

CORONA RANGES

Corona Ranges back to the beginning have been one long line of success.

Whatever science and research have revealed in tangible improvements in cooking, baking and fuel economy have been incorporated in the "Corona" Range. A wonder in performance. Its supremacy in construction is as great as its supremacy in appearance.

Ranges, like men, build fame on character.

Character is built on high ideas rigidly maintained. Briefly, this is the idea behind the "Corona." Conscientiously built it tells its own story in a most vivid way in your home. For Sale by

AROUND

the TOWN

There has certainly been some class to the weather we have experienced during the month just closed. It is not often within the memory of living man that the month of December has been ushered in with the ground as free from snow as in July and with the river practically clear of ice. It has certainly been a remarkable season and the proverbially oldest inhabitant has difficulty in recalling anything to equal it. So far the woodpile has had an easy thing of it, but there has been no slump in the price of wood. The wood barons knew a few things; they know that we are pretty certain later on to get cold weather and lots of it, and the woodpile will then catch it. In the meantime the price holds firm at the old figure of fourteen dollars per cord for furnace wood. On only a few occasions during the last half a century has the river remained open on December 1st, and it may be many years before it happens again. The mild weather has greatly retarded the skating season and hardware dealers report little or no demand for skates up to the present time.

The new concrete sidewalks laid last summer are demonstrating their usefulness these days and stand out in marked contrast to the old asphalt walks. On many of the back streets the asphalt walks are much the worse for wear. There are miniature hills and valleys all over them. The hills are destructive to footwear, while after a rainstorm the valleys become miniature lakes of sufficient depth to wet the feet. There is no chance for water to linger on the concrete walks, and they are much easier on footwear.

The new C. P. R. station is rapidly approaching completion and is being much admired by those who have occasion to visit that part of the city. It is understood that when the new building is ready for occupancy the old one will be torn down. The old station while not much to look at, served a good purpose in its day. It is Fredericton's pioneer railway depot, having been built when the Fredericton branch was opened fifty-five years ago. The Fredericton Branch which was the first railway to enter the city, was built and operated for some years by a local company. It received very generous subsidies from the province and municipalities and it is said that when completed the company had a snug cash balance on hand, which has not been the case with more modern railway enterprises. Our esteemed townsman, F. B. Edgecombe, was the first superintendent of the Fredericton branch, having taken up his duties in 1869. This means that he was a railway superintendent before Sir Henry Thornton, the present head of the C. N. R. system or President Beatty of the C. P. R. were in the land of the living.

Residents of Fredericton's fashionable east end complain, and not without reason of the noise made by railway locomotives in the early morning hours when they are trying to have their beauty sleep. They declare that it has become a positive nuisance and the time has arrived when some steps should be taken by the authorities to have it modified or suppressed. The C. P. R. is given the credit for being the worst offender. The locomotives of this company usually turn up at the "Y" at an unseemly hour and snort and blow their whistles to beat the band. Only those who are fortunate enough to be deaf are able to roze when these iron horses start on their early morning rampage. When their happens to be sickness in a household, within the railway zone, no mercy is shown by the locomotives or rather by the men in charge of them. The average layman finds it difficult to understand why it is necessary for a locomotive on a branch

When You Use Pills You Need Them Active

Dr. Hamilton's Pills Give Results Quickly

Splendid for Headache, Biliousness, Backache and Constipation.

To those who need something to stir up the system, to drive out the waste—to those who need a laxative medicine that will act promptly upon the stomach and bowels, Dr. Hamilton's Pills are recommended. To enjoy good appetite, sound digestion, to be brisk, full of pep, always at your best, regulate your system with Dr. Hamilton's Pills. Good for men women and children. 25c at all dealers.

line to kick up such a rumpus in the early morning hours. A lot of it appears to be quite unnecessary and a change for the better might be brought about without any harm being done to the interests of the railway.

Not very long ago the humble yeastcake, a neat tin foil package, sold at two cents each in local grocery stores. Now it sells at four cents, which is an increase of one hundred per cent. The average housewife looks upon this as too much of a good thing and many of them are boycotting the yeastcake and are going back to the old fashioned home made yeast. After all one cannot very well blame the yeastcake for the rise in price as it has simply become imbued with the spirit of its surroundings. It has risen in price and now the housewife has risen to the occasion by making her own yeast.

A change in the charter made at the last session of the Legislature at the request of the city council will bring on the civic elections for 1924 early in January instead of in March. One result of the amendment is that civic taxes have got to be paid this year on or before December 12th in order to qualify for a vote in the civic election. There will be one advantage in the change for those who can justify the new franchise taxes as they will save two months' interest on the amount due. There is also a disadvantage as if the taxes are paid money for Christmas shopping is not likely to be so plentiful as would otherwise be the case. The city will have the money and its overdraft in the bank at the end of the year will be reduced in proportion, but the city is not strong on Christmas shopping. The change also has its advantages and once the habit is formed of paying in December there is not likely to be any kick coming. Still for the present year the merchants have reason to feel that the city has passed them the buck.

