

SOME ODD COMMODITIES

IN THE TRADES OF THE WORLD;

HUMAN HAIR IS INCLUDED

Fuzz from deer horns, choice bristles from pigs' necks, gall stones from steers, human hair, dried bottles cricket dust, and beef blood are a few of the commodities mentioned in a bulletin from the Washington, D. C., headquarters at the National Geographic Society dealing with some strange commodities that enter into world trade.

"Chinese fuzz collectors hunt young deer, scrape their newly 'sprouted' horns for a fuzz like substance, and ship it to Chinatown in many foreign countries where the Orientals use the fuzz for medicinal purposes," says the bulletin.

"In the mixed cargoes from Chinese ports, customs inspectors find cases of pig bristles, destined to foreign brush manufacturers; ground, dried crickets, a native Chinese medicine for cancer and fever; dried egg yoke and albumen which find their way into American and European confections, baked goods and medicines.

"Down the Yangtze from remote parts of China said native craft with cargoes of tung oil, an important ingredient of oil cloth and varnish that will not water stain, and stick-lac the sap of an Oriental tree which is used by manufacturers of shellac and sealing wax. Human hair still is shipped from China to the United States where it is treated and dyed, returned to China to be made into hairnets, and re-shipped to the United States.

Seaweed, Gall Stones, Sea Worms

"China also receives some strange cargoes. Seaweed from the Asiatic coast is shipped to Chinese and other Oriental ports, where it is prepared for fertilizer while some of it furnishes ingredients for glue. Gall stones from Argentina are popular as charms some Chinese.

"Chinese and Japanese importers purchase supplies of beche de mer, sea worms from the waters of the East Indies and Australia for palatable soup, while there is a steady trade among the people of the East Indies and those of the Asiatic continent in the betel nut, the fruit of the betel palm (which is the chewing tobacco of the East. Betel nut chewing blackens the mouths of the many men,

women and children of the Pacific Islands and continental Asia.

"Japanese chrysanthemums are bundled and shipped to many parts of the world and used in the manufacture of insecticides. Ethiopia adds to the strange list of commodities of liquid extracted from the civet cat which is used by perfume manufacturers. The Canary Islands contribute cochineal, little red bugs collected from cactus leaves. They are shipped to England and Germany and used in dye manufacturing.

"Italy has a corner on the world supply of orris root upon which many thousands of civilized babies have cut their first teeth, and there is a shortage in the supply of the commodity. Dragon's blood, a red resinous substance from an oriental palm tree used in the United States and Europe to color varnish, is produced and exported in Siam.

"Peru is the native home of the cinchona tree from the bark of which quinine is produced, but Java now produces a large supply for export. The same ships that transport cinchona bark from Java carry cargoes of kapok, used in the United States and Europe as stuffing for pillows, cushions and life saving apparatus.

"Argentina is the source of about half of the United States import of 10,000 tons of cattle blood which is principally used in the manufacture of fertilizer. Brazil furnishes the world with large quantities of animal bones, bone dust, hoofs and horns for the manufacture of gelatine, glue and soap.

Why Jumping Bean Jump

"Human amusement is a boon to trade, particularly the exporters of Mexican jumping beans. The small brown, pea-sized bean contains a worm. When the worm moves, so does the bean. Tons of jumping beans have been displayed and sold in the United States.

"Although the United States lumber camps and saw mills furnish thousands of tons of sawdust, the demand for oatmeal wall paper, linoleum, bakelite, artificial wood and other products in which sawdust is used, requires the importation of the commodity."

Following is the result of the voting in the election of August 11th., 1925:—

EXTENDING THE

RADIO SERVICE

ON THE TRAINS

Ottawa, May 27.—Fifty-four cars of the Canadian National Railway are now equipped with Radio reception and 24 cars for transcontinental service now being built will be equipped with Electric radio-phonograph sets, according to a statement issued by the Department of Commerce.

Over 210,000 passengers listened to radio broadcasts received on the trains of the Canadian National Railways during 1929. The latest development is known as "trained lined radio," in which two cars receiving programs from a single set are linked together.

Twelve new observation lounge cars and twelve compartment cars for transcontinental service are now being built. The programs will be received in the lounge cars and relayed to a loud speaker and 36 head sets in that car, as well as 22 head sets in the adjoining compartment car. There will be two head sets in each compartment and charbrrette (single berth compartment) and three in the drawing-room.

AUSTRALIA IS

ANXIOUS TO

KNOW CANADA

Montreal, May 22—Stating that he hoped that before long it would be the custom of delegations of Canadians to visit Australia and Australians to visit Canada, Hon. J. E. Fenton, Minister of Trade and customs, in the Australian government, spoke at the annual banquet of the Quebec division of the Canadian Manufacturers Association.

Mr. Fenton said that the two commonwealths were the two greatest parts of the outside Empire and they still knew very little about each other.

FAINT, DIZZY SPELLS

Had To Sleep

Propped Up In Bed

Mrs. Norman Bishop, Salisbury, N.B., writes:—"I was troubled with faint and dizzy spells and when I would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed.

"My doctor said it was my heart and nerves, and that I needed a good heart tonic.

"I was advised to take

MILBURN'S HEART NERVE PILLS

and I had not taken one box when I could lie down and sleep like a child."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Now

Is the TIME to Buy

your Automatic

Refrigerator

OF COURSE, you've always wanted an automatic refrigerator. Now you can afford it. Our special Jubilee offer enables you to get any model you may choose on exceptionally liberal terms. But you must act now. This offer is for a limited time only.

Come in today and see the 1930 automatic refrigerators. Let us explain their many improvements. Among them you will find a model to exactly fit your needs.
