LEADING, NOT DRIVING

Dr. Aldrich, Chicago baby specialist, tells mothers to cultivate children like plants, and not try to handle them like machines. Lead, don't drive. Don't force a child to an unnatural progress mentally or let him lag behind. Speaking of year, a very important subject, Dr. Aldrich says:

"We must be careful to let the child know he is safe from harm. Under the modern home environment a child need never know fear. Unreasonable development of fear is dangerous to the child's nervous system and the emotion serves no real and except, perhaps, in saving him from such danger as automobiles.

"Possibly more important than any other single attitude toward children is our attitude toward their misbehavior. We must remember that there is no such thing as 'sin' in children. A child is born into the world with natural desires. In the past we have called these desires 'sin' when they have been in disagreement with social conventions. It isn't sin at all. It is simply human nature trying to climb the fence.

"We must lead children, not curb them."

DOLLARS AND DOLLARS

An Ottawa paper recently published the following, which is of special interest at the present time:

"On a Dominion dollar note there is the following inscription:

"The Dominion of Canada will pay to the bearer on demand, One Dollar. And, it explains the One Dollar is in gold.

"On a One Dollar note of the United States there is this inscription:

"This certifies that there has been deposited in the Treasury of the United States of America One Silver Dollar, payable to the bearer on demand.

"One Silver Dollar. And the value of the silver in a silver dollar is exactly twenty-eight cents. Yet the American dollar with twenty-eight cents worth of silver in it, it worth twenty cents more than the Canadian dollar, backed by gold. What can the average man make of that?

Our contemporary has apparently overlooked the fact that the American silver dollar bears the inscription, "In God We Trust." Perhaps it is a mountain moving faith in a supreme being that is responsible for the parity of the American dollar today as compared with the Canadian.

A citizen of an economic turn of mind has requested The Mail to publish the following:

"Many people have wondered at the depressed condition of the world today, and the cause of the same. It would appear that the world after a period of fifteen years of fast living, exploitation, extravagance and waste, is simply resting, or in other words humanity has gone to sleep for a time, but only to arise at the dawn of the greatest prosperity the world has ever seen. Let us then bide our time and all things will be righted."

It is said that the carcasses of fifteen hundred buffalo killed on the government ranch at Wainwright, Alberta have been shipped to Montreal and placed on the market. Buffalo meat is said to be very good, but the market, well stocked with meat products, being sold by the farmers at less than the cost of production, is hardly in a receptive mood for it at the present time. It might have been better policy to have turned the buffalo loose in the Arctic waste.

The radio auction pulled off on Monday of this week by the Fredericton Rotary Club, is still much talked about. The members of the club went into the enterprise with a wonderful display of energy. The business men were not asked for money contributions but game cheerfully of goods, etc., which the club had no difficulty placed on alienated affections.

in converting into cash. In return the donors were given a lot of excellent publicity.

All will be glad to know that Right Hon. Winston Churchill, who was struck by a taxi cab a few days ago, and is now in a New York Hospital, is rapidly improving. Today he was allowed to sit up and smoke a cigar. It will take something more than a taxi cab to knock out this gifted statesman and soldier. Mr. Churchill has been the hero of many daring exploits during his life time. Old residents will recall that he was taken prisoner during the Boer war, but escaped from the Pretoria jail and was not recaptured.

Perfumer Coty's wealth may be gauged from the fact that his alimony to his last wife will run over \$5,000,000 in the next 10 years. This illustrates again that if one minds the scents, the dollars will take care of themselves.

You may not believe this, but it has been possible for a man to keep perfectly warm and comfortable in Southern California, during these early winter months, by shoveling snow. It's the climate.

Experts in English tell us that the anxious Saxons said, "Oh yeah." We also hazard the guess that they said "Uh huh." While as for "Ouch!" the first Saxon baby probably originated that indispensable exclamation.

The "bridge match of the century" may produce a superior brand of card playing, but the cross-table vocabulary seems to be of the ordinary parlor or back-yard variety.

Mary Hughes of Worthing, England, who owned the original little lamb that Mary had, is dead at the age of 90. And in a few years it will doubtless be possible to prove that she never lived.

So far the great test of contract bridge bidding systems has proved only that in any card game there is bound to be an unequal distribution of hands.

It has been discovered that Los Angeles bootleggers have been hiring men to serve their jail sentences for them. This looks like the end of the unemployment crisis.

If the next Japanese Cabinet is not an antique, it will at least be headed by one.

THROUGH OUR SIEVE

What is home without a mother to empty the ash tray?

Many of our best people are studying the art of making both ends meet.

Too many nations seem armed with suspicion for peace to get a firm place in the national consciousness.

Our Electric Light rates are too high, but nobody seems to care and the Electric Light Co. are perfectly satisfied to let them remain where they are.

Somebody remarks that "shingles are not heard of much these days. Men used to have 'em, but we never heard of 'em going clear around, no matter how skinny the patient.

That old theory that a common cow, killed by a railway locomotive, had a value far in excess of what she was worth on the hoof seems related in some way to the high price placed on alienated affections.

NEW CAYENNE PEPPER HAS BEEN PRODUCED

Baton Rouge, La., Dec. 17—More and better cayenne pepper soon will be leaving Louisiana for all parts of the world if experiments successfully completed at the state university are indicative.

Dr. Julian Miller, who has been conducting pepper breeding experiments for two years, has produced a pepper of uniform type by inbreeding and selection. The plant is a good producer, and manufacturers say the pepper dries uniformly and with no discoloration. The university expects to have an ample supply of the new type seed for distribution to farmers of the state by next year.

PLANTING TROUT IN ARGENTINE LAKES

Nahuel Huapi, Argentine, Dec. 17—Launching a national fishing industry for Argentina's inland lakes the ministry of agriculture has painted in Lake Trafal, near the Chilean border, 50,000 Atlantic salmon and river trout eggs. Similar painting have been made at other lakes.

SERGEANTS STUDY FOR COMMISSIONS

Madrid, Dec. 17—Hard-boiled sergeants are doing home work these nights following a decree democratizing the arm and making non-coms eligible for commissions. Under the manarchy all officers were aristocrats.

"A Maryland women picked 50 four-leaved clovers in her back yard in one hour." It may turn out to have been bad luck, if Opportunity was knocking at the front door.
