WHY MONEY IS SCARCE.

In Ontario, last year, licenses were issued to 210,000 passenger motor cars and 24,000 commercial cars, not to mention 4,700 motorcycles. Allowing an annual outlay for operation of \$400 for each one of the 234,000 cars means a total of \$94,000,000, and supposing cars cost on an average \$1,000 each and allowing 15 per cent. for replacements gives another \$35,000,000, or a total of \$129,000,000. Ontario's most valuable field crop is hay, which in 1921 was valued at \$76,000,000. Adding the second crop, oats, at \$36,000,000, it would still be necessary to throw in the greater part of the cattle sold and slaughtered, value \$37,500,000, in order to pay 1922's automobile bill. Or to put it another way, the total value of Ontario's field crops in 1921 was \$222,000,000, and more than half of it was spent on automobiles in 1922—much more than half if the expenditure on roads and other incidentals is considered. There is no doubt that as here, so in the sister province, the ubiquitous motor car has completely revolutionized the life of the people.

Commenting upon the fact of this revolution in the life of the people, an esteemed Ontario exchange points out money for cars has necessarily had to be taken from many other things and says: "It has been taken from anything and everything else in order to use it in this way. There is a shortage of houses. We cannot have 234,000 motor cars, and we cannot maintain them at a cost of \$400 a year each, without having fewer houses built than would otherwise have been built. If everyone must have a car and some sort of garage to keep it in, everyone cannot also afford to build an addition to his dwelling with a sunroom on the second story. If a family takes its recreation motoring, it probably decides not to build a summer cottage in the country. The province spends one hundred and thirty millions a year on motors, which only a few years ago were not in existence. The motor car makes living cost more, and, no doubt, makes it worth more. But where do the people get the hundred and thirty millions to meet this new expenditure?"

UNSOLVED MYSTERIES.

That was an interesting bit of news Commissioner Enright of New York released by radio the other night—to the effect that the police are "morally certain" who were the slayers of Joseph B. Elwell and Dorothy King Keenan. But one per cent. of the evidence deemed necessary to justify arrest is said by the commissioner to be lacking.

That one per cent. is a serious deficiency. It protects the murderers from punishment. It affords them ample time to escape the clutches of the law—clutches which one of them has eluded for nearly three and one-half years and the other for more than six months. In fact, Commissioner Enright's statement serves as an exceptionally broad hint for the guilty ones to drop out of sight. The only thing that may keep them from so doing, is the fact that the murderer in each of these cases is probably so constituted that he or she would suffocate in any other atmosphere than that of Manhattan's fast set.

The commissioner's boast is, after all, a poor apology for the failure of his department to effect complete solutions. The announcement of a 99 per cent. answer to each of the riddles warrants the public in demanding that the missing one per cent. be

speedily secured. The part of a solution which is hard to get is the first part, not the last small fraction.

Mr. Lloyd George is of the usual acrobatic type of successful politician, being able to keep one ear to the ground and at the same time have both eyes peeled.

An octogenarian now is satisfied. He has lived to see an airplane go up and the price of gasoline come down.

Justice may or may not be blind, but she must get eyestrain sometimes watching for judges to get back from the links.

Even after all the forest fires there is always timber enough left for party platforms, although they may not mean much.

It appears it is the family doctor's opinion that a \$2 bill is something many are superstitious about parting with.

His ability to wear a crown like a sport cap is one thing that has helped make King Alfonso popular.

The bobbed hair fad will end apparently, when the bobbed hair fadists are ready to end it.

The question is up again, "What is a luxury." It's something you wonder how the neighbors can afford.

Perhaps a better time for New York vs. New York could not be picked than the chestnut season.

Still, what difference does it make if the Leviathan menus are in French if the weather is rough?

A California man says he can talk to monkeys. Well, perhaps, at times one might as well.

Men are gradually coming into their own. In Chicago one has been awarded alimony.

Where did the author of "If Winter Comes" get that "if?"

The lull must mean that the Balkans are thinking up a new war.

