THE CENTAUR COMPANY, NEW YORK CITY.

OF INTEREST TO THE WOMEN

LEMONADE

Pare the thin yellow rind (and only this) from six firm lemons. Pour over one quart of hot sugar syrup and let stand until cold. If the flavor is too strong use cold syrup or less of the yellow rind (use the rind of four lemons in place of six). To the juice of four lemons add two quarts of cold water and mix thoroughly with the cold syrup after straining out the yellow rind. Turn into fruit jars and chill on ice. This lemonade may be used as the basis of an indefinite variety of punches or "soft drinks."

ORANGEADE

Pare only the thin yellow rind from six large juicy oranges. Pour one quart of hot sugar syrup over the rind and let stand until cold. Skim out rind and add the syrup to the juice of six oranges, the juice of three large firm lemons mixed with two quarts of cold water. Turn into fruit jars and chill on ice before using. If sparkle and ginger-flavor is desired when serving the orangeade fill the glasses two thirds full of the mixture and fill glasses almost to the brim with chilled ginger ale.

PINEAPPLEADE

Boil two cups of sugar and two cups of water ten minutes; let cool and add the juice of four lemons and one fresh pineapple grated; cover and set aside in a cool place, let stand two or three hours until thoroughly chilled. Then add one quart of sparkling water and serve at once. To get better effect of the changed water fill the glasses two-thirds full of the pineapple mixture then add the charged water and serve.

RECEPTION PUNCH

Follow recipe for orange and lemon ices. Put one quart of each into a punch bowl in alternate layers. Add two or three quarts of ginger ale and serve at once.

ORANGE ICE.

Make a syrup by boiling four quarts of water and two cups of sugar six minutes; add two cups of orange juice and the grated rind of two oranges, one-fourth cup of lemon juice; cool and strain. Turn mixture into the can of a freezer packed in equal measure of crushed ice and rock salt and freeze.

FRUIT PUNCH

(To Serve Fifty Guests)
To one gallon of water add eight cups of sugar place on range bring to the boiling point and let boil ten minutes. Cool and add one quart of loganberry juice, juice of one dozen lemons, two finely shredded pineapples and two quarts of large strawberries, hulled and cut in slices lengthwise. Chill mixture on ice and turn over a large cube of ice placed in a chilled punch bowl; then dilute with four quarts of charged water.

THE MOSQUITO

He lights upon your head!
A naughty word is said!
You hang the spot
Where he is—NOT
He stops and rubs his gauzy wings;
He soars aloft and gently sings
And then begins—
To select a spot
For another shot.

ENCOURAGING.

He Who Is About to Take It Up—
"Tell me. How long does it usually take a man to learn to play golf?"
He Who Has Given It Up—"Well for the first five or six months you play a pretty rotten game. After that you grow gradually worse."

FUTURE ASSURED

Lady Dinah (in hunting field):
Even if we had a Socialist Government, they wouldn't abolish hunting for there'd always be some Cabinet Minister's wife who'd look well in riding habit.

SPEAKING FROM EXPERIENCE

The Lawyer—"Well shall we take the jury as it stands?"
The Accused—"Better fire the married women counsellor. They always convict on the slightest circumstantial evidence."

DISEASES OF POULTRY CAN BE PREVENTED

(Experimental Farms Note.)

During the past few years the increasing demand for eggs of a standard quality, and the high prices prevailing for this commodity, have led to an effort amongst Poultry Instructors and Pioneers in poultry raising, to stimulate this industry by advocating the use of backyards in cities and waste ground in rural districts for maintaining a small flock of fowls. It has been shown that a decided profit can be made where ordinary precautions are taken in regard to feeding, cleanliness and selection of breeding stock.

With proper care, most common diseases can be prevented, and of all the measures directed towards this end, sanitation plays the most important part.

This is especially true on small holdings where the runs are limited and must if necessity be used year after year. Where it is not possible to rotate the runs, the entire surface after being covered with a good coating of air-slaked lime should be ploughed or spaded. This precaution serves to keep parasites such as tape worm, roundworms, gapeworms, etc. in check by destroying the eggs which are nearly always present in the soil. Droppings from fowls should never be spread on land to which chicks have access, and during the fly-breeding season all manure should be kept in covered boxes or treated with some good disinfectant before being put upon the land. This applies more particularly to small holdings and to plants devoted exclusively to raising poultry. All chicks which die should be burned and it is a good plan to kill all weaklings and dispose of them in a similar manner. Close observation is essential to pick out ailing chicks or fowls and these should be isolated from the remainder, until the exact nature of the disorder is determined. Particular attention should be paid to the feed and drinking water and where young chicks are concerned, a daily scalding of the drinking fountains and feeding dishes will well repay such effort. Tuberculosis is a disease of adult fowls and is less frequently observed in pullets than in older birds. Tuberculosis is usually introduced by buying pullets or stock from outside sources and such a precaution often safeguards except when purchasing from reputable poultrymen. Where exhibition stock is kept, all show birds should be segregated for at least two weeks upon their return from exhibitions, as such a precaution often safeguards the flock from a serious outbreak of chicken-pox. In introducing new breeding stock, even if from reputable sources, the practice of quarantine is a safe plan to follow.

