THE WEATHER

Moderate winds, cloudy and
cool, with a few scattered
showers today and Thursday.

VOL. XXXVI., NO. 123

FREDERICTON, N. B. WEDNESDAY, MAY 28, 1930.

TWO CENTS PER COPY.

The Casualty List In Rangoon, India Is Steadily Growing

So Far the Death List is Sixty-Three and 716 Have Been Injured—Rioting Between Striking Dock Laborers and Strike Breakers Still Continues—Food Situation Desperate.

(Special to THE DAILY MAIL by the British United Press.)

RANGOON, Burma, May 28—Communal rioting between striking dock workers and strike breakers continued today in Rangoon despite the presence of several bodies of British and Native troops.

The death toll was announced officially at sixty-three this morning with 716 injured. It was said, however, that there were many more casualties which had not come to official attention.

No Europeans have been killed so far in the fighting, although several have been attacked.

The food situation was growing desperate today with all shops and bazaars remaining closed to prevent looting.

LADY ASTOR DISCUSSED THE BEER QUESTION

London, May 27—Lady Nancy Astor engaged in a lively discussion in the House of Commons of a motion to reduce the duty on beer.

The members, knowing that Lady Astor always takes part in any debate connected with liquor, gave her a rousing cheer as she entered the chamber and another round of derisive applause when, a little later, she said:

"I'm tired of all this nonsense about beer, and I'm tired also of beer." She then told her audience to "watch and see what the rest of the Empire is doing in regard to drink," whereat a Conservative member interjected: "Bootlegging?"

This there was developed later by Right Hon. Winston Churchill, who declared that what astonished him was that the noble lady should proceed unabashed to reiterate for views on drink "in view of the ghastly muddle made in her own country in the treatment of this problem." Lady Astor was born in the United States.

BIOGRAPHY OF ROCKEFELLER IS IMPRESSIVE

New York, May 28—The latest Biography of John D. Rockefeller Sr., written by William H. Allen and published today, is impressive, at least, in its curious comparisons of the estimated two-billion dollar fortune of the aged financier.

If Rockefeller liked the moxies and if it were physically possible, he could go to them 20,000,000 times a day for a year, with his money, Allen demonstrates.

He also shows that if Rockefeller would give away a dollar bill on 15 different street corners every 30 seconds for 10 hours a day, every day for a year, he would have more money in the bank when he got through than when he started, so fast does his money multiply.

Scarlet Fever

Mrs. Robert N. MacCunn, king St. is confined to her home with scarlet fever.

KING GEORGE RESPONDING TO TREATMENT

(Special to THE DAILY MAIL by the British United Press.)

London, May 28—The rheumatism which has affected King George's right hip shows a definite improvement, an official announcement from Buckingham Palace said today. The King, however, received no visitors this morning.

The improvement, the announcement said, was the result of the massage treatment which was prescribed by the King's physician, Lord Dawson of Penn.

NEW AIRPLANES TO BE CURED OF BLINDNESS

(Special to THE DAILY MAIL by the British United Press.)

Gloucester, Mass., May 28—A "Radio Eye" for airplanes, enabling a flier to see through the densest fog, has been created in the laboratory of John Hays Hammond, Jr.

The inventor, famed for his radio research work, believes that this latest product of his genius represents a major step towards alleviating the air's greatest hazard.

Party Returned

The official party composed of R. L. Burnap vice-president in charge of traffic for the C. N. R., C. W. Johnson, general passenger traffic manager at Montreal and M. F. Thompson, traffic manager at Moncton arrived here late yesterday afternoon by car. The stop here was a leg in an all-provincial inspection tour of railway facilities. After a brief chat with J. D. Black and other local dignitaries they returned to St. John. In connection with the Valley line and the proposed placement of steam-electric car for the railway the gentlemen were entirely non-committal.

Same Level

According to a report from J. T. Malloy Chief Engineer of the Pumping Station the rain of the last 24 hours has been sufficient to maintain the water level in the St. John at 8 ft. above summer level.

SAYS MARITIMES SHOULD HAVE BEEN CONSULTED

Discussion on Motion Respecting Return of Natural Resources to Western Provinces in Parliament.

