

**Trooper and Financier**  
Trooper Thos. Duffy, of the Royal Canadian Dragoons, St. Johns, Que., expert sign writer, champion fancy handwriter of the Dominion, is a man of purpose.  
When he found that he could not get his land grant without proving that he was a soldier he re-enlisted, and after getting his grant watched the price go up from \$100 to \$1,250. At the latter point he sold and took a holiday on his profit.  
When the Prince of Wales was at the Quebec Tercentenary, Pte. Duffy was his groom, and the now King rode Pte. Duffy's big black horse, Bill Bailey.

### BOMBS FROM THE AIR

Dirigible Balloons Add to the Horror of Naval Warfare

The Zeppelin dirigibles are so constructed that they can come to rest on the sea, but they require special moorings. With even five of these airships searching specified areas from low or medium altitudes in the air, it is difficult to see how the battleship can remain undiscovered. The new rigids being built in Germany will, it is reported, have a speed of nearly sixty miles per hour, and a scope of action of thirteen hundred miles, so that one of these vessels would itself be quite capable of exploring a very large extent of sea and coast line. These aerial cruisers are to carry no less than eight tons of explosives and improved bomb-dropping appliances.

The moral effect of the dirigible in sea warfare of the future is bound to be very great. One can well imagine what an outcry there would be were a Dreadnought to be put out of action by the bombs of an airship, and yet such an occurrence is by no means impossible. The man in the battleship has already an anxious time of it, knowing as he does that he has to avoid the attentions of the submarine, the mine, and the torpedo. But now, that the airship has been added to all these terrors, the extra strain that will be thrown upon the sailor's nerves will be almost unbearable.—Chamber's Journal.

#### Aerial Fleet Wanted

It has been suggested by a British maritime league that every county in England, Scotland and Wales present an aeroplane to the government for military purposes.

#### Science in Restaurants

Electric mechanism similar to that of automatic telephones has been invented to enable a restaurant patron to order a meal by numbers from an index bill of fare.

Parent, Bird & Co.- Grocery Store, Cor. Queen and York Streets.

D. H. Crowley-Queen Street Opposite Mail Office.

### ROLL SAMPLE CASE

Samples Take up Little Room and do not Become Mussed

An ingenious case for dress goods and other fabric samples has been designed. It rolls up closely and makes a compact bundle, yet the samples are not wrinkled or mussed in the process. A long piece of flexible material has a series of narrow straps removably attached at intervals along its inner surface. A number of clips form sample attaching elements, and these are

SAMPLES EASILY REMOVED.

removably fastened to the straps. The clips, for example, are run through a bunch of fabrics and hooked onto the straps. The bunches are mounted in the case in transverse rows, with room enough between them to permit of the free and smooth rolling of the strip without wrinkling or creasing the goods. If the salesman desires to remove any particular bunch of samples for closer inspection he can do it—and replace it—instantly.

#### How to Bleach Celery

To bleach celery without the constant labor required to heap soil about it as it grows a bright gardener invented strips of webbing, supported by large wire staples, to be placed about the growing plants.

#### These Fine Organs

One of the world's largest church organs is an electrical instrument at Hamburg, which has 12,173 pipes, some of which are 37 feet long.

#### Helps the Dentists

Apparatus delicate enough to measure the roughness or softness of the enamel of the teeth, even in their slightest stages, has been invented.
