Of Interest to the Women

ODD FEATURES IN SPRING MODES.

PARIS—All the hats here today are big but one doubts that the American woman will relinquish the small comfortable turban.

LONDON—During the recent bit of cold weather many women dancers at the Savoy and other smart places wore brightly colored "spats" of silk jersey.

NEW YORK—Crystal and amber do not seem to diminish in popularity. But the new cuttings are more interesting than ever. Little blocks of crystal or amber are cut into oblongs that are often six-sided and sparkle beautifully.

NEW YORK—Though the vogue for violently pink hosiery continues the clever woman will have none of it. Instead she wears something more flattering by contrast with her face—hosiery of the warm, creamy tones that have supplanted "flesh."

FUR GAINS IN FAVOR.

New York.—Despite the thermometer fur is increasingly popular. Whether the all fur jacquette will really meet with much favor is a question; but already in favor is the jacquette with fur round the collar and hem.

WHITE SALAD.

Mix together lightly two cups of chopped cabbage one cup of white grapes (seeded and cut in halves), one-half a cup of blanched and chopped almonds, one cup of shredded coconut and four tablespoonsful of French dressing. Serve on lettuce.

POTATO SALAD.

2 cups diced potatoes
1-2 cup diced celery
2 tablespoons chopped parsley
2 tablespoons chopped green pepper
2 tablespoons chopped onion.
1 teaspoon salt.
Add French dressing and sprinkle with chopped parsley. Let stand one hour—add mayonnaise or cooked dressing just before serving. Diced cucumber may be added in place of celery.

FRENCH DRESSING.

1 teaspoon salt
1-2 teaspoon mustard
Speck red pepper
4 tablespoons oil
4 tablespoons vinegar
Take salt, mustard and pepper and mix with one tablespoon oil, then add remainder of oil and vinegar.

CABBAGE DRESSING.

3 eggs
3 tablespoons cream
2 tablespoons sugar
2 tablespoons mustard
1 tablespoon salt
2 cups vinegar.
Add 1-4 cup of butter. Beat all together and cook until it thickens stirring all the time.

VEGETABLE SALAD.

1 tablespoon gelatin dissolved in 1-2 cup cold water.
1-2 cups tomato juice
Slice of onion
1 tablespoon lemon juice
1-4 tablespoon salt and paprika
1-2 cup cold peas
1-2 cup diced celery
Cook together the tomato, onion, lemon juice, salt and paprika for a few minutes and strain. Add the gelatin mix thoroughly add peas and celery and pour into moistened salad mould. When firm and cold, turn out on bed of lettuce leaves. Garnish with lettuce cups of mayonnaise dressing.

He lay back oblivious to everything except the white clad form that hovered about him. He expected something yet he did not know just what. Softly a snowy arm drooped about his neck and he felt the gentlest touch on lips and cheeks. His tense body quivered his eyes closed in ecstasy.

He was only seventeen and this was his first shave.

A stingless bee is announced. Not, of course, the political bee.

ARE YOUR NERVES "ALL ON EDGE?"

"Fruit-a-lives" Brings Rest and Comfort

Amazing Results from Intensified Fruit Juices

In these strenuous days, there is constant warfare waged against our nervous vitality.

The man and woman who is free of Nervousness and Sleeplessness; who is not more or less troubled with indigestion, Rheumatism, Headaches, Neuralgia, Weariness and Loss of Vitality, Pain in the Back and Constipation, are very rare indeed.

This is why the "Fruit-a-lives" Treatment, in the form of "Fruit-a-lives" is a blessing to nervous, sleepless, unstrung men and women.

"Fruit-a-lives" is really the intensified juices of apples, oranges, figs and prunes and contains all the medicinal powers of these fruit juices and in a more active and concentrated form.

"Fruit-a-lives" will always relieve Nervousness and Sleeplessness by cleansing the system of waste—by rebuilding the nerve cells by means of pure, rich blood—by regulating the stomach, liver, bowels and skin—and by invigorating and re-vitalizing the whole system.

Try the fruit treatment for your nerves. Get a box of "Fruit-a-lives" today. Your druggist has them—25c. and 50c. a box, or sent postpaid by Fruit-a-lives Limited, Ottawa, Ont.

LABOR ASKS FUNDS FOR RESEARCH

London, May 5—With further limitation of armaments in abeyance until the reparations problems are settled the Labor Government has given sanction in its army appropriation estimates for more than \$750,000 for chemical warfare research in the forthcoming year. It is likely when the army estimates come up in the House of Commons that the pacifists will protest to the Government for its acquiescence in the poison gas research.

Army authorities, however in view of the intensified research work of this character proceeding in most of the principal countries, have insisted that Britain must continue its gas research and also develop to the highest point of efficiency anti-gas warfare measures.

Prime Minister MacDonald's plan for limitation of armament stresses the necessity of the abandonment of chemical warfare. The Sun was informed today that poison gas is only being manufactured in sufficient quantities for experimental purposes.

The Chemical Warfare Committee, which includes some of the most eminent British scientists who are conducting experiments at various universities, will, under the budget estimates, have the sum of £35,800 for the forthcoming year to defray the cost of their work. The total expenditure on poison gas research exceeds last year's appropriation.

TOWN JOINS IN HUNT FOR MISSING GIRL

East Templeton, May 5—Search for missing 18-year-old Frances Billadon of this village, who disappeared last Monday, when she went to look for Mayflowers, was concentrated today in the vicinity of Snake pond, on the Gardner line.

Posses of citizens and Boy Scouts joined hands with the police in the search. Thus far the only trace found of the missing girl is an empty lunch box.

