

CITY OF FREDERICTON

Notice of Sale of Lands

NOTICE IS HEREBY GIVEN, that pursuant to the provisions of the City of Fredericton Assessment Act, 1926, there will, for the purpose of satisfying taxes assessed and levied in the said City of Fredericton, for the years mentioned hereunder, against the parties hereinafter named, unless the several sums due, together with the costs of this notice, are sooner paid, be sold at Public Auction in front of the City Hall, in the City of Fredericton, at eleven o'clock in the forenoon of the 23rd day of September A. D. 1933 the lands and premises in the said City of Fredericton, hereunder mentioned and set opposite their respective names,

Property to be sold	Name of person assessed	Arrears for years	Total due
A lot on west side Camperdown Alley, 39 ft. on alley, 70 ft. deep.	Harry E. Beatty	1930-1931-1932 Interest	257.41 28.91
Lot on west side University Avenue in block between George and Charlotte Sts. 50x100.	Estate Geo. W. Clark	1930-1931-1932 Interest	208.12 22.83
Lot on East side of University Avenue, inside land, 229 feet from Avenue 62x87-5 in.	W. C. Clark	1930-1931-1932 Interest	30.64 3.05
Lot on south side of Queen Street above Regent Street 49x169.	P. B. Coleman Estate	1930-1931-1932 Interest	1915.00 216.35
2 Lots on east side of University Avenue, between Shore and Lansdown Streets.	Wm. Shore Estate	1927-1928-1929-1930-1931-1932 Interest	228.53 48.30

Dated the 15th day of July, A. D. 1933.
FRED I. HAVILAND,
City Treasurer of the City of Fredericton.

FREDERICTON, N. B.

PREMIER BENNETT AT MONTREAL
BANQUET STRESSES IMPORTANCE
OF MAINTAINING EXPORT TRADE

Montreal, Aug. 31—Continuance of Canada's national life depends on maintenance of her position as a great exporting nation, and, therefore, this country cannot experiment with shorter hours of work and higher rates of pay.

This declaration from Prime Minister R. B. Bennett tonight was interpreted by his own hearers as a partial answer to the often asked question as to how far Canada might go in following the national recovery plan of the United States.

While the Prime Minister did not mention the United States, there was a note of warning in his voice as he spoke to a distinguished group of his colleagues in the cabinet and in parliament and leading Montreal business men assembled at dinner under the auspices of the Montreal Board of Trade.

"Keeping up with the Jones' has been the ruin of nations as well as individuals," declared Mr. Bennett. He went on to say that Canadian should not fancy themselves a nation of 100,000,000, or self-sufficient unit.

Export Trade Essential

Canada was the fifth exporting nation of the world. Export trade was essential, and in export this country had to compete with the highly specialized, highly organized and highly efficient methods of production of the countries of the Orient and Europe.

The dinner brought to a close a busy day for the prime minister, his first day on Canadian soil in nearly three months since he sailed to attend the World Economic Conference. Early this morning he disembarked from the liner Empress of Britain at Murray Bay, motored to Quebec, where he was given an impromptu reception and came on to Montreal where another cheering crowd assembled at the station to meet him.

In his talk tonight the prime minister touched on the highlights of the World Economic Conference, and expressed his firm convictions that far from being a failure the conference had done a tremendous amount to smooth out some of the bumps in the road to world economic recovery and contributed not a little to the cause of world peace.

Canadians who had been led to believe the Prairie Provinces were the granary of the world might be shocked, Mr. Bennett said, when they were told that France this year would produce between 75,000,000, and 100,000,000 bushels more wheat than Canada, that Italy would produce 75,000,000 bushels more and that Germany and Spain together would produce substantially more.

Gravity of Crisis

This illustrated the gravity of the wheat crisis with which the conference of exporting and importing nations dealt. With huge stocks on hand in Canada and the United States, with the European countries increasing acreage and this year harvesting a bumper crop, it is obvious something had to be done to insure the normal workings of the law of supply and demand. The problem was to see that the producer received a fair price, and that the consumer was not victimized and that the huge stocks should not be allowed to overhang the markets and depress prices.

