AROUND

the TOWN

The silver black fox industry seems to be taking hold in this section and bids fair to become an important adjunct to agriculture. The Fredericton Silver Black Fox Company which is located on the old road opposite the golf links has lately enlarged their plant. Last year they wintered twenty pairs of foxes and this winter they plan to keep thirty pairs. The product last year was fifty four pups, most of which are now full grown and will be used for breeding purposes during the coming winter. A number will be taken away by their owners and used as foundation stock for new farms. Among the farmers who have engaged in fox ranching on a small scale is Mr. John W. Camber of Springhill, who has several pairs of the best stock obtainable. Mr. Camber is looked upon by many people as the most successful agriculturist in the County of York. He carries on mixed farming, giving special attention to fruit growing and has no difficulty in making ends meet. He expects to make good out of his foxes and will do so beyond a doubt. The best type of black-foxes are easily worth from \$300 to \$500 each and if properly caged it is not a difficult matter to take care of them. The cost of feed is not an important item, compared with what it takes to keep up a horse or cow and the returns are a great deal better. A good pelt is easily worth \$300 and it is possible for a yearling animal to produce such a pelt. The rigid winter climate of central New Brunswick readily lends itself to the growth of fur and incidentally is very beneficial to the black fox industry. In tropical climates they are able to grow cotton and sugar and such like, but fur farming is an industry peculiar to the north. The day will surely come when many of our farmers cease giving their surplus cash to other people to spend and take a chance on a pair of silver black foxes.

The freshmen class at the University this year numbers over sixty the largest on record. There are a lot of bright young men in the class and if they exercise diligence in the pursuit of their studies who knows but that they may all become "judges and governors, wits and sages, writing their names on history's pages." Since Confederation the old university has produced one governor, and its graduates include three judges who now sit on the Supreme Court bench of the province. There is no record of the number of wits and sages who spent the days of their early manhood climbing college hill.

The Agricultural School at the Fredericton Experimental Station will open on November 5th for a six weeks course and the prospects are bright for a large attendance of students. The establishment of this school will mean a big forward stride for agriculture in New Brunswick and much credit for it is due Hon. D. W. Messersau, Minister of Agriculture and Mr. C. F. Bailey the bustling superintendent of the Experimental Station. Agriculture is a very complex proposition and life is altogether too short for any one man to learn all about it. Public men of all shades of politics recognize in it an industry that must be assisted by the state, and they are always willing to lend it a helping hand. The farmer who labors under the belief that he knows it all is living in a fool's paradise. The Government Experimental Stations have in their employ experts who devote all their time to scientific research and these men will be the first to tell you that they have still a whole lot to learn. They do not know it all but they are ready and willing to impart instruction on such subjects as they have mastered and what they have to teach will mean many dollars to the farm boys of New Brunswick. Even though wages are likely to be high in the lumber woods during the coming winter, from an economic standpoint it will be far more profitable for the sons of farmers to take the short course in agriculture beginning at the Fredericton School on November 5th. Everybody knows that the farmer has to scratch these days to make ends meet and it is therefore of the utmost importance that he should be thoroughly posted on the latest methods and know how to eliminate waste. The farmer or farm boy who can start in now and make two blades of grass grow where one grew before will be a public benefactor and will not experience a great deal of difficulty in finding the

wherewithal to meet his living expenses. New Brunswick is one of the best provinces in the Dominion, but we should not close our eyes to the fact that it is the people who make a country. The members of the Fredericton Rotary Club are manifesting the keenest interest in the new agricultural school and their commendable efforts should be heartily seconded by other public bodies.

The Rotary Club has despatched a contingent of wild fowl shooters to Tabusintac to secure the chief elements for a game supper to be held the evening of Tuesday, October 23rd at the Masonic Hall. It is proposed to issue invitations to a number of people interested in the important subject of fish and game protection. New Brunswick derives a big revenue each year from its fish and game, and the proper conservation of the same is therefore a matter in which all citizens should be deeply interested. If our forefathers had been game and fish hogs people of the present generation would never have experienced the joys of the chase. It is very important, therefore, that we should consider those who are to come after us and protect the game and fish. The Rotary Club has been fortunate in securing two experts to deliver addresses on the occasion of the annual game supper. One is Mr. Tufts, migratory birds commissioner, and the other is Thomas F. Allen, for thirty four years superintendent of the Tobique Salmon Club. The people of the province should be vitally interested in any industry which contributes to the public revenue each year a sum in the vicinity of one hundred thousand dollars. New Brunswick will gather in that amount during the present year. Mr. Allen who is regarded as the best authority on salmon fishing in the Dominion of Canada, will have a message which will be well worth listening to and Mr. Tufts will also have something to say of great public importance. New Brunswick's fish and game is certainly an important asset and everything possible should be done to preserve it. The salmon is the greatest of game fish and the New England States depend on New Brunswick for the bulk of their supply. Many carloads from the waters of the Miramichi pass through Fredericton each week during the summer months, consigned to the U. S. markets. The Southwest Miramichi is looked upon as one of the greatest salmon rivers in the world but it is being destroyed by illegal fishing. Something should be done to put a stop to this and the people of Fredericton are in a position to help.

