Of Interest to the Women

ODD FEATURES IN SPRING MODES.

PARIS—The lady who has been wearing many bracelets of various colors is now wearing many rings of just as many colors. Sometimes these smooth narrow little rings are of polished wood like the Czechoslovak beads.

PARIS—Modistes today are throwing over their evening frocks a corselet of sequins and silk mesh. Though different in material this corselet is inspired by that found in Tutankhamen's tomb.

LONDON—Street pumps of fawn and seal brown kid today are trimmed with single gold line which is most striking. Many evening slippers are once more of perfectly plain and very bright gold leather.

NEW YORK—Some of the sports costumes are so very Scotch in their plaid atmosphere that they have even adopted the picturesque sporran. It makes a striking ornament, this big tuft of black and white fur hanging down the front of the skirt.

MOST OF THE TAILORED SUITS ARE BELTLESS.

Chanel at all times a disciple of the simple and youthful has many of suits that are boyish in silhouette and smart in the perfection of detail. She uses kasha in light gray or in beige and shepherd plaids with blouses in crepe de China to match each suit. Most of the suits are beltless but a few have a narrow strap at the back only. An unusual suit is one in a gray mixture with a hip length jacket at the front opening over a gray crepe blouse. At the back this jacket is cut in one with the skirt. Bernard who is essentially a good tailor also makes the most of the tailored dresses. Each is supplied with a boutonniere of apple blossoms or gardenia. The scarf and the fob ornament also are used as necessary touches to complete certain costumes. Speaking in general it is noted that a large number of the tailored suits show a very slight curve at the waist line, also that many of them have jackets of black or dark material worn with skirts of stripes and plaids. The pleated skirt is shown with a suit jacket of mannish cut in some of important collections.

In frocks for day wear the tunic in three quarter length either flaring or straight about the knees, continues to be the most distinguished feature of the openings. It is shown both belted and hanging straight. Another form of the tunic is cut almost to the bottom of the actual skirt that is showing only four or five inches of the under dress. A shorter tunic effect is the cascade which preserves the straight silhouette and sometimes takes its inspiration from the Russian blouse.

The tunics reflecting the influence of the Orient are distinguished by the colors, lacquer red and old blues as well as by the cut which includes a slash at the sides outlined with gold or novelty galloon in true Chinese fashion.

This back and white color scheme is varied mainly by the use of many shades of green, ranging from chartreuse to deep bottle green or by navy blue in models for day wear with tailored lines.

Other frocks apparently include all shades with rose color and blue particularly mentioned as desirable.

Mistress (to new help)—"Are you ever impudent?"

Nirah—"O'm willing to learn ma'am."

A Quick Relief for Headache

A headache is frequently caused by badly digested food; the gases and acids resulting therefrom are absorbed by the blood which in turn irritates the nerves and causes painful symptoms called headache, neuralgia, rheumatism, etc. 15 to 30 drops of Mother Seigel's Syrup will correct faulty digestion and afford relief.

Here and There

Although the Canadian Pacific Railway has yet issued no forecast of construction contemplated for 1924, the fact that it has ordered 50,000 tons of steel from the Algoma Steel Company, of Sault Ste. Marie, seems to indicate that its program will be extensive.

According to a statement recently made by the Hon. Charles McCrea, Minister of Mines for the Province of Ontario, 85 per cent of the world's nickel supply is being taken out in the vicinity of Sudbury, where there is an inexhaustible supply of this metal.

Alberta's butter production last year was 18,500,000 pounds, or 2,000,000 pounds more than in 1922, according to reports presented at the annual meeting of the Alberta Dairywomen's Association. It was not so long ago that Alberta was using butter imported from New Zealand.

The year 1923 was a favorable one in the building and construction activities of Canada, and returns show an advance of about 10 per cent. In 1922 the total expenditures in this regard were \$315,000,000, and in 1923 \$345,000,000, an increase of \$30,000,000.

Exports of pulpwood from Canada for the year 1923 amounted to 1,384,230 cords, compared with 1,011,332 for 1922, an increase of 372,898 cords or 35 per cent. The 1923 figures are equivalent to about 900,000 tons of newsprint, the amount which can be manufactured from that amount of wood.

C. E. E. Usher, General Passenger Traffic Manager, and E. J. Hebert, First Assistant General Passenger Agent, of the Canadian Pacific Railway, have been presented with medals by the French Government, in recognition of their services to the French Exhibition train in Canada in 1921. The medals take the form of tablets on small stands.

Attention has been drawn once more by airship experts in London, England, to the fact that the only known supply of helium gas in the British Empire exists in the Province of Alberta, that 10,000,000 feet of this gas is going to waste annually in this province and that the possibility of establishing an airship base at some future date in Alberta is being discussed.

Canada's fisheries production during 1923 is estimated to be worth \$40,000,000. At the beginning of the year it was not thought that anything like this mark would be reached, for the Fordney tariff had cut deeply into exports to the United States. But as the year wore on the demand and prices generally improved, thus giving fishermen along the Atlantic coast especially a much better price.

Official figures recently issued show that the Dominion of Canada is the greatest single contributor to the wheat supply of the world. She stands second only to the United States in automobile exports. Her flour exports are far ahead of the palmist war years and are rapidly gaining in the foreign markets. Canada's mineral, forest, agricultural and fisheries industries are now valued at \$2,420,000,000, or \$252,000,000 higher than a year ago.

British immigration during the nine months ended December, totalled 64,127, compared with 28,525 in the corresponding period of the previous year, an increase of 125 per cent. Immigration from the United States was 17,282, compared with 18,982, a decrease of nine per cent. Total immigration for the nine-month period of 1923 was 124,680, compared with 60,247 in the same period in the previous year, an increase of 107 per cent.

The Canadian Pacific Railway has received from Boorings, Willis, Faber & Company, 2,152.10 pounds sterling for distribution to the officers and crew of the steamship "Empress of Australia" for saving their ship and for salvaging during the Japanese earthquake. For the purpose of purchasing a memento to be presented to Captain Samuel Robinson, C.B.E., R.N.R., then commander of the "Empress of Australia" and now commander of the "Empress of Canada" on her world cruise, 210 pounds sterling have been retained from the above amount. Plans are being made to honor the captain when the "Empress of Canada" reaches Yokohama next May, the Japanese government participating in the ceremonies.

Accident & Health Insurance

A policy covering every day of disability, (Illness or Injury), every disease to which flesh is heir, at one dollar per month. Amount of indemnity depends on occupation. 'Tho you may not be from Missouri, we would be pleased to show you this plan of Income Protection.

HONESTLY, IT'S THE BEST POLICY

Rotten. Every house I've called at has a young baby in it.

Make somebody's birthday happy

Somebody's birthday comes this month. Is it your sweetheart's or your mother's? Is it your wife's or one of the kiddies? Was dad born in this month? A growing plant or a bouquet of fresh-cut blossoms will make some one happy.
