WORLD WIDE BROADCAST ON TUESDAY

All Parts of the Globe Will Be Able to Listen in on Peace Parley at London.

(Special to the Daily Mail)

Moncton, Jan. 18—The broadcast of the opening of the naval parley in London, on Tuesday morning, January 21st, when His Majesty The King will speak, will be the first time that a really world wide broadcast has been arranged. The importance of the event, vitally touching as it does every community in the world, for the parley is an endeavor on the part of the great powers to eliminate war, has created an interest in every part of the globe.

It will be the first time that a network has been arranged to take in the Orient, and it will be the first time in recorded history that all nations and all language will be able to hear one voice speaking as in their midst. In biblical narrative, we read of the King of the Mighty Empires of history, addressing decrees to all nations and languages, but it was to a very small part of the world. In this day and generation we have succeeded in putting a girdle a speech around the earth and as an instrument in the furthering of the aims of the naval parley, radio is of vital importance for by its means the ideal of world peace can be effectively spread and the "Will To Peace" propagated.

In order that this part of Canada may have an opportunity of hearing this epochal broadcast the Canadian National Railways have made arrangements to put the proceeding on the air through their coast to coast network and in the Maritime Provinces the several stations have been offered the privilege of typing up with CNRA at Moncton.
