J. S. SCOTT,
Secretary Treasurer.
Municipality of York County, N. B.

RESTOCKING ONTARIO FORESTS; MANY THOUSANDS OF SEED- LINGS TO BE SET OUT

(By Dr. C. D. Howe.)

At the Ontario Forestry Station at
St. Williams, about 500 acres are now
under plantation and the nursery
contains upwards of 15,000,000 young
trees. There are about 5,000,000 more
seedlings at the two subsidiary nur-
series, one at Orono, Durham County
and the other at Midhurst, in Simcoe
County, established last year. The
mother nursery in Norfolk County
since its establishment has distribut-
ed around 6,000,000 seedlings, chiefly
to farmers, for the planting up of
waste places, or at a rate of 350,000
seedlings a year.

At the present time it supplies a
great deal of material for planting in
the cooperative arrangements be-
tween the counties and municipalities
as well as stock for fixing 700 acres
of shifting sand in Prince Edward
County; in all over a million seed-
lings and cuttings were distributed
last year.

The production of 20,000,000 seed-
lings in the Ontario Provincial nur-
series is preparatory to the Govern-
ment's plan of reforesting 10,000 acres
of waste land in Old Ontario, each
year for at least 60 years. The Pro-
vincial Forester estimates that 600,-
000 planted acres, all within 100 miles
of the principal markets, eventually
would yield more sawlog material
than it now gleaned from over eleven
million acres of timber limits under
license scattered from one end of the
provinces to the other.

A forest nursery was established
in the Province of Quebec at Berthi-
erville in 1908 and since that time
about four million seedlings have
been distributed for private planting
and in addition more than 300 acres
of shifting sand areas have been re-
claimed. The latter is the beginning
of the Forest Service program of re-
foresting as much as possible of the
three million acres of waste land
within the province. Quebec has also
under consideration the establish-
ment of communal forests.

The planting of forests in Canada
is not confined to Government orga-
nizations. It is a notable and signifi-
cant fact that certain pulp and paper
companies are carrying on reforesta-
tion programs, the leader in the work
being the Laurentide Company at
Grand Mere, Quebec. The forester of
this company established a nursery
in 1912. In the eleven years the nur-
sery has grown from a few square
rods to 20 acres in extent and it now
contains 15,000,000 seedlings and
transplants. The company has planted
2,500 acres. Practically all the work
has been done on purchased lands,
not on lands leased under timber
limit regulations.

The Riordon Company established
a forest nursery and has reforested
about 300 acres. The Abitibi Company
and the Spanish River Company have
forest nurseries and are initiating re-
forestation programs.

I can find no statements in the
various official reports as to the ex-

Joint Stiffness Goes, Swellings Disappear, Pain is Subdued

No Liniment Gives Such Universal
Satisfaction as
NERVILINE

It is the great penetrating power of
Nerviline that makes it so efficient in
overcoming swelling, stiffness and in-
flammation. It rubs into the very core
of the pain, penetrates quickly
through the tissues, and brings a
warm comforting relief at once. No
liniment compares in pain relieving
power with Nerviline. For the minor
35 cents at all dealers.
Pains and ills that arise in every fam-
ily, Nerviline should always be kept
handy on the shelf. Use it for Rheuma-
tism, Lumbago, Neuralgia, and Colds.

THE DAILY MAIL is on
Sale
at the following places of business
in the city:—

JAS. MCGUIRE, 522 King Street.
D. H. CROWLEY, 612 Queen Street.
MISS QUINN, 147 West Street.
ALONZO STAPLES, 100 York St.
A. E. EARDLEY, 704 King Street
A. J. HANLON, 83 Regent Street.
W. GRIEVES, Regent & King Sts.

tent of the area under forest planta-
tions in Canada. If, however, we take
the number of seedlings known to
have been distributed by the Domini-
on and Provincial organizations, and
the areas planted by private compan-
ies during the past 20 years, and sup-
pose that they were planted at the
rate of 1,200 per acre, and allow a 20
per cent loss, we find that in the
neighborhood of 50,000 acres have
been planted to trees, or at the rate
of 2,500 acres a year for the past
twenty years. It is only fair to point
out, however, that only a small por-
tion of this area is what would be
strictly called forest plantation. Much
the greater portion consists of shel-
ter belts and small patches of waste
land on farms. So far as I am able to
ascertain, there are about 6,000 acres
of actual forest plantations, for the
purpose of timber production alone,
in Eastern Canada.

Forest planting for purposes of tim-
ber production will without doubt re-
sult in profitable investment in the
older portions of the country where
markets are near and adequate fire
protection is assured, but neither of
the two latter conditions applies on
much the greater portion of our fer-
ested area. Here in most cases arti-
ficial reforestation is not indicated.
The function of forest planting is
to supplement our main forestry ef-
fort, which is the guidance of nature's
creative and regenerative forces in
the forest.

MOTHER

Child's Best Laxative is
"California Fig Syrup"

Hurry Mother! A teaspoonful of
"California Fig Syrup" now will thor-
oughly clean the little bowels and in a
few hours you have a well, playful
child again. Even if cross, feverish,
bilious, constipated or full of cold,
children love its pleasant taste.

Tell your druggist you want only
the genuine "California Fig Syrup"
which has directions for babies and
children of all ages printed on bottle.
Mother you must say "California."
Refuse any imitation.
