Some Notes of Interest To Those Who Till The Soil

Rains are interfering with wheat harvesting in Argentine.

The poultry house must be well ventilated, but draughts are fatal.

Marquis wheat is still the most popular variety among Western farmers.

The purchase of a good bull is the cheapest means of improving the herd.

Nearly 40 per cent of the farms in the United States are operated by tenants.

The threshing machine was adopted by the Dutch agriculturist about 60 years ago.

The sire is half the herd or flock. If he is not the type you desire to produce get another.

The live stock will be benefitted by a little exercise in a sheltered barnyard on sunny days.

By removing the cobwebs and washing windows many stables will be made a good deal lighter.

When cutting out the year's wood supply this winter plan to thicken the thin spots in the bush by reforesting next spring.

Where the harvest was made up of lightweight immature grain, one should not hesitate about buying a supply of good seed.

According to the Canada Seed

Control Act corn sold as No 1 grade must test 95 per cent. germination, and it will pay to buy only this standard.

After all, wool is only a by-producting lamb and mutton, particularly on farms where there is a piece of rough land.

Fodder is none too plentiful this season. Even the driest straw is palatable when put through a cutting box and fed mixed with ensilage or chop.

A more cheerful report comes from New Ontario in the statement that farmers in Fort William district are actively engaged in taking out pulp wood and logs.

No one can afford to sow poor seed. A crop produced from the latter will always be a disappointment and costs as much to handle while not paying half the returns as one from good seed.

While gate receipts at Guelph WinterFair were \$2,000 less than last year, there was a surplus on hand of \$5000, being the second of its kind in the past ten years.

It is poor economy to cut down the feed ration of the dairy cow unless the market for her produce has been cut off. At present prices there is still money in the purchases of feed for this class of animal.

Much of the fertilizing value of manure is lost when piled in the barnyard till spring. Plan to haul it out to the fields as made. There when spread or piled in small heaps the bulk of this valuable by-product is utilized by next season's crops.

The formation of community breeding clubs is being advocated by the extension department of the Saskatchewan College of Agriculture as a method of meeting existing agricultural conditions by improving the quality of farm products.

A Good One.

Mr. Walter S. Bailey of this city has a Plymouth Rock pullet, which during the months of November and December produced 49 eggs. It started laying on Nov. 10th and by the end of the month had produced 20 eggs. In December it laid 29, bringing the total up to 49. The bird is of the famous Parks strain from stock which Mr. Bailey imported from Atoona, Pa.

Not all big stories start with "once upon a time." The common variety of liar doesn't use any fairy-tale decorations.

Many a woman's idea of complete happiness is to have a charge account and spend an entire afternoon buying \$3.65 worth of merchandise and passing it on to her husband.

PIMPLES ON FACE DIDN'T LIKE TO GO OUT

Those nasty little pimples that of the body are simply indications that break out on the face and other parts the blood is out of order and requires purifying.

There is only one way to get rid of this obnoxious skin trouble, and that is by giving the blood a thorough cleansing which can best be done by that old reliable blood medicine

BURDOCK BLOOD BITTERS and when the blood is purified the pimples will vanish and you will have a clear, healthy complexion.

Miss Mary E. Flanagan, R. R. No. 3 Stella, Ont., writes: "I suffered for about two years with pimples and blotches breaking out on my face. The doctor said it was caused by bad blood. My face was so bad I didn't like to go out among a crowd of people. One day I was talking to a friend, and she advised me to get a bottle of Burdock Blood Bitters and try it. I just took three bottles, and there was not a blotch or pimple of any kind left. Some of my friends asked me what I had used and I said, 'Burdock Blood Bitters chased them'."

B. B. B. has been on the market for the past 45 years, so you are not experimenting with some new and untried remedy.

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

A. O. H. Meeting Postponed

The meeting called for the installation of officers for Thursday the 5th inst. has been postponed to Wednesday, January 11th.

Mrs. J. E. Johnston

For the City or Country Family The Corona Range Meets Every Requirement

Let us tell you about ONLY ONE of the leading features that has made the CORONA RANGE supreme

"Corona" Fire Box

The Corona Fire Box is the result of years of experience in range building. It is not too deep, nor too wide but just right for economy of fuel.

Every Corona Fire Box is ventilated, providing a free circulation of air to enter around the fire bricks through openings in the frame. The air in these chambers becomes heated, and as it gets warm it seeks to rise and is carried through small holes in the bricks into the fire box just above the coal. The oxygen in the heated air unites with the coal gas, causing combustion, and the series of small jets of flame is the result. Until the gas is all consumed the coal remains unburned, but after the gas is burned the coal ignites. Your coal gas is the best of your coal—why let it escape through the chimney.