A St. John merchant who attended a convention of business men in Montreal a short time ago, was compelled to listen to a lot of hot air on the importance of educating the people to buy Canadian made goods. The next morning on repairing to the hotel dining room for breakfast his faith in his associates was considerably shaken when one after another they each ordered either California grape fruit or oranges with which to begin the meal. The St. John man remained silent until the waiter approached him, when he called out in tones loud enough for all to hear, "please bring me a New Brunswick baked apple with Canadian cream." Turning to some of those near him he added, "I practice what I preach and it would be better for Canada if the custom was more general." This gentleman certainly said something that time. New Brunswick can grow apples just as good as can be produced anywhere in the world, and being juicy and nutritious, they fit in right as a breakfast food, yet thousands of people give the preference to highly advertised grape fruit and sun-kissed oranges brought from far off California. When a grapefruit or orange costs six cents it is safe to say that five-sixths of that amount goes to dealers and transportation companies. On the other hand practically all the money paid for New Brunswick grown apples goes directly into the pockets of the farmers who produce them. It is good policy to buy Canadian made goods but those who make money selling such goods can help out a lot by buying Canadian grown farm products.

Leaving for Convention.

F. Peacock, Vocational Director of New Brunswick will leave tonight for Buffalo, N. Y., where he will attend the National Convention for Promotion of Vocational Education. A delegation from the St. John Board will also go to Buffalo. Mr. Peacock and the St. John delegates will also inspect various vocational schools in New York State and Ontario.

Successful Class.

The class in motor generators conducted in the C. N. R. freight shed at Marysville as part of the night classes, is adjudged the most successful of its kind in the province last year thirty-five were enrolled in it. This year twenty-seven are enrolled. Bradford Pond was in charge of the organization of the class.

REMARKABLE WEATHER FOR NOVEMBER

(Continued From Page 8.)

temperature. At 2 p. m. thermometers along Queen street sheltered from the sun, registered fifty degrees above zero. There were days in the summer which were not so warm. The probs call for a continuation of mild weather.

Official Statistics.

Official weather statistics for the month as furnished by Dr. C. C. Jones of the University of N. B. for records obtained at the Dominion Meteorological Station. The statistics show the month wetter than usual with less bright sunshine but much higher temperature. The rain following the draughts has been a great boon to the country.

Mean temperature was 36 degrees above zero compared with 31 degrees last year and an average of 33 degrees in fifty years. The highest temperature was 59 on the 3rd and the lowest 11 on the 27th. Last year the highest was 55 on the 1st and the lowest 11 on the 27th. Total precipitation was 4.53 inches. In November 1922 total precipitation was 2 inches. The fifty year average is 4 inches. Hours of bright sunshine numbered 56. Last year the number of hours of bright sunshine was 96. The fifty-year average was 93. Total wind mileage was 4,524 compared with 3,750 in November 1922.

ANOTHER STEEL TOWER TO BE BUILT

(Continued From Page Eight.) Newcastle. This tower will overlook one thousand square miles of forest and will form a very valuable addition to the ten towers already erected in New Brunswick, three of which are of steel. Mr. Pratt, maintains a portable fire-pump with the necessary hose, at his camps at Holmes Lake, which pump is available for forest fires in the vicinity.

Making Good Progress.

Sackville Tribune: Good progress is being made in the erection of the new post office building. The concrete foundation was completed this week and a start has been made on the brick work. The contractors, E. F. Powers Construction Company of St. John, are fortunate in having such mild weather for the work at this season of the year.

CHURCH SERVICES

Presbyterian Church
Rev. J. S. Sutherland, D. D. Minister. Services at 11 a. m. and 7 p. m. Sunday School and Bible Classes at 2.30 p. m.

Rev. H. S. Dow, Pastor. Social Service at 10.30. Sunday School at 2.30 p. m. Preaching at 7 by Pastor. All are invited.

Cause of Backaches

Every muscle in the body needs a supply of rich, red blood in proportion to the work it does. The muscles of the back are under a heavy strain and have but little rest. When the blood is thin they lack nourishment and rebel. The result is a sensation of pain in these muscles.

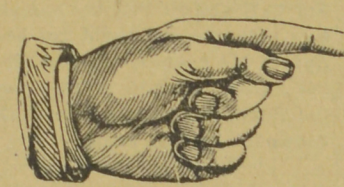

Many people are frightened into believing that backaches are due to kidney trouble, but the best medical authorities agree that backache is very seldom due to kidney trouble. In fact not more than one backache in a hundred has anything to do with the kidneys. The whole trouble is due to thin or impure blood, and those who are troubled with pains in the back or loins, either frequent or occasional, should look to the condition of the blood. It will be found in most cases that Dr. Williams' Pink Pills by building up the blood and feeding the starved nerves and muscles will banish the pains and make you feel better in every other way. How much better it is to try Dr. Williams' Pink Pills for your blood than to give way to unreasonable alarm about your kidneys. If you really suspect your kidneys any doctor can make a test in ten minutes, that will set your fears at rest, or tell you the worst.

All dealers in medicine sell Dr. Williams' Pink Pills, or you can get them by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

ALWAYS READY—The Remington Portable has superseded writing in many a family. Even for the children it is a wonderful help in every way. Though adapted to any business it is invaluable in any home as it is a business machine in a Home Size. A. Milne Fraser, 157 Hollis St., Halifax, N. S.