Henry Ford of auto fame is being boomed as a candidate of the presidency of the United States. Mr. Ford is reputed to be the richest man in the world and as everybody knows he made his money as the inventor and manufacturer of the Ford car better known as the "flivver." Mr. Ford built his first car in 1903 just twenty years ago and he had a difficult time of it securing the necessary capital. He visited a sportsman's show in Boston in that year and there met a well known citizen of Fredericton whom he tried to persuade to take stock in a company which he was trying to organize. He wanted the Fredericton man to invest the sum of one thousand dollars in stock, but he could not see his way clear to do so and turned down the proposition. Had he accepted it he would to-day have been worth at least six million dollars in coin of the realm.

OXFORD DEBATERS BEAT ACADIA

Wolfville, Oct. 19—Oxford debaters added one more victory to their list when they won from Acadia University debaters here tonight.

The Fall Weather Hard on Little Ones

Canadian fall weather is extremely hard on little ones. One day is warm and bright, and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

PIONEER CLERGYMAN REMEMBERED

Continued from Page One
17th July, 1922" and reads as follows: "I do hereby certify, that David George, a free negro man, has permission from his Excellency the Lieutenant-Governor, to instruct the black people in the knowledge, and exhort them to the practice of the Christian religion."

(Sgd.) JON. ODELL, Secretary.

After preaching for a number of years in Nova Scotia and New Brunswick he went with a colony of his own color to Sierra Leone where he ended his days.

Founded Strong Church

David George laid the foundation of the Baptist colored work in Nova Scotia. Out of his labors and sacrifices has grown the Nova Scotia African Association composed of twenty-two churches with a membership of 757 and church property valued at \$55,000.00.

The colored people of the city were invited to the service last night and a goodly representation was present. They enriched the musical service with three numbers; a chorus, a duet by Mrs. Eatman and Mrs. Morse, and a solo by Mrs. Morse.

SPIRITUALISTIC WRITINGS WERE FRAUDULENT

(Continued from Page 1.)
Written plainly in pink on the card amid the stains of flowers, was the sentence: "Truth crushed to earth shall rise again."

On a second card, in heliotrope, was written: "How happy I should have been for an opportunity such as this"—William James.

Another card carried a message from a living friend of Mrs. Stewart. The "medium" insisted that friend was in New York at the moment of the test. Altogether five other sentences appeared on the flower stained cards.

"This is the first successful objective test we have heard of," said Mr. Bird after it was over, "but are going to ask Mrs. Stewart for more proof. We are going to sift what she has done as far as we can. We are going to ask her to try to do it again. We feel that the interests of science demand that should be done before we grant her the prize we have offered."

STOPS PAYING HIS DOCTOR IF HE FALLS SICK

Philadelphia, Oct. 20—Five years have now elapsed since Samuel M. Vauclain, president of the Baldwin Locomotive Works, made a contract with a physician to keep him in good physical condition for 10 years.

Vauclain said today he agreed to pay a flat sum every year for being kept well, increasing this sum each year on the assumption that the older he grows the more difficult it will be for him to keep well.

Under the contract, if Vauclain falls sick, a deduction is made from the doctor's annual retainer, according to the length of time of his illness.

"I have been sick," he said, "and I didn't like it. I did not want it to happen again. Since the inception of this contract I have kept my part of it, and my doctor has kept his, except once or twice. I have been examined not less than every two weeks and have guided myself entirely by the doctor's instructions. In that time I have not lost a day from business nor have I been ill in any way. I am heavier, stronger and more active than I was five years ago."

Late William Nealis.

The funeral of the late William Nealis took place this afternoon from his home, Royal Road. Solemn Service was conducted at St. Anthony's Church, Devon by Rev. Father Conway. Interment was made at the Hermitage.

WEEK-END MARKET.

Although the rain was heavy there was a large attendance at Phoenix square this morning when the week-end market was held. Prices were steady in general. They ruled as follows:—

Eggs per dozen	55 to 60 cents.
Butter per lb.	40 to 45 cents.
Potatoes per bbl.	\$1.75 to \$2.
Chicken per lb.	30 to 35 cents.
Fowl per lb.	20 to 25 cents.
Carrots per bbl.	\$2.25.
Turnips per bbl.	\$1.
Veal per lb.	10 to 12 cents.
Pork per lb.	14 to 16 cents.
Lamb per lb.	16 to 24 cents.
Beef per lb.	7 to 20 cents.

Lights in Ten Days

The twelve lamps to be installed by the city on the river road between Salamanca station and the Experimental Station are to be in operation in ten days. The pole-line is completed to Wilsey Road and fifteen men are at work below that point. The line to the Experimental Station will be carried on the same pole-line.

To Compete at Amherst.

Earle Lister and Carl Byers of Harvey are to compete in the pig judging competition at Amherst Winter Fair as a team from the Harvey Pig Club. James Bremner, livestock superintendent, recently visited the Harvey Pig Club and saw some excellent animals. The boys proved themselves keen judges.
