Will Demand Tariff On Foreign Wheat Shipped to Britain

A Deputation From the Conservative Agricultural Committee to Urge the Matter on Right Hon. Stanley Baldwin and the Minister of Agriculture—Says Quota Is Not Enough.

LONDON, Oct. 29—A demand for a tariff on foreign imported wheat will be made by a deputation from the Conservative agricultural committee, which comprises two hundred Conservative members of the House of Commons, when they see Right Hon. Stanley Baldwin and Right Hon. W. E. Elliot, Minister of Agriculture and Fisheries, on Tuesday night. The deputation will urge that a quota is not enough and that there must be an import duty.

Labelled Made in U. S. A."

LONDON, Oct. 29—The patriotic admonition "Buy British" is being stamped on every letter that passes through the British post office in an effort to stimulate Empire trade.

Ironically, the high speed cancelling machines which do the stamping are labelled "made in U. S. A."

PLEASED OVER REDUCTION IN STUMPAGE

Report That the Fraser Companies Will Carry On Exclusive Lumbering Operations.

Saint John, Oct. 29—Sixteen million feet of timber will be cut during the present season by Fraser Companies Limited, according to word received here from the Department of Lands and Mines yesterday.

Informing the department that they are very much pleased with the Government's effort to increase employment through reducing the stumpage rates, the management of Fraser Companies Limited, have announced that they would run their Plaster Rock mill at full capacity this winter, cutting a total of 10,000,000 feet of logs, and that it is their further intention to re-open the Fredericton mill on a part time basis to handle a cut of 6,000,000 feet in that area.

Pulpwood Policy

With regard to pulpwood, the policy of Fraser Companies, is as far as possible, to purchase supplies from the settlers, small jobbers and independent operators which will mean distribution of money in localities which most need it. They are not yet in a position to announce the extent of their general pulpwood operations for the winter.

On Thursday, the Department of Lands and Mines announced that arrangements had been completed with the Miramichi Lumber Co. Ltd., for a new cut of 15,000 cords of pulpwood, and with Ahley A. Colter, Limited, for a cut of 2,500,000 feet of logs on the Burnt Land Brook area of the Miramichi Lumber Co. Ltd.

FOG DARKENS LONDON

London, England, Oct. 28—The first dull fog of approaching winter shut down on London with the blackness of night this noon and householders and shopkeepers turned on their lights in the gloom.

The Weather Bureau estimated that 33,000,000 tons of rain fell in the metropolitan area yesterday, but even this did not wash away the smoke and fog.

CRANBERRIES BEING SHIPPED TO MONTREAL

A Carload Purchased by the Willett Fruit Company Going Forward Next Week—The First Large Shipment From the Province.

The cranberry industry in the vicinity of Rusiagornish is providing employment for a number of men this season and is bringing considerable money into the neighborhood. Early next week the first carload of cranberries ever shipped out of New Brunswick will leave Rusiagornish station by the C. P. R. consigned to the Willett Fruit Company of Montreal. The berries are packed in wooden boxes, containing a bushel each, and have been carefully inspected by an official of the company. Clarence and Wendall Bunker supplied the berries under contract with the company and attended to the loading of the car. A dozen or more men were engaged in picking operations, and used a patent scoop imported from Cape Cod, U.S.A. With the aid of this contrivance, a barrel of cranberries can be picked by one man in three hours, which is pretty fast work. The berries are well ripened, of good color and quality and fully the equal of those produced at Cape Cod. With the Cape Cod product quoted in the Montreal market at \$3.50 per bushel wholesale, the New Brunswick berries should sell at a price that will yield a good profit to the shippers.

TWENTY PER CENT SHIPPING IS IDLE

London, Eng., Oct. 29—Twenty per cent. of the world's shipping is laid up because of the depression, Lloyds' register showed in its annual report Wednesday. The total idle tonnage is 15,000,000 compared to 10,500,000 tons in 1931 and 5,000,000 in 1930. Only an improvement in world trade will remedy conditions, Lloyds said.

