Lima Beane says the better plan, when inclined toward self-pity, is to laugh at yourself as the day's best joke.

Words and music are as nothing in the song of the frogs. It is what song signifies that has appeal.

Spring is so full of enticing sensations it requires self-restraint to keep from running away from work. Now is the time, if ever, to be a poet—to write what is in the heart of love and joy and hope. Instead we must go dumbly on with the job.

PUBLIC WORKS ESTIMATES DISCUSSED IN PARLIAMENT—NEW BRUNSWICK ITEMS HELD OVER

Ottawa, May 1—A further drive on the main estimates featured May Day in the House of Commons. Save for a short time following the opening of proceedings, and another hour at 8 o'clock which was given over to private members' business, the voting of money constituted the business of the day.

Sailing was fairly smooth during the afternoon. In the evening, however, a squall blew up in respect to the contract for a wharf in Prince Edward Island, and there was considerable cross firing. The temper of the House was, however, genial and while some of the exchanges were hot they were intermingled with a good deal of laughter and badinage.

Good Progress

Progress in the voting of supply was appreciable. When finally members called it a day and went home for the week-end, the large sum of \$14,540,400, covering votes for improvements in harbors and rivers of the various provinces of Canada, as well as remaining appropriations for public buildings, had been passed.

The largest vote of the day was \$6,336,500 for rents, repairs, furniture, heating and other expenses in connection with public buildings in Ottawa and throughout the Dominion. This sum represents a decrease of more than \$60,000 from last year's vote, and it passed with little discussion. The harbor and river votes, when, in the case of Ontario are more than a million and a half, and in Quebec over a million, evoked some debate but, it was not protracted. The feeling of the House appeared to be that progress should be made.

For harbors and rivers in British Columbia, \$294,600 was voted. For the same purpose in Ontario the sum was \$1,462,950. Quebec harbors and rivers accounted for \$1,100,500. As Saskatchewan and Alberta are not provinces in which such expenditures are necessary, only \$15,000 was voted for them. Manitoba appropriations were \$80,600 under this head, and New Brunswick \$375,900.

Are Stood Over

One item in the New Brunswick list, \$75,000 for Tracadie harbor, was left open so as to permit further discussion in respect to certain items in that province, including \$400,000 for Saint John harbor improvements, at the suggestion of Hon. P. J. Veniot (Lib., Gloucester). Nova Scotia appropriations were not dealt with, and those for Prince Edward Island also stand over.

Appropriations today for the Province of New Brunswick of \$5,000 or more follow: Beresford, breakwater, \$41,000; Buctouche, dredging, \$18,000; Campbellton, repairs to market wharf, \$5,000; Cape Bald, breakwater, \$5,000; Cummings Cove, wharf repairs, \$5,000; harbors and rivers generally, repairs and improvements, \$60,000; North Head, breakwater extension, \$113,000; Point Du Chene, repairs to wharf and breakwater, \$5,000; St. Andrews, harbor improvements, \$10,000; St. John river, dredging, \$18,000; St. Stephen, Wharf repairs \$5,000; Shipigan Gully, repairs to breakwaters and breastworks, \$16,500; Stuartown, wharf, \$20,000; White's Bluff, wharf repairs, \$5,000; Wilson's Beach, breakwater, wharf repairs, \$8,000.

ROYAL SALUTE TO BE FIRED HERE ON WEDNESDAY

(Continued from page eight)
one officer, one medical officer, one B. S. M., four sergeants, four bombardiers and sixteen gunners.

It is the first salute of the season, but there will be others during the summer.

HANGMAN'S TREE IS DYING

Baxter Springs, Kan., May 2—The famous hangman's tree here, whose branches served well attempts of vigilants to stem lawlessness in the pioneer days is dying. It recently was struck by lightning.

Approximately 50 men, most of them horse thieves and dishonest gamblers, were hanged from the old tree in the late 80's when Baxter Springs was a terminal on the Texas cattle trail.