The agreement signed by the representatives of the nations assembled in London would accomplish the purpose, the prime minister believed. Under its terms, Canada's export this year was to be limited to in the neighborhood of 200,000,000 bushels, and this country further agreed to reduce next year by 15 per cent.

Common Sense Prevailed

"I am happy to say that common sense and reason prevailed at the wheat conference," said the prime minister.

The monetary committee of the economic conference accomplished a tremendous amount of good even though agreement on the currency stabilization question was not reached. Mr. Bennett went on. In this connection, the conference made two important declarations. It reaffirmed that gold was the only satisfactory medium of exchange but it also declared that gold need not be used in transactions within a single nation but need only be used to settle international balances.

Readily Understood

The reasons which prevented the

United States from joining in a stabilization plan could be readily understood, said Mr. Bennett. A country of 120,000,000 people with 12,000,000 out of work owed its first duty to its own people and could not be expected to jeopardize the success of its own recovery plans by prematurely entering into international commitments. "In the main," said Mr. Bennett, "I can say the discussions which took place, the information which was made available to the delegates and the realization acquired of the points of view of one another enabled progress to be made in determining how the conference could move to secure the operation of the old law of supply and demand."

The huge oversubscription of the recent Canadian loan of £15,000,000 (75,000,000) in London showed that the financial credit of Canada never stood higher in that financial centre than now, declared Mr. Bennett. He compared the reception accorded this loan to the last previous loans floated in London, in 1913-14. Then, higher interest was paid on much smaller loans and in some cases as little as 18 per cent and never the whole of the issue was taken up by the public. This time the public oversubscribed the amount of the loan many times.

Vocation Work
About the Same

(continued from page 8)
which was closed for half of last year, will not be reopened this year for the same reason, which forced its closing, namely, lack of finances. At St. Stephen and Milltown nothing will be done until a school is built to take the place of the one burned last winter.

A full report on conditions will be made within two weeks time after the schools have been opened. All indications at present time are to the effect that the vocational education of the youth of New Brunswick will be carried out on a basis no less favorable than last year.

United Baptist
Women Conclude
Their Sessions

The 27th annual convention of the United Baptist Women's Missionary Union of the Maritime Provinces was concluded here last evening in George Baptist Church.

Speakers of the final session were Miss Agnes Waring and Miss Alice A. Clark, the union's own representative in the Bolivian missions. The resolution committee reported, and a solo was sung by Donald McLeod, of Saint John.

In an interesting and enlightening manner here yesterday afternoon, L. W. Simms, of Saint John delivered an address on "The Oxford Movement", in which he pointed out its characteristics and its place in present-day activities of the world.

Mrs. Ben Gullison also lectured at some length to the young people. With far the largest attendance of any of the sessions of the convention, considerable discussion took place in making out the estimates for the year 1933-1934 and a report of the World Wide Guild by Mrs. Somers was heard with interest. Miss Falconer and Miss London, new missionaries, were also introduced to the delegates and visitors and made brief addresses. A solo was sung by Donald McLeod.

REFORMED BAPTIST PICNIC

Grown-ups and children of the Reformed Baptist church held their annual picnic on the Tourist camping grounds above the city on Thursday afternoon. During the afternoon games were played and the young people engaged in an exciting game of the ball. Refreshments were served later in the day. William McFarlane superintendent of the Sunday School, was in charge of the program. The pastor, Rev. F. A. Watson, and Mrs. Watson were present.

Mrs. W. S. Carter came here by auto this week and spent the past few days, returning to her summer home at Kingston, N. B., yesterday.

Messenger; committee on historical records, Dr. A. C. Christie, Mrs. M. K. Ingraham, Rev. W. G. Henderson, Rev. R. O. Morse, Miss Phoebe VanWart, Rev. H. G. Mellick, H. G. Nable, W. P. King, Rev. A. G. Crowe; preacher of convention sermon, Rev. W. Ideson, alternate preacher, Rev. I. D. Lytle; editor of year book, Rev. R. D. Morse; official press reporter, Rev. R. O. Morse; treasure Denon. funds, Miss L. Rae Curry; auditors, Belyea McNair and Company; committee on resolutions, W. C. Cross, Rev. W. C. Kierstead, Judge A. J. Crockett, Rev. A. C. Vincent, Rev. P. R. Hayden, F. L. Atherton, F. E. Ocke.