THE LIVES OF CHILDREN WERE SAVED BY NUNS

Convent Near Quebec City Damaged by Fire, Third Blaze of Importance in Three Weeks.

Quebec, Oct. 28—Undaunted in the face of extreme danger from flame and smoke, nuns of the order of the Dominican Sisters of the Infant Jesus today moved quietly but swiftly to remove scores of children to safety from a burning wing of their hospital on the outskirts of the city. The children were placed in a wing far removed from the blaze and none was injured.

Aided by a large force of fire fighters, summoned by three alarms, the nuns managed to save all children, and an hour's work by the firemen extinguished what for a time looked like a serious fire.

The blaze was third one of importance in Quebec Province during the past few weeks. A large pile of pulpwood valued at \$170,000, was totally destroyed at Chandler, on the Gaspé peninsula, this week, while three weeks ago a beautiful Roman Catholic Church at Lamoraie, Quebec, was reduced to ashes with a loss of \$80,000.

Hospital officials could not at once

VOTE ON TRADE AGREEMENTS MAY BE TAKEN ON MONDAY

Ottawa, Ont., Oct. 28—Beginning next week the members of the House of Commons will be deprived of their usual "Wednesday evening off". By virtue of a motion by the Prime Minister, adopted in the House today, sitting will be held on Wednesday evening until the long adjournment for Christmas. There will be no session Tuesday, All Saints Day.

Private business matters between the Department of National Revenue and the general public may not be disclosed in the form of answers to questions in Parliament, Hon. E. B. Ryckman, Minister of National Revenue, told the House in a return tabled today. Questioned had been asked by Thomas Reid, (Liberal, New Westminster), respecting fish imports at New Westminster and Boundary Bay, and the duties collected thereon.

Copper Preference

During the Imperial Economic Conference, representative copper consumers in the United Kingdom and Empire copper producers conferred for the purpose of ascertaining the extent to which the latter could supply the wants of the Empire, Rt. Hon. R. B. Bennett, Prime Minister, informed the House of Commons today. He believed that the Conference was satisfactory. It was unnecessary to point out, the Prime Minister said, the necessity of making provision for Empire copper being used in Great Britain, the third largest consumer in the world.

The matter arose when Rt. Hon. W. L. Mackenzie King, Opposition leader, drew the attention of the Government to a despatch from London quoting Rt. Hon. Walter Runciman, president of the Board of Trade, as saying that the United Kingdom Government would seek to impose a duty of four cents a pound on foreign cop-

HUNTERS ARE STORM TRAPPED IN WYOMING

Posse Searching For Hunters Caught in a Blizzard

(Special to the DAILY MAIL by the British United Press)

Sheridan, Wyoming, Oct. 29—A posse of twenty-two men who were searching for the bodies of three storm trapped hunters, were themselves trapped in a blizzard in the Big Horn mountains today.

The party led by Fred Agge, supervisor of the Big Horn Forest sought the bodies of Fred Femmel, Dillon McKinnon, and Dell Yoakum, Wyoming hunters who were lost in a snowstorm two weeks ago and are thought to have perished.

Walter Damrosch thinks it's a crime to feed modern music to children. It will be time enough to get excited when they take it.

explain the origin of the outbreak but persons in the vicinity said that the flames broke out very suddenly, and one woman whose house faces the institution declared it appeared as if the result of an explosion. She had not heard any noise of that nature however.

The hospital was built in 1923 and is consecrated mainly to the care of sick and orphaned children. Originally designed for 120 beds, it was recently enlarged to afford accommodation to 300 patients. The permanent population of the hospital consists of 35 Dominican Sisters, 85 nurses, 84 children and 41 adults. Rev. Mother Gerard Majella is the superior in charge of the institution.

Damage was vaguely estimated at several thousand dollars.