The proper disinfection of fowl houses, etc.; the quarantine of recently imported fowls or those returning from shows; the elimination of spoiled feeds and impure drinking water; the sacrifice of ailing birds to determine the nature of the disorder, as well as the burning of all dead fowls, are measures, which if carefully followed will do much to keep flock in a healthy, vigorous state and make the keeping of poultry a pleasant, profitable enterprise.

Where there is doubt let mercy decide.

BOY'S OWN SOAP

Boys just love its smooth fragrant lather

BEST FOR BABY

BOOZE LADEN VESSEL HAS BEEN SEIZED

Cranston, R. I., June 20—The schooner Katie B., loaded with \$15,000 worth of liquor and alleged to be a rum runner, was seized in Narragansett Bay by Cranston police.

Members of the crew, with Capt. Frank W. Fairfax, 25, of New Orleans were arrested on charges of violating the liquor laws. They were brought to Cranston for arraignment.

The schooner arrived near the Rhode Island Yacht Club, and Patrolman Arthur Wilson, detailed to watch for rum runners, noticed a considerable stir in that vicinity. He investigated and found a motor car filled with liquor. Then he followed some of the men connected with the machine, and when they pushed off in the rowboat for the schooner the policeman ordered them to halt.

Pass Destroyers

When the chief of police was notified he went with six men to the schooner and seized 100 cases of whiskey, a barrel of whiskey and other liquors.

It is alleged that the liquor shipment was consigned to Charles Reitsman, the owner of the craft. The automobile filled with liquor was also owned by Reitsman.

In coming up to the yacht club, the rum schooner was forced to sail directly through a fleet of 24 United States destroyers anchored in Newport Bay.

SAYS THAT HE WAS AIDED BY SPIRITS

New York, June 20—That every mile of the 3000 miles of railroad he has built has been constructed by following the advice of spirits and that he changed the direction of the Kansas City Southern and built his terminal at Port Arthur, Tex., rather than Galveston which the spirits warned him to avoid because of coming disaster there is the assertion of Arthur E. Stilwell, who says he has been president of many railroads and was president for seven years of the National Surety Company.

Making his revelations last night at a meeting of spiritualists he said that he had not revealed his relations with the spirit world before because he did not want "people to think him a nut."

"I have built more than 3000 miles of railroad," he said "and every part of the route was determined by spirits who came to me in my dreams and told me what to do."

"When I was building the Kansas City Southern I was warned not to build the terminal at Galveston by spirits, because it would lead to disaster. They told me to terminate it at Lake Sabine, where I built the terminal of Port Arthur. Four days after the terminal was completed the tidal wave wiped out Galveston."

"I receive communications today from a corps of spirits. The engineering plans that I have put in effect have all come from an engineer who has been long dead. I have transcribed scores of poems which have been dictated to me by poets. I have written the music of many songs which have been dictated to me by musicians."

Mr. Stilwell returned recently from England, where he had been for several years. In one year there he produced twenty-one full-length spirit novels, twenty of which are now in manuscript. One of them entitled "The Light That Never Fails," has been printed. Among those not yet printed are "In God's Own Times," "The Bursting of the Chrysalis" and "The Court's Decree" the hero in the last ignorant of the identity of the prisoner sentences his own mother to die by hanging.

A NEW BRUNSWICK COMPANY

The Canadian Gazette announces the incorporation of the Maritime Import and Export Co., Ltd., with Joseph Harold LeBlanc and Maurice Percy McNece, salesman; James Athanasius MacLellan, sales manager; Gladys Mae Elliott, stenographer, and Clarence Seymour Mitchell, manager, all of the city of Montreal as partners in the concern. The company is authorized to carry on business as brokers and commission agents has a capitalization of \$100,000 and a home office in Woodstock (N. B.).

IF TORMENTED WITH CORNS USE

Used an old razor for paring his corns. Foolish because 25c. buys a bottle of Putnam's Painless Corn Extractor which for fifty years has been removing corns and warts without pain. No failure if you use "Putnam's." Refuse a substitute. 25c.

MAIL CONTRACT

Sealed tenders, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 21st July, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 6 times per week on the route: Fredericton Rural Route No. 2, from the 1st January, next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Offices of Fredericton, Barkers Point and Maseguerville, and at the office of the Dist. Supt. Postal Service St. John.

PALMER'S
Moose Head Brand
Summer Packs & Plow Shoes

SLIP on a pair of Palmer's Summer Packs or Plow Boots, and you will realize what Farm Foot Comfort really means. Added to this, you have strength and durability, making a combination of good features seldom found in one pair of boots.

Palmer's Summer Packs and Plow Boots are hand made and hand sewed by expert workmen. The bottoms and uppers are made from Palmer's Famous Skowhegan Waterproof Leather, rich dark brown in color, very soft and pliable. Bottom part of uppers runs clean under, a great advantage over the lasted under boot.

Soles are attached by special clincher nailing process or sewed by lock stitch process.

A splendid boot for plowing or any kind of hard outdoor work.

Get a pair from your dealer, or order direct from us.

Write us for our catalogue No. 43.
