to end the last game and that will be the case this year.

Cook's Cotton Root Compound

The great Uterine Tonic, and only safe effective Menses Regulator which women depend on. Sold in three degrees of strength—No. 1, \$1; No. 2, 50c; No. 3, 25c. For special cases, \$5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: J. J. Cook Medicine Co., Toronto, Ont. (Formerly Windsor).

RETURNING TO VAUDEVILLE

Alice Lloyd, who was seen in Fredericton last season in Little Miss Fix-it, is returning to vaudeville and England for a short season. There is some possibility of Miss Lloyd joining forces with her sisters Daisy and Marie, and if this is true, it will make one of the strongest vaudeville bills yet seen in the music halls of London. Either one of the three is a big drawing card as a single act. After the vaudeville season, Miss Lloyd is to appear in a new musical comedy now being written

**PARKER OF ST. CROIX
TEAM SIGNS WITH
CHICAGO AMERICANS**

Fast Young Outfielder Makes Big Jump
From Class D. Team to Major
League Club

Bath, Me., Sept. 19—Clarence P. Parker of this city, signed a contract to play with the Chicago American team. He played on the Morse High team a number of years and last year was with Somerville in the Greater Boston League. This season he played with St. Croix in the Maine-New Brunswick League in 83 games and batted for .300.

At the close of the season he played with St. John for the championship against Fredericton and in seven games had a batting average of .386. He is an outfielder, but has had some experience as a pitcher. He is twenty years old. He had a contract from the New England League under consideration when he received the Chicago contract.

Football, Holy Cross College vs.

**REICH COULD
LAST ONLY TWO
ROUNDS WITH MORRIS**

Amateur Who Recently Entered Professional Ranks Had No Chance
With Oklahoma "White Hope"

New York, Sept. 19—Carl Morris of Sapulpa, Ok., heavyweight, knocked out Al Reich of this city, in the second round of a scheduled ten-round bout here tonight. Reich is the amateur heavyweight champion who has just entered the professional ranks and who made a good impression in his debut, defeating Sailor White a week ago.

The punch that upset the white hope aspirations of Reich was a right smash to the chin. It landed soon after the opening of the second round Reich's knees buckled under him and he slowly sank to the floor. He made no effort to rise as Referee Billy Johnston counted the ten seconds over him. Morris weighed 235 and Reich 204 pounds at ringside.

From the opening bell to the final count it was apparent that the amateur was no match for the "original hope." Morris started by planting a hard left to Reich's head that drove him to the ropes. Reich covered up and, after working clear, got home a few long lefts to Morris' midsection, which was so fat that it caused Al's blows to sink deep.

The second round was scarcely started when it was all over. Morris shot over a straight right to Reich's face and he sank to the floor and was counted out.

Norwich University, at Worcester, Mass.

Football, Leigh University vs. Albright College, at South Bethlehem, Pa.

Football University of Maine vs. Fort McKinley, at Orono, Me.

THURSDAY

Annual horse show at Morris town, N. J.

Football, Yale University vs. Holy Cross College, at New Haven, Conn.

Football, Princeton University vs. Rutgers College, at Princeton, N. J.

Football, Cornell University vs. Colgate University, at Ithaca, N. Y.

"We Want Rainbow"

If a cook is to be judged by the bread she bakes, don't blame her when she asks for Rainbow Flour.

She knows it is whiter and cleaner than other flours. She knows that it makes lighter, whiter better-textured bread.

For, while some flours include as much as 90% of the grain of wheat, only about 40% of the grain is fine enough to meet the extra-high Rainbow standard.

Give the cook Rainbow and she will reward you with the tastiest bread, cake and pastry you ever ate.

In using Rainbow Flour for pastry, less flour is required and more water (added slowly).