Hunger Marchers Want Government To Assist Them

Delegation Will Plead Their Case in the House of Commons—One Hundred Thousand Expected to Participate in Trafalgar Square Meeting On Sunday.

LONDON, Oct. 29—The army of hunger marchers which invaded London this week to protest against restrictions of unemployment relief urged the Government today to act in their behalf.

A delegation will seek to plead the marchers' case before the House of Commons next week.

It also was announced that, in addition to small borough demonstrations today, a monster protest meeting will be held at Trafalgar Square tomorrow, when more than one hundred thousand are expected to participate.

NOVEMBER A GOOD MONTH FOR HUNTING

New York Sport Writes He Saw 194 Moose in Province During 15-Day Trip—Guides Are Booking Parties.

New Brunswick's 1932 big game season will have reached the half way on Tuesday next. Four weeks still remain and this period is regarded by many as the most advantageous time to hunt moose, deer and bear in New Brunswick.

November is the month when "Still Hunting" or "Stalking" is at its best and that month usually sees the largest influx of big game hunters in this province. The calling season concludes around October 29th and this year the guides and game wardens in New Brunswick report a fairly large kill of moose and deer during that period.

In Albert County, in the southern part of the province, moose have been reported very plentiful but the largest head taken in the province this season came out of the Miramichi area. It was taken by George W. Hill, President of the American Tobacco Co., and the antlers spread was 52 inches. Several other heads have been taken with antlers ranging from 46 to 49 inches of spread.

During the month of October the weather was unusually warm in New Brunswick and hunting conditions were thus made somewhat difficult, due to the fact that the foliage remained on the trees in mid-summer thickness. The larger moose, therefore, did not move about as much as they usually do during the "calling" season and guides in the province believe the month of November this year will be better than ever from a big game hunting standpoint.

Saw Many Moose

As an indication that moose are still quite plentiful in New Brunswick the report of George H. Lesser, well known taxidermist of Johnstown, New York, is worthy of consideration. In a letter to D. Leo Dolan, Director of the New Brunswick Government Bureau of Information and Tourist Travel, Mr. Lesser, who was hunting with Claude Bishop, guide of Albert County, says:

"The two of us saw 194 moose, many of close enough to take movies with fifty feet. You will make no mistake in recommending Mr. Bishop's territory to vacationists who want a real hunting trip. If there is any service at his camp that was lacking I am

UNLIKELY TO RECOGNIZE MANCHURIA

Washington, D. C., Oct. 29—Reports that the German government has been considering recognition of Manchuria caused much astonishment here.

Neutral diplomats here indicated Wednesday Germany hardly would consider recognition of the Manchurian government, particularly in view of the unfavorable impression which such a move would create in Washington at a time when attention is centered on German foreign policy in General. The German demand for equal armament rights is of the highest importance to Berlin.

ASKED TO TOOT WHISTLES SOFTLY

North Bend, Nebraska, Oct. 29—A petition has been presented the Union Pacific railroad by the council of North Bend, asking that engineers on the road be required to "toot their whistles softly" while passing through town, so as not to disturb the slumber of residents.

Mrs. Louise Glasgow, of Montreal, arrived at noon today en route to Pennsac to visit her former home.

sure I could not find it was on our recent fifteen day excursion there."

Mr. Bishop's outfit is no exception in New Brunswick which has for years been known as a province amply supplied with guides of exceptional ability and unusual equipment for the big game hunter. These guides are continuing to book parties for the remainder of the 1932 season and the prices being charged for these guiding services this year have been materially reduced to make a hunting trip to New Brunswick all the more attractive at this time.

This year is an especially good one for a non-resident to get deer and bear in New Brunswick. The non-resident hunter is allowed to take two deer and four bears on a big game license and the month of November is admittedly the best season for deer hunting. Large bucks are on the move at that time and the prevalence of beech nuts in New Brunswick this year has been an additional advantage to the hunter who is after black bear. There are now more bear in New Brunswick than in some years and some of these have been killed by non-resident hunters during the early part of the present season.
