Germany Gets None of Belgian Relief

Conditions of Agreement with Neutral Relief Commission respected by Germany

When the Belgian Relief Commission was organized, Britain insisted that Germany guarantee not to touch a particle of the food imported by the Commission for the Belgians. This guarantee, given to the American business men who are the executive heads of the Commission, has been respected—probably because its violation would be reported at once and would rouse the whole neutral world.

No Dollars in the world are needed more—will be handled better—or will do more vital good—than the dollars which it is your privilege to give to the Belgian Relief Fund.
