PALMER'S
Moose Head Brand
Summer Packs & Plow Shoes

SLIP on a pair of Palmer's Summer Packs or Plow Boots, and you will realize what Farm Foot Comfort really means. Added to that you have strength and durability, making a combination of good features seldom found in one pair of boots. Palmer's Summer Packs and Plow Boots are hand made and hand sewed by expert workmen. The bottoms and uppers are made from Palmer's Famous Skowhegan Waterproof Leather, rich dark brown in color, very soft and pliable. Bottom part of uppers runs clean under, a great advantage over the lasted under boot. Soles are attached by special clincher nailing process or sewed by lock stitch process. A splendid boot for plowing or any kind of hard outdoor work.

Get a pair from your dealer, or order direct from us. Write us for our catalogue No. 43.

Some Prophecies Are Made By Dr. Croft for Year 1922

**Ireland's Freedom Will be Established---
Big Storms and Floods are Predicted---
World will never again Have the Scourge
of War--- Canada Will Make Great Ad-
vance in Trade With the U. S.**

(Adduced from the Pythagorean Code
by Dr. Delmer Eugene Croft,
December, 1921)

The author of these prophecies predicted in 1915, that the world was suffering its last war. He predicted in 1917 the gathering at Washington of the heads of nations for world peace and betterment, which is now in session. In Dec. 1920 he predicted the following events of 1921: That nations would be moved by new principles of ideals and co-operation. The doom of imperialism and sovietism. The establishment of Ireland's freedom. The great agitations in the governments of Japan and China. The intrigue of former Emperors. America's great service of benevolence to the world. The great advance in science, art and literature. The profound interest in psychology. The deepened interest of mental, moral and physical hygiene. The intense interest of women in politics, government, society, education and industrial problems. The act of Congress in restricting immigration. The national legislation to promote commerce and world trade. The co-operative spirit of justice, definite purpose, determined will and idealism of our President, his official Cabinet and Congress would inspire world confidence. The return of sanity to business and industry. A better co-operation between Capital and Labor. The open shop. The mild winter. The great storms, earthquakes and famine. The sorrow of America in the loss of distinguished men and women. The political upheaval in Spain. The establishment of a new World Court. The return of the baseball pennant to the Atlantic sea-board. The ill-fortunes of pugilism. The enactment of the peace treaty.

A New Idealism

The war sick world is healing. It will never again be stricken with the scourge of war. Militarism will never scar the fair earth again. Monarchy and imperial despotism will never return to power. Out of the baptismal blood of the supreme sacrifice of the world's manhood, civilization will arise cleansed and glorified in an era of world unity, brotherhood and idealism. The nations of the world are coming together. They have entered a common council chamber, leaving their suspicions at the outer door. They are thinking in terms of knowledge born in suffering. A better world is forming. America is the banquet hall of the world and into it the nations have gathered and the banner over them is Peace, Unity and Brotherhood. Civilization will not fail. Christianity will not be defeated, the institutions of science, art, literature and education will not fall in chaos, capital and labor will not continue to struggle in self-destrorying conflict, the universe is not ruled by blind Chance, humanity will ever move toward its central sun—The Will of God. The Disarmament Conference of the nations will result in a co-ordination program for all the governments of the world. A new idealism will modify the policies which rule the nations of the earth. National power and greatness will no longer remain in armies and navies, but in the noble ideals carried forward by the determined will of the people. The smaller nations will ever follow the leadership of the larger nations, how great a responsibility rests upon America! Reaction will come, offenses must need come, disheartening conditions arise, reactionary temperaments will create many a serious crisis. The unifying of the mind, will land heart of the world is a stupendous work, but worthy of all toil and sacrifice. It will carry on Woe unto those who stand in its way. There will come a total collapse of Sovietism, its finality will be most tragic. Look for subtle intrigue that will endanger the world. Both Lenin

and Trotsky will pass from the stage this year, new leaders arise which brings new hope to Russia. Russia will begin her reconstruction under three divisions of the former empire. Ambitious members of royalty will arise, only to go down in defeat. Two ex-rulers of Europe will pass away, one in America. A national sorrow will come to England and France. There will be a great movement in the industrial life of England which brings new prosperity. A serious calamity befalls Italy, but she will soon recover. There will be a political crisis in Japan, which will attract the attention of the world.

A Year of Progress

The year will be most sensational in new discoveries and inventions. Mighty progress will be made in the scientific and industrial world. Changes in methods of transportation will come. Speed will be the demand. Speedy aeroplane mail service overseas will be established, with trans-oceanic travelers service at several points. Invention of the gas substitute for motors will come, greatly reducing costs. The motor-railway bus will be largely adopted. Speedy transportation of commodities will be inaugurated. Vast systems of inter-state transportation service will be organized. Shipping interests will be reorganized and developed. There will be keen competition for world trade and the opening of new outlets for manufactured products. The reclamation of arid zones will attract attention, gigantic projects will develop in a vast scheme to dam the Grand Canyon of Arizona, turning the Death Valley of California into a fruitful garden, supplying exhaustless irrigating waters for the Mohave desert, to the arid lands of Arizona, New Mexico, Texas and Oklahoma. Great building projects will be started and vast organizations of wealth and ability will promote immense development of natural resources of oil, coal, iron, copper and lumber production. New life will come to all lines of industrial work. Mighty schemes of road building will be started, for opening of freight trucking from large producing centres for speedy delivery at trade centres. A new stimulus will be given to agriculture owing to cooperative organizations in great farming territories, by solving the labor problem and introduction of new machinery. Manufacturing interests greatly revive, with strong markets that inspire new confidence. American manufacturers will be safe-guarded from the products of cheap European labor.

Congress, Commerce and Business

Most important national legislation will be enacted. Solid international relations will be established. Partisan conservatism will break down. A World Court affording a tribunal for all nations will be established. Measures founding the fundamentals of a lasting world peace will be enacted. Congress will pass a Tariff Act which will be most liberal and unite the sectional interests of the country. There will be further adjustment and revision of taxation, relieving the deadening burden upon business. Congress will face three most serious crises in the first cycle of the year. Reactionary forces will arise, intrigue and duplicity will be manifest, but the masterful personnel of the leaders will keep command. March and April will be stormy political months in America and the world. India will create great anxiety to the British government. China and Japan will disturb the political world. The ultimate future of China is in the balance, her vast territory will be divided. The throne of Spain will be in imminent peril. The South American colonies will suffer revolts, armed forces will be required. It will be a year of great political ad-

For the City or Country Family The Corona Range Meets Every Requirement

Let us tell you about ONLY ONE of the leading features that has made the CORONA RANGE supreme

"Corona" Fire Box

The Corona Fire Box is the result of years of experience in range building. It is not too deep, nor too wide but just right for economy of fuel.

Every Corona Fire Box is ventilated, providing a free circulation of air to enter around the fire bricks through openings in the frame. The air in these chambers becomes heated, and as it gets warm it seeks to rise and is carried through small holes in the bricks into the fire box just above the coal. The oxygen in the heated air unites with the coal gas, causing combustion, and the series of small jets of flame is the result. Until the gas is all consumed the coal remains unburned, but after the gas is burned the coal ignites. Your coal gas is the best of your coal—why let it escape through the chimney.
