NOTICE

Notice is hereby given to pupils
who attained Division 3 in the recent
High School entrance examinations
held in this city, that, in accordance
with Regulation 46 of the Board of
Education they will be further tested
by an oral examination to determine
which, and how many of such pupils
shall receive permits to enter the
High School conditionally. This exam-
ination will be held in the High School
on the 15th, 16th and 17th of August
beginning at 2 p. m. each day.

Students who intend to take this
examination are requested to notify
the Secretary of the School Board.
(Sgd) R. D. HANSON,
Sec. Board of School Trustees.

He is wise who has wit enough for
his own affairs.
Always-at-it wins the day.

ESTIMATE OF FIRE-DAMAGED TIMBER MAY BE EXCESSIVE, ADVISORY BOARD IN SESSION

The Advisory Board of the New Brunswick Department of Lands and Mines held a lengthy session Tuesday afternoon dealing with a large number of important subjects.

All members of the Board were present, Hon. C. W. Robinson, Minister of Lands and Mines, Col. T. C. Loggie, Deputy Minister, G. H. Prince, Chief Engineer, Archibald Fraser of Fredericton and J. W. Brankley, of Chatham.

Hon. Mr. Robinson, Minister of Lands and Mines, announced at the close of the meeting that reports on the quantities of burnt timber had been sent out to the licensees. The largest areas burned were on limits of Stetson, Cutler Co., Shives Lumber Co. and Richards Manufacturing Co.

Estimate May Be Excessive
The opinion is that considerable areas of green timber lands which have not been burned exist within the outer limits of the burned areas and that in them the timber has not been damaged. In view of this fact it is possible that the estimate of damaged timber may be larger than it should be.

Ready to Cut Clean
Messrs. Brankley and Fraser at the session of the Board Tuesday stated that their companies were preparing to cut all fire-damaged timber on their limits. Their companies are Miramichi Lumber Co. and Fraser Companies Limited.

Recommendations Made
The Board recommended the adoption of the Quebec scale for all logs under ten inches in diameter. It was also recommended that the New Brunswick Scalers' Act be in effect in regard to all Crown Lands which will mean that all scalers on Crown Lands must be qualified provincial scalers. The Act is to be in effect October 1st, 1923.

The construction of certain telephone lines was recommended to the favorable consideration of the Department.

Another recommendation was that travel permits be issued from post offices.

Against Spring Burning
The Board considering the question of the burning of brush favored the abolition of spring burning and approved of the circular issued by the Minister regulating the burning of brush and placing it under the supervision of fire wardens.

Burnt Timber Question
The action of the Department in

taking steps to provide for the cutting of burnt timber while still fit for manufacture was approved the idea being that holders of large areas of Crown Lands release to other operators the lands which they cannot take care of.

Lumbermen's Recommendations
The recommendation of the Lumbermen's Association that the Quebec system of scaling and the Quebec system of fire control be adopted were considered.

The Board was not prepared to adopt the recommendation in respect to fire control as it was felt that the Provincial Government system had been carried out successfully and that more information concerning the degree of success which attended the Quebec system should be secured before adoption.

Extension of Lease
The Board also discussed Section 5 of The Crown Lands Timber Act, 1923, which has the intention of providing for the setting aside of certain areas for twelve years with a view toward extension of lease for ten years from 1933 on such areas, and decided to recommend that the provisions of the section be made to apply on shorter notice than is required by the Act.

THE CRINOLINE IN LONDON

London, Aug. 21—The crinoline, after many threats by the dressmakers that they would revive it, is reappearing here. If all reports be true there is danger that it will soon encircle the charming figures of American women too. The crinoline is a tyrant of fashion and usurped monopoly rights in a name which had originally a wider meaning.

The World of Fashion of 1830 speaks of "the new stuff called crinoline" as a material composed of horsehair and thread, used at first for making boots and bottines. Later it was utilized for bonnets, and only in the last resort for the construction of stiff petticoats to distend a woman's skirt. When skirts grew wider and wider the original crinoline material was found ineffectual, but the name was taken over for the metal hoops which so added to the terrors of life in mid-Victorian days.

MOTOR COAT OF KIDSKIN.

New York—A practical and beautiful motor coat seen today is of henna kidskin. It is made on straight lines, with a collar, belt and pockets reminiscent of the army officer's overcoat.
