

RHEUMATISM KEPT HIM IN BED

Suffered Tortures Until "Fruit-a-lives" Cured Him

McMILLAN'S CORNER, ONT.

Sept. 30th, 1910
"Your remedy, 'Fruit-a-lives' is a perfect panacea for Rheumatism. For years, I suffered distressing pain from Sciatica or Sciatic Rheumatism, being laid up several times a year for days at a time. I went to different doctors who told me there was no use doing anything—it would pass away. They gave me mustard plasters and other remedies that did no good. Plasters took no effect except to blister me and make raw my skin. I took many advertised remedies without benefit, but fortunately, about two years ago, I got 'Fruit-a-lives' and they cured me.

Since then, I take 'Fruit-a-lives' occasionally and keep free of pain. I am satisfied 'Fruit-a-lives' cured me of Rheumatism and they will cure anyone who takes them as directed. If this letter would be of value to you, publish it."

JOHN B. McDONALD.
Indeed, this letter is of value to us and to the thousands of sufferers from Rheumatism, Sciatica, Lumbago and Neuralgia. It points the way to a certain cure. 50c a box, 6 for \$2.50 trial size, 25c. At dealers or from Fruit-a-lives Limited, Ottawa.

ARMAND LAVERGNE PRAISES BORDEN

Quebec, Oct. 26.—In a signed article in his new weekly, La Franc Parler, Mr. Armand Lavergne, commenting on the speech made by Premier Borden at the banquet given in his honor here last Wednesday, says:

"Let us be permitted to add our humble share of praise, sincere and independent. Mr. Borden spoke like a great statesman and placed the national interests of Quebec high above the petty considerations of party. And heaven knows he had a large enough field to praise the Conservative regime."

"What a theme he could have developed on the two following points: 'What did Laurier do for' Quebec in fifteen years?'

"Nothing."

"What have I done for Quebec in two years?'

"You know and our works are immense."

"Instead he preferred to speak not as a chief of a party but as a chief of a nation. It is a noble answer to the Liberal press whose criticism of the reception given by the citizens of Quebec to the Prime Minister had been so picaresque."

"Being free so far as it is a matter of Mr. Borden, the Franc Parler is happy to bring its testimony of esteem and gratitude to the chief of State who has been the first to remember that our city is not only the cradle of our history, but is also situated on the finest harbor in the world."

GROWTH OF LANGUAGE

English Dictionary of 1616 Contained Only 5000 Words

Roughly speaking, the English language may be said to grow at the rate of 5,000 words a year. At least, that is the average growth by the measure of the dictionaries. Bullock's "Complete English Dictionary," in 1716, the year of Shakespeare's death, contained 5,030 words. Thomas Blount's "Glossographia" (1656) improved on this and was superseded in its turn by Edward Phillips' "New World of English Words" (1658), a small folio containing 13,000 words; and by the time it reached its sixth edition (1705) the number had grown to 20,000 odd. Johnson's dictionary published on April 15, 1755, though it improved all predecessors off the face of the earth by the perfection of its system and the soundness and breadth of its wording contained only 50,000 words, and it remained master of the field, even at this modest total, until Noah Webster's came along in 1828, and Worcester's "Comprehensive Pronouncing and Explanatory English Dictionary" in 1880, with 160,000 and 105,000 words respectively.

The latter part of the nineteenth century kept the ball rolling. The "Imperial Dictionary" contained 200,000 words, and Dr. Tristram's "Standard Dictionary" (1894) entered the field with half as many words—118,000 words in all. There have been half a dozen editions of this, and the next new one will reach the high water mark with a total of 450,000 words, most of which are English beyond question.

HEAD AND NOSTRILS STUFFED FROM COLD

Don't stay stuffed-up. Quite blowing and sniffling. A dose of "Pape's Cold Compound" taken every two hours until three doses are taken will end gripe misery and break up a severe cold either in the head, chest, body or limbs.

It promptly opens clogged-up nostrils and air passages; stops nasty discharge or nose running; relieves sore head, coldness, fever, sore throat, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only 25 cents at drug stores.

DR. OSLER ON DRUGS

Eminent Canadian Doctor Not a Great Medicine Giver

Dr. (Sir) William Osler is probably the greatest living authority on the use of drugs in the treatment of disease. At one time a professor in John Hopkins University, Dr. Osler was appointed Regius Professor of Medicine at Oxford University, England, and he is regarded by the doctors of every English-speaking country as a great authority.

Dr. Osler says of diphtheria: "We are still without drugs which can directly counteract the toxin-poisons of the disease, and we must rely upon general measures of feeding and stimulants to support the strength. Medicines given internally are of little avail in diphtheria."

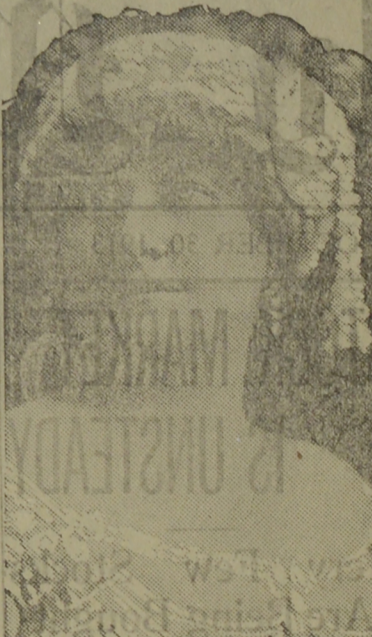

"Concerning pneumonia," Dr. Osler says: "Pneumonia is a self-limited disease which can neither be cut short nor abridged by any known means at our command. Even under the most unfavorable circumstances it may terminate abruptly and naturally without a dose of medicine having been administered. There is no specific treatment of pneumonia. The young practitioner may bear in mind that patients are more often damaged than helped by the too promiscuous system of drugging, which is still only too prevalent."