All sorts of theories have been advanced to explain the disappearance of the girl.

It is thought by relatives and friends that she may have been kidnapped, or met her fate by drowning in Snake pond. They do not believe there is anything in the theory that she had "skipped" with a young man.

Neuralgia Conquered Its Pain Destroyed

MR. W. T. Greenway, formerly connected with the Guide newspaper staff, has written "For twenty years we have used 'Nerviline' in our home, and not for the world would we be without it. As a remedy for all pain, earache, toothache, cramps, had disordered stomach, I know of no preparation so useful and quick to relieve as Nerviline." Remember this, whenever there is a pain, rub on Nerviline, and you will get prompt results—35 cents at all dealers.

CLOSING DATE IN DAILY MAIL'S "SAVE THE FOREST WEEK" ESSAY COMPETITION EXTENDED TO MAY 10

In view of the tremendous response to the Save the Forest Week Essay Competition and in order to give ample opportunity to all possible contestants the Honourable Charles Stewart has authorized extension of closing time for receipt of essays from Saturday May 3rd to midnight May 10th.

This information was contained in a telegram received by The Daily Mail from the Department of the Interior, Ottawa. It will be welcome news to many contestants who are hurrying to complete an essay by Saturday evening. Already essays are pouring in and the extending of the time of the closing of the contest for one week, should be an impetus to all those who have not as yet entered the contest.

Fredericton girls and boys, why not start today and write an essay? Surely the valuable radio and cash prizes are incentive enough to encourage you to devote a few hours to writing an essay. An illustration of the first prize radio, which is now on display in the window of the F. B. Edgecombe Co., appears in another part of this issue, as does the rules for the contest and the list of judges.

The prize winning essay in the DAILY MAIL'S contest will be forwarded to Ottawa and will be judged with the first prize essays from all over Canada for the grand prize, a radio of the very latest type. In addition a fine silver cup will be given to the school last attended by the winner of the grand prize.

DON'T FORGET—CONTEST CLOSING SATURDAY, MAY 10TH at Midnight. YOUR essay may win a prize. WRITE IT TODAY!

WESTINGHOUSE PERFECTS X-RAY TUBE FOR TREATMENT OF CANCER

An important advance in the X-ray treatment of certain forms of cancer has been made possible by a new type of X-ray tube, according to Dr. Francis C. Wood, Director of the Crocker Institute of Cancer Research of Columbia University, New York U. S. A.

"The new tube, which was made by the research engineers of the Westinghouse Light Company," states Dr. Wood, "is capable of giving out five or six times the amount of X-ray which the ordinary tube does. It will enable specialists to treat a very much larger number of people and treat them much more effectively than can be done at present. Exposures of two or three hours are now necessary, but the new tube shortens this time to twenty minutes and will be an immense benefit to sufferers from cancer."

"Another advantage of the new tube is its longer life. The present tubes wear out very rapidly, and as they cost over \$250 each, the expense of treatment is necessarily very high. One of these new tubes, however, has been in use in a clinic over three months and is still proving entirely satisfactory. This, together with the fact that it reduces the length of each treatment, naturally reduces the cost of treatment."

"It must be understood that in only certain cases can cancer be permanently cured by X-rays. Surgery still remains our best method of handling this disease. We are only beginning our work, however, and the great improvements now being made in X-ray apparatus warrant hope that greater advances may be expected in the future. Possibly we shall be able to cure more cases, and certainly we shall make a great many people more comfortable and arrest the growth of the disease for a shorter or a longer time."

Dr. C. T. Ulrey, research engineer of the Westinghouse Lamp Company, New Jersey, U. S. A., is the inventor of the new X-ray tube, according to Dr. H. C. Rentschler, director of the Westinghouse Research Department. "Two improvements have been incorporated in the new tube," stated Dr. Rentschler, "in the first place it has a high emissive power. This can be better understood if we speak in terms of electric lamps. If the older type of tube were to be compared with a 50-candle-power lamp, the new tube would resemble a lamp of 250 or 300 candlepower."

"The second feature of this tube is that it is designed for use on very high voltages. In practice, tubes are kept in service for long periods of time, and their ability to withstand high voltages is limited, they are liable to be punctured and thus destroyed. The Ulrey tube, however, has a greater factor of safety, and thus should last longer in use."

"Dr. Ulrey is engaged on further investigations which promise even more important results than those obtained by his present tubes. He has apparently found a means of increasing the emission of the specific rays that cure certain forms of cancer and at the same time, are less injurious to healthy flesh. Data now available indicate that this latest tube will still further cut down the time needed to treat surface cancers and will also extend the use of X-rays to internal cancer; that cannot now be treated in this manner."

ASKS \$65,390 FOR STOLEN JEWELRY

New York, May 5—Mrs. Camilla Stein is suing the Federal Insurance Company Supreme Court, claiming this amount to be the value of jewelry stolen and covered by insurance with the defendant. Mrs. Stein's husband is a stock and bond salesman.

It is alleged that he had the jewelry insured in the spring of 1920. In 1921 he became sick and went to Johns Hopkins Hospital at Baltimore for treatment, his wife accompanying him. They returned to New York city with a nurse in April, 1921, the jewelry being in a brief case. Stein discovered then that the jewelry, which included necklaces and diamond rings was missing.

The company denied having any information as to the theft, and declared in addition that Mrs. Stein was not the real party in interest, having assigned her claim to the Kings County Trust Company. The trial is being held before Justice May and a Jury.

Modern Girl—Now mother because I'm going bathing don't get off that old thing about hanging your clothes on a hickory limb!

Mother—I won't! I'd rather advise that you hang some clothes on your own."