Ottawa, Ontario, May 27—Premier King's motion, passed just before the luncheon recess of the House today, asking for the passage by the Imperial Parliament of an Act approving the agreements between the Dominion and the Provincial governments whereby the latter will have transferred to them their natural resources, brought three protests in the chamber two from Maritime members and the other from Henri Bourassa (Labelle, to the effect that the Maritime Provinces should have been consulted before presenting this petition in order that there might be a final determination of their claim to the lands to be transferred to the western provinces.

Dr. Murray MacLaren (Saint John), and Finlay MacDonald (Cape Breton South), both made speeches in protest.

Dr. MacLaren—"Has the consent been obtained of those provinces not directly interested in this address, that is to say, has the concurrence been received of the provinces, other than British Columbia, Alberta, Saskatchewan and Manitoba?"

All Represented

The Prime Minister—"All the provinces of Canada are represented at the present time in this House, and I assume that there will be unanimity on the part of this House in the matter of this address as there has been with respect to the agreements themselves. The provinces of Canada were represented at the Dominion-Provincial Conference, both by their premiers and members of their administrations. Among other subjects considered and discussed at that conference was this very question of the return of the natural resources to the western provinces. The view then expressed by the representatives of the other provinces seemed to be that the treatment of these western provinces should be in a liberal and cordial manner. I do not think it is necessary to have any formal submission of this address to the other provinces before this Parliament takes action upon it. It relates exclusively to the western provinces, and should the other provinces have any matters to be discussed growing out of what we are now doing, those matters would receive consideration."

New Rotary Installed

James M. Scott, M. L. A., is having another rotary mill installed at Magaguadavic Lake to restore the one destroyed by fire a short time ago. He has about three hundred thousand feet of hardwood lumber yet to saw which will keep the mill going for about three weeks. Mr. Scott's lumbering and milling operations at Magaguadavic Lake to replace the spring months gave employment to a crew of 125 men.

An Organization

An organization meeting of the Opposition party was held last night in Devon, with J. B. McNair, president of the York County Liberal Association the chief speaker. Other meetings of a similar nature are expected to be held from time to time.

CONSERVATIVES WON OUT IN BY ELECTION

Had Large Majority in a Three Cornered Contest

REBUKE TO LABORITES
Liberal Candidate Was at the Foot of the Poll

(Special to THE DAILY MAIL by the British United Press.)

Nottingham, May 28—The Conservatives won the first three cornered by-election since the 1930, British budget announcement today when T. J. O'Connor receiver 14,946 votes in the Central Nottingham division against a combined vote of 12,571 for his two opponents. A. E. Wetterson, the laborite candidate received 7,923 votes and Captain R. C. Derkely, liberal, receiver 4,648.

The Conservative victory was regarded as a rebuke to the Laborite government for its proposal to dispense with the British safeguarding duties.

BRUNETTES ACQUIRE TAN VERY EASILY

Washington, May 28—Brunettes acquire sun tan easier than do blondes, says Dr. DeRoy A. Wilkes, of the White House conference on child health.

In preparing for the summer days at the beaches, blondes, says Dr. Wilkes must be prepared to have their skins burn, but not tan readily.

Sun tan, though sometimes fashionable, has no health value save as a defense against an excessive amount of sun rays, he says.

R-100 FLIGHT IS DELAYED ONE MONTH

Ottawa, May 28—Britain's giant dirigible R-100 will not leave for Canada before the end of June, according to cabled advice received by J. A. Wilson, controlled of civil aviation, from Great Britain this afternoon. The delay of one month in the departure of the R-100 is due to "minor repairs for which material is not immediately available, and which will require to be manufactured specially for the airship."

Treed by a Moose

A farmer named Bishop residing at Magaguadavic was given a bad scare by an infuriated cow moose on Monday of this week. He went out into the woods to look for his cows and came rather unexpectedly upon a cow moose and a very born calf. The cow with blood in its eye and hair standing on end started after him and Mr. Bishop succeeded in escaping its onslaught by climbing a nearby tree. He had a dog with him which frightened the moose away thus permitting him to descend from the tree and beat it.