If silence is golden President Coolidge must be a millionaire.

Just possibly, the New Jersey dog that bit 35 people is an epicure.

THROUGH OUR SIEVE

A wise man thinks twice before he speaks. A fool can't.

Gasoline vapors are always ready to meet a lighted match half way.

"Give us all the things we want" remarked the Man on the Car and we will want more."

More good intentions than chickens are left to die in the shell.

Perhaps the fellow who is asking for a new model religion wants one that will butt the locomotive off the track.

Half the people are looking for thrills and the other half for a kick. And then they wonder why they're not happy.

No other animal is like the dog. Cut off six inches of his tail and he will wag what is left as evidence of his faith in mankind's good intentions.

Says a college professor: "Don't get married on less than \$4,000 yearly salary." Fortunately few young people take advice from college professors.

Reverting to the weird inclination of the hen to cross the road, there are now a hundred reasons why she shouldn't make the attempt where there used to be only one.

Practically Assured.

Mr. J. A. Creaghan, of Newcastle who has been acting solicitor for the Canada Cresscoting Co., has received a telegram instructing him to close all options on properties taken by them for their new proposed plant at Newcastle. This action of the company would indicate that Newcastle has been definitely decided on as the site of location for the industry.

GUIDE CREMIN IS HAVING A BUSY SEASON

Mr. Charles Cremin the well known guide of this city, arrived by auto yesterday on a brief visit from his sporting camps on the headwaters of the Nepisiguit. He says that business has been exceptionally good with him this season. He has had out eighteen non-resident hunters so far and all returned well pleased. Seven moose heads with an average spread of fifty-two inches were brought out of Mr. Cremin's camps one day this week. Although most of his camps were destroyed by fire during the summer, involving a heavy loss, Mr. Cremin rebuilt them and has been able to handle all of the business that offered. He has more parties coming in next week and hopes to secure a number for November. He plans to return to the Tobique tomorrow morning.

PERSONAL MENTION

Mrs. George W. Allen left last evening on a trip to Boston where she will spend her vacation.

Lieut. Col. J. Layton Ralston, K. C., of Halifax, who was here attending the sittings of the pulpwood commission left for home last evening.

Surface Sewer Completed.

The surface sewer in Phoenix Square laid to relieve flood conditions on the property of R. Chestnut & Sons, has been completed by the city.

Little Unemployment.

The Fraser Companies Ltd., which annually employ about 1400 men at their camps at Plaster Rock say that there is little unemployment in this province or in Prince Edward Island. At the present time only about 600 have been obtained and 800 more are wanted. The Company is experiencing some difficulty in obtaining them although the wages range from \$45 to \$50 per month and found.

PAIN IN THE JOINTS

Is an Indication That the Blood is Thin and Watery.

The first sign of rheumatism is frequently a pain and swelling of one of the joints. If this is not treated through the blood, which is the seat of the disease, the poison spreads, affecting other joints and tissues—sometimes rheumatism attacks the heart and is fatal.

A remedy that has corrected many cases of rheumatism is Dr. Williams' Pink Pills. These pills enrich and purify the blood so that the poisonous rheumatic matter is driven out of the system as nature intended. Miss Gertrude Denne, Washago, Ont., was attacked with rheumatism and found relief through Dr. Williams' Pink Pills. She says: "About a year ago I was attacked by rheumatism and for two weeks was confined to my bed. The trouble was so painful, affecting the joints of my limbs so that I could not stand alone. Mother had a box of Dr. Williams' Pink Pills in the house and thought they might help me. I began taking them, and when I had taken these pills got a further supply, with the result that the rheumatism vanished and I was a well girl. I may add that my mother and two of my sisters have also used the pills for various ailments with equal success, and now we are never without them in the house."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or by mail, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Holeproof Hosiery

FOR WOMEN

All Silk All Lisle, Silk and Wool, in all the new shades. Sizes 8½ to 10½.

For Long Wearing, Shape-keeping Hosiery buy—"HOLEPROOF."
