Labor Government May Go Out of Office On Coming Thursday

The Liberals Have Warned the Administration That It Must Give Tangible Evidence of Its Intention to Grapple Seriously With the Unemployment Problem—Will Resign If Defeated.

LONDON, April 13—The Liberals are warning the Government today that unless it can show some tangible evidence of its intention to grapple seriously with unemployment and listen to Liberal plans in the matter, it will go out of office on Thursday when the Conservative motion of censure on the unemployment situation comes up in the Commons.

It is understood that if the Government is defeated it will resign and advise the King to dissolve Parliament, because there is no question of an alternative government nor of Right Hon. Stanley Baldwin, Conservative leader, being prepared to go to the country at the present time.

BOOK ON SALMON ANGLING WILL APPEAR SOON

Dr. Geo. Parker Holden of Yonkers, New York, Writes of His Experience at Hartts Island Pool and Other N. B. Streams.

"Angling, Recollections and Practice," a book on fresh water angling by Dr. George Parker Holden, of Yonkers, N. Y., will shortly appear from the press of D. Appleton and Company, publishers of New York. Dr. Holden has made a number of fishing trips to the Hartt's Island Salmon Pool, on the Saint John River, under the guidance of Raymond Currie, of this city and it was at this pool four years ago he hooked and landed his first Atlantic salmon. His previous experience had been with bass, trout, muskallunge, and other game fishes in American waters. In the advance notices of his new book the statement is made that salmon angling will be discussed comprehensively. It goes on to say that "there are explicit details of accessible and inexpensive salmon fishing that will appeal to many readers who have thought that the fishing of salmon was to be considered only by the wealthy, and there is a thrilling experience of the author's first salmon experience."

Dr. Holden is the author of a number of books on fresh water angling which have had a large circulation among the sporting public of the United States, and the appearance of his latest effort along that line will no doubt be awaited with considerable interest.

LABOR GOVT. FACES SERIOUS SITUATION

London, April 12—Premier Ramsay MacDonald and his Labor Government have faced many great political obstacles since they came in power. Some they have surmounted, at others they have stumbled. But the stiffest obstacle of all will be the Conservative motion of censure, the division on which will take place shortly after Parliament resumes on April 14, after the Easter recess.

Ever since the general election of 1929, which left Labor with the largest party in the House, and the Liberals with the balance of power, the Labor Government has hung on with the support of the Liberals. And in the coming division, Liberal support cannot be relied upon. Possibly the Liberals will again support the Government, it is equally likely that enough Liberals will follow Sir John Simon's independent lead to defeat the Government. And the Prime Minister has indicated that defeat will probably be followed by the Government's resignation, or dissolution of Parliament and a general election.

PHYSICIAN WARNS PUBLIC OF VITAMIN MANIA

St. Paul, April 13—Some persons worry too much about vitamins, in the opinion of Dr. Walter C. Alvarez of the Mayo Clinic at Rochester, Minn.

"It is only a thoughtless or ignorant person who would worry about the vitamin content of the diet," he wrote in an article made public today, based on questionnaires answered by 470 physicians throughout the United States. "Everyone who eats sensibly has enough vitamins stored in his body to tide through a few weeks or even months of semi-starvation."

Dr. Alvarez's views, published in the April issue of Everybody's Health, a publication of the Minnesota Public Health Association, referred to the matter as "The vitamin mania of the twentieth century."

OUTBREAK OF FOREST FIRE IN THE WEST

(Special to THE DAILY MAIL by the British United Press.)

Wisconsin Rapids, Wis., April 13—Fire, raging unchecked across thousands of acres of cutover timber and virgin forests, spread today from town to town, levelled the countryside in its progress, endangered thousands of lives and oused until property damage in Northern Wisconsin and upper Michigan.

Frantic calls were sent out from village to village and from city to city asking aid in fighting the great menace of the northland, but they went unheeded for the most part. Each town faced its own fight. It's men were needed at home.

SWISS NAVY HAS BEEN FOUND

Berne, Switzerland, April 11—The Swiss navy has been found here. Its appearance has routed the stage joke-smiths of all nations.

M. B. Haller of the Historical Society of eBrne, stung by the laughter which greeted the admiral of the Swiss fleet when that supposedly mythical character appeared on the Paris stage in a revived musical comedy, went on a hunt which disclosed that in 1792 this mountain-girt country really had a navy.

The flotilla operated on Lake Geneva, and, moreover, was commanded by a Frenchman, a Col. Crouzas, who held a commission as admiral.

Furthermore, there was an earlier fleet on the lake in 1583 and in 1659 the country built four other war vessels. But the latter squadron was fashioned by carpenters of Geneva and could not navigate in storms so it was never commissioned.

The Shipowners Of Great Britain Want Cut in Dues

Matter—May Appeal to Canada and the U. S. Meeting in Paris Today to Consider the Matter—May Appeal to Canada and the U. S. For Support.

PARIS, April 13—If the directorate of the Suez Canal Company, which is meeting in Paris today, decides to refuse the request of British shipowners for a reduction in canal dues which, they claim, are crippling British Empire and world trade, it is likely that English shippers will appeal for support to Canadian and American shipping interests.

While the amount of Canadian and American shipping which passes through the canal is small compared with that of the British, Canada and the United States must pay the same high dues.

English shippers declare that the 'exorbitant' dues react on world shipping and trade. The British hold forty-four per cent. of the shares in the Suez Canal Company, the majority of the directors being French.

SPAIN WANTS REPUBLICAN GOVERNMENT

(Special to THE DAILY MAIL by the British United Press.)

Madrid, April 13—The cities of Spain have presented King Alfonso XIII with a clamorous demand for republican government.

Aroused by eight years of dictatorship, the voters in yesterday's election in almost 9,000 cities and towns repudiated the monarchy and piled up a smashing victory for republican socialist candidates.

The cabinet and King Alfonso had today to consider the results of the election—which was the first of three steps toward return to Parliamentary government—prior to Tuesday's regular cabinet meeting.

The fact that the Cabinet has shown serious signs of splitting recently was believed to signify an impending crisis.