No Forest Fires

An absence of forest fires was reported from Forestry headquarters here this morning. The downpour of rain since Monday has caused this action, and enabled the officials to breathe easier than heretofore. It is now believed that the forest fire danger is over for some time to come. Over the last week-end a number of serious out-breaks had occurred in the north, and but for the timely rains, might have reached disastrous proportions.

Who wants to argue with a pretty girl? Nobody, but a goose.

Flight to Canada Of Airship R-100 Has Been Delayed

Will Not Start on Trip to Montreal Until Late in June or Early in July—Announcement Made in the House of Commons by Hon. Frederick Montague.

(Special to THE DAILY MAIL by the British United Press.)

LONDON, May 28—Postponement of the flight of the airship R-100 to Canada until the end of June or early in July was announced today in the House of Commons.

Hon. Frederick Montague, under secretary of State for air, said the repairs which are being made on the airship caused the delay. The R-100 was slightly damaged on the stern during its last test flight.

Graf Zeppelin Starts

Pernambuco, Brazil, May 28—The dirigible Graf Zeppelin departed for Havana and Lakehurst N. J. at 11.13 a. m. (10.13 a. m. E. S. T.) today after being delayed several hours by rain.

AGED HERO OF RHEIMS DIED EARLY TODAY

(Special to THE DAILY MAIL by the British United Press.)

Rheims, France, May 28—Louis Cardinal Lucon, the Cardinal hero of Rheims, died here today at 8.30 a. m.

The cardinal was eighty-eight years old and had been sinking since Sunday and his death was not unexpected.

TARIFF TRUCE IS CRY OF THE LABOR ORGAN

London, May 28—Commenting on the proposed United States tariff increases, the Daily Herald said that a "tariff truce" with the United States should be arranged in a manner similar to the naval agreement at the London Conference.

TO ISSUE NEW NOVELS AT 50 CENTS APIECE

New York, May 27—A new salient was established in the book-price war today with the announcement by Albert and Charles Boni, Inc., that they would publish new novels in paper covers to retail at 50 cents a copy.

The declaration was made after representatives of ten of the older publishing houses announced an agreement to adhere to traditional methods and prices in book production and not take part in the price-slashing war which was begun by four houses who said they planned to cut their retail price on novels from \$2.50 to \$1.50 and \$1.

Albert Boni, president of Albert & Charles Boni, said his firm had entered the price war reluctantly and added: "There is no point in half measures. If books are to find a mass public, they must meet magazine prices."

Charles Boni, who has some experience in low priced book production, said:

"I am not sure that there reductions are good for the book business. I'm not sure the book business can stand it. I think it probably cannot."

SHERIFF STARTS OUT WITH THE PROCLAMATIONS

Expects to Cover the Entire County During the Week—Is a Real Veteran at This Line of Work.

Sheriff Hawthorne started up river by car this morning to post the proclamations and will cover the entire county, which in point of territory is the second largest in the province. The sheriff is surely a veteran at this line of work. As deputy sheriff to the late A. A. Sterling, away back in the early eighties, he always attended the posting of proclamations for both provincial and federal elections, and has continued to do so ever since with a respite of eight years. He is usually the first returning officer to start out with the proclamations, and has undoubtedly taken the lead on this occasion. As the sheriff is also returning officer for the federal election he is in for a busy summer. It may be added that he has witnessed many changes in transportation as well as in means of communication since he started on his long official career. Back in the eighties and for twenty years afterwards the automobile was not even a dream and the telephone was but little used in the rural districts. There were then only two railways leading out of Fredericton, the Fredericton and Gibson barches, both operated by private companies.

Sunbury In Line

Sheriff Charles G. Bliss, of Oromocto this morning received the writ for the provincial election and today set out to post the proclamations in the seven parishes of the county. Like Sheriff Hawthorne of York, he believes in getting an early start.

Local Students Successful

Among the list of students of McGill University who passed with honors were several local young people. Included in the names are George E. W. Chalmers of South Devon, second year student, who passed in biochemistry pharmacology and physiology. Miss Eleanor K. O'Halloran, 828 Brunswick street, city has passed B. A., with a special certificate for distinction in the general course.