The report of the board of governors of Acadia university presented by the secretary of the board, Dr. I. B. Oakes, showed a registration of 589 in Acadia university. In Horton academy 272. Total 861.

This is about ten per cent less than the previous year. The faculty changes for the new year are very few:

Total gifts of money during the year \$27,038.76. Of this \$15,000 was from the Carnegie Fund for Library extension.

The student life was never on a higher level. Never was more faithful work done by students. A summer school was held with registration of fifty eight.

Dr. I. B. Oakes, after twenty nine years as secretary of the Board of Governors of Acadia University, has retired as secretary and been made Emeritus secretary.

An advance movement for five hundred thousand dollars additional funds was authorized.

The convention recorded its appreciation of Dr. Oakes and his services to which he very fully responded.

Dr. McCrimmon delivered his third devotional address dealing with the Human Experience following the acceptance of the Alonimen of Jesus Christ.

VISITED FRIENDS HERE

Mrs. I. C. Sharp, of Montreal, and Mrs. J. Robertson MacIntosh, of Ottawa, who have been spending the summer at their summer home at Westfield Beach were in the city yesterday and spent the day with friends. The two will return to their home to Upper Canada within a few days.

RETURNING HOME

Mr. and Mrs. Walter Landon, of Boston, who have been spending a week with relatives at Kingsclear, left by car this afternoon en route home. They plan to spend the week-end with relatives at Calais. Mr. Landon was called to Kingsclear by the serious illness of his uncle, Charles Wheeler.

CONDITION UNCHANGED

There is no change in the condition of Ludlow Young, who was seriously injured in an auto crash at Victoria's Mills early Tuesday morning. He has not fully recovered consciousness at any time since the accident. Very little hope is held for his recovery.

BIG ONES CAUGHT

Salmon of the hook-bill variety are now making their way into the Hart's Island Pool. An eighteen-pounder was caught yesterday and another of fifteen pounds this morning.

SUNSPOTS ARE
USEFUL TO THE
WEATHER MAN

Ottawa, Ont., August 28—A small, affable, partly bald man, living here among astronomical telescopes, books, and a host of wild animals that eat out of his hand, is Canada's longest distance weather forecaster, but he would be the last to call himself a prophet.

Dr. Ralph E. DeLury, solar expert at the Dominion Observatory, and strong exponent of the theory that sunspots influence the earth's weather, crops, economics and even wars, has made some hairbreadth prophesies in his time, but he refuses to believe verification of his views proves them right.

Dr. DeLury believes rain, haziness, and electrical storms come when the sun's face is free or almost free of spots. Sunspots, he says, come in cycles, 11 years from peak to peak. During the last three months the surface of the sun has been almost continuously smooth.

Sunspots, he explains, are great bodies of gaseous matter, 20,000 to 30,000 miles in diameter whirling within themselves across the face of the orb. At their maximum they cover almost one-quarter of its surface and sometimes may be seen without the aid of a telescope. The camera records them as small grey lumps. Presence of spots, Dr. DeLury says, increases the ultra-violet ray output of the sun, causing ionization of the earth's atmosphere collection of gaseous particles into clouds and haze.

Sunspots' Influence

At the sunspot minimum, he holds sunshine is greatest, temperature higher, evaporation of surface moisture on the earth and incidence of rain and electrical storms greater.

He does not admit drought conditions in many parts of Canada this summer belie his theory. It is necessary to consider the total rainfall for the year, he says, because sunspot influence may be counteracted at certain times by local conditions.

Dr. DeLury on April 15, 1932, said the average rainfall in Edmonton, Calgary, and Prince Albert, Sask., during the sunspot cycle varied from 14 to 20 inches. He predicted that precipitation for April that year would reach 20 inches. He was out only one-quarter inch in his estimate.

Delving into the economic field he has found commodity prices in England and Ireland between 1754 and 1869 "showed the effect of the 11 year cycle, prices being at their lowest or the average a year or two after the maximum of sunspots". The most recent maximum was in 1928.

"Indeed", this scientist says "there is a possibility that wars, being dependent on economic conditions are also influenced by solar variations."

These are days when one sees many a rumble seat full of passive resistance.