BRITISH FLEET MEET GERMANS

London, England, May 2—The Daily Express said today that a British naval force, including the battle cruisers and destroyers had been ordered to cruise in the Baltic in June, possibly returning by way of the Kiel canal, and visiting the German fleet at Kiel. This would be the first ceremonious meeting of the two fleets since the world war.

ALASKAN BILL WOULD MAKE MARRIAGE EASY

Juneau, Alaska, May 2—"Marriage made easy" might be the title of a bill introduced in the territorial legislature to permit marriage without the formality of legal or church ceremonies.

Persons living more than 50 miles from a commissioner could declare themselves married, and make it binding by writing a statement, signed by two witnesses, setting forth the fact of marriage.

A DEVICE TO TEACH ABOUT FLIGHT CONTROL

Los Angeles, April 30—Student airplane pilots of the future may learn to take-off, pilot and land a ship without leaving a stationary position on the ground. A device invented by George D. Beeson and recently tested at the Los Angeles municipal air port is designed to make such instruction practical.

The device is the result of two years of experimentation, and operates automatically under electrical and pneumatic power. The student pilot sits before a standard instrument board, containing blind flying instruments and standard controls.

During the take-off the scenery flashes before the student's eyes on a screen while he remains stationary. Everything is as realistic as possible, even the shadow of the plane's engine and wing struts appearing in the foreground. The roar of a miniature propeller with the blades flashing before the pilot's line of vision adds the last bit of realism. The horizon shifts in accordance with the manipulation of the controls as it does in real flight.

Following the test Beeson said he was confident that an average student could fly and even land a plane after two hours practice with this equipment.

SENTENCED TO EAT SPINACH

Evanston, Illinois, May 2—The next time Mrs. A. L. King cooks spinach for her husband it's likely that he'll eat it.

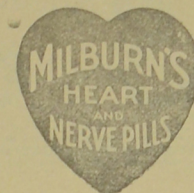

He was sentenced to do so by Police Magistrate Harry H. Porter.

It seems that King was accused by Mrs. King of becoming so angry when she suggested that he partake of the spinach she had prepared for him, that she feared his wrath would get out of bounds, so she called police. They locked him up. He came before the magistrate.

"If you will promise to be agreeable to your wife and eat your spinach like a man in the future, I'll let you go free," said the court. King agreed.

Though a crooner may work long hours preparing his songs he seems to get a lot of sleep while singing them.

Smothering and Fainting Spells Everything Would Turn Black

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Mrs. Andrew Black, Harcourt, N.B., writes: "I had been troubled with smothering and fainting spells and everything in front of me would turn black, and I would fall down in a faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and decided I would give them a trial. I used four boxes and found they help me wonderfully."

LEAVE IT TO THE KIDS AND THEY'LL GET ON

(New York Sun)

The taxi swept up the street. On the rear bumper, all unbeknown to the driver, was a reckless young tike of 14 or so.

"What puzzles me," said Billings, "is how the darned kids find a chance to get on a place like that. I can't believe the driver wouldn't notice if the cab was waiting for a fare. He'd feel the car sag with the boy's weight. And any passenger certainly would notice if any one hopped on behind while he was getting in. And when the cab is going it moves too fast even for a kid to grab a rear bumper."

Just then Billings and his chum Bolt came to a corner and perforce, stopped to make sure they could cross without a collision. As they stood at the curb taxicab swung around the corner. It slowed up, naturally; and it did a youngster who had been standing beside Billings made a flying leap and perched himself half astride the bumper, half wrapped over the spare tire.

"There's your answer," said Bolt; "leave it to the young devils to figure out a place where even a taxicab has to go slow."

MILLION FRANCS FOR CELEBRATION

Rouen, France, May 2—The French Chamber of Deputies has voted credits of 1,100,000 franc to this city for the celebration of the fifth centenary of eJeanne D' Arc, which will be observed in May.

Naturally women are gentle and humans. A feminine psychologist thinks all men should be chloroformed—much the daintiest method of getting rid of them.

Did you ever give thought to the sagacity of the man who invented spanking? He had in mind a minimum of physical pain to be administered with a maximum of humiliation.