Of scarlet fever, Dr. Osler says: "Ordinary cases do not require any medicine. Medical antipyretics are not of such service in comparison with cold water."

Of measles, Dr. Osler says: "Confine the patient in a well ventilated room and light diet are the only measures necessary in uncomplicated cases."

Of whooping cough, Dr. Osler says: "The medical treatment is of most unsatisfactory."

Of yellow fever: "Careful nursing and a systematic plan of diet probably give the best results."

MRS. CHARLES H. ANTHONY of Muncie, Ind., who has at different times attracted attention in New York by her original and almost daring ideas in regard to her costumes.

ROAD MAINTENANCE

Various Suggestions as to Distributing the Cost of Good Roads

With the appointment of the three-highway commissioners by the Ontario Government come various opinions and recommendations regarding the good roads movement throughout the province. In the hope of getting suggestions the secretary of Ontario good roads communicated with the reeves of various townships scattered about the province, and the result was a decided tendency to ask more money from the government. The most common recommendation is that the government pay one-half the cost of good roads construction. Instead of one-third, as provided under the Highways Act. A second common demand is that motorists be compelled to pay more towards the roads they help to destroy. Complaints are made that motorists wear roads out faster than the townships can afford to keep them repaired, and that it is the motor and not the horse vehicle, which does the bulk of the damage. This seems to be particularly the case in townships lying close to the larger cities. Force motors to pay a high tax, proportionate to weight of the car, is the suggestion. From one county comes the recommendation that the roads leading from large centers of population, bear the full cost, and hold this out as an incentive to the more remote districts. Some districts are not inclined to favor the movement entirely, stating that more progress will have to be made at less cost, or the system will rapidly become unpopular among the people who are now paying the bills. The government, however, might absorb a good share of that cost. The suggestion of a frontage tax comes from another county. It is a recognized thing that improved roads increase the value of adjoining farms and the recommendation is that these farmers help pay for the roads in larger percentage than those whose farms are benefited less.

NON-DINKING SHEEP

Apparently Thrive Without Water Except Dew and Plant Juice

Sheep on the Nebo national forest range, Utah, go four and a half months without water except for such moisture as they get from the dew, and the juices of forest plants.

Grazing sheep on a range entirely destitute of water is a recent innovation due to the increasing demand for forage and the efforts of the forestry officers to find a place on the forest ranges for all the stock that can safely be admitted. The area on the Nebo which has proved usable by sheep is high and rocky, a portion of it being above timber line, and it has neither springs nor streams of sufficient size or accessibility to be used for stock watering purposes. The grazing season lasts from June 15 to October 31, and during this period of four and a half months the animals do not get a drink.

Under such conditions, however, the sheep do extremely well, and the lambs from this range have an average weight at the close of the season of 68 pounds on the Chicago market, which is rather above the normal weight from that vicinity.

In one area on the Targhee forest in Idaho sheep get water only twice during the four-months summer grazing season. There is no water on the range, but the sheep are driven to a nearby stream lower down the mountain side.

LOOK!

If you were told of a new discovery for the treatment of coughs, colds and bronchitis, as certain in its action on all chest troubles as anti-toxin is on diphtheria, or vaccination on small-pox, wouldn't you feel like giving it a trial? Especially if you could try it for fifty cents!

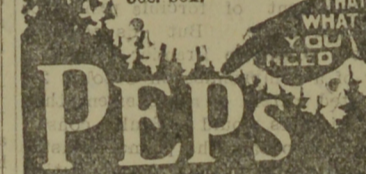

Peps is the discovery!

Peps are little tablets, neatly wrapped in air and germ-proof silver foil. They contain certain medicinal ingredients, which, when placed upon the tongue, immediately turn into vapour, and are at once breathed down the air passages to the lungs. On their journey they soothe the inflamed and irritated membranes of the bronchial tubes, the delicate walls of the air passages, and finally enter and carry relief and healing to the capillaries and tiny air sacs in the lungs.

In a word, while no liquid or solid can get to the lungs and air passages, these Peps fumes get there direct, and at once commence their work of healing.

Peps are entirely distinct from the old-fashioned liquid cough syrups, which are merely swallowed into the stomach, and never reach the lungs. Peps, treatment of coughs and colds is direct treatment.

If you have not yet tried Peps, cut out this article, write across it the name and date of this paper, and mail it (with 1c. stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All druggists and stores sell Peps at 50c. box.

PEPS

RULES FOR HUSBANDS

L. C. Dillman, a Seattle millionaire, as the result of eighteen years of marital bliss promulgated the following rules for husbands:

Keep all promises made before and at the time of marriage. Keep a joint bank account. Go to your club no oftener than one night a week. Have no dogs or pets of any kind. Call her up on the telephone at least three times a day. When away from home write or telegraph every day. Take her with you on business and pleasure trips. Be more polite to her than to any other woman you meet. Remember that she likes flowers, candy and books. Make it a business to be comfortable whenever she is happy. Do not criticize her dress. Be a gentleman to all women, but a husband to one only. If you have only a dollar you are not wasting it by spending it on her. When she is dissatisfied get a divorce. Life is too short to waste any of it in trying to please an abnormal woman.
