

**HALF-TON WEIGHT FROM CITY HALL CLOCK FELL**

**Big Smash at City Hall This Morning—Went Through Two Floors of Building—Bolt Gave Way.**

There was a shake-up at City Hall this morning. Not among officials but in the building itself. The jar was caused by the half-ton cylinder of cast iron which does duty as the weight of the striking-gear of the City Hall clock. The weight broke from its moorings and went on a downward voyage of its own. It smashed through two floors. The second did not let the weight completely through, however, and it was found there resting on smashed flooring and a splintered beam.

**At Early Hour**

The smash occurred at about 7.30. Patrolman Fred McLean who was in the police station in the basement directly under the clock heard the noise and felt the tremendous jar in the structure of the building. People in the country market in Phoenix Square surrounding the City Hall also heard the crash. At first the cause could not be found but investigation on the lower part of the tower disclosed ample evidence.

**Fell Thirty-Five Feet**

As the clock had been wound lately it is believed that the weight fell some thirty-five feet. The floor immediately above the ceiling of the operating booth of the City Opera House was smashed through directly. The weight then leaned toward the west and struck the next floor on its side. That fact prevented the weight from going through it like the one above as it would have missed the floor-beam had it struck on end. The second floor is that which gives access to the gallery of the Opera House. The weight struck just west of the gallery entrance.

Examination of the weight disclosed that an iron bolt which closed a hook which supported the weight, had developed a weakness and had given way letting the full weight come on the hook which was straightened out, the weight finally falling off.

**Repairs Begun at Once**

Repairs were begun at once. Until they are completed the clock will not strike. It will not take long to put a new fastening on the weight.

The accident occurred at an hour when no person was in that part of the building. Had there been many there a panic probably would have resulted.

The King's Birthday with a long week-end will be the next period of danger.

**LETTERS WRITTEN BY THE MURDERED BOY**

**Friend and Mother have Received Them—Employment to Begin Monday—Funeral on That Day.**

A most pathetic feature of the murder of Chester Monahan of this city in Detroit, Mich., is the receipt of letters from the deceased evidently written Wednesday on the night of which he was shot his death occurring the day following. One letter was to his mother received this morning and the other was to Carl Crowley of this city a close friend.

**Had Secured Employment**

The letters were cheerful in tone. The writer said that he was pleased with Detroit and had secured employment. He wrote that he expected to take his new employment on Monday. By the irony of fate that is the day on which his funeral will take place here.

**Arrangements For Funeral**

It was found impossible to make connections at Montreal in time for the body to be brought here today. Advices from T. V. Monahan the father who went to Montreal, are to the effect that the body will arrive here Sunday. Arrangements have been made for the funeral on Monday. The body will be taken to the residence of T. O. Monahan, 616 Campbell street, and the funeral will take place from there. High Mass of Requiem will be celebrated at St. Dunstan's Church at nine o'clock Monday morning.
