

HOW LONG WILL THE WAR LAST?

The War Against Health Is Quickly Ended By "Fruit-a-tives".

MRS. DEWOLFE

East Ship Harbour, N.S.
"It is with great pleasure that I write to tell you of the wonderful benefit I have received from taking 'Fruit-a-tives'. For years I was a dreadful sufferer from Constipation and Headaches, and I was miserable in every way. Nothing in the way of medicines seemed to help me. Then I finally tried 'Fruit-a-tives' and the effect was splendid. After taking one box, I feel like a new person and I am deeply thankful to have relief from those sickening Headaches".

Mrs. MARTHA DEWOLFE.
"FRUIT-A-TIVES", the medicine made from fruit juices, has relieved more sufferers from Headaches, Constipation, Stomach, Liver, Kidney and Skin Troubles than any other medicine. 50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

KANSAS CITY WINGES

Billy Sunday's Plain Language Causes Protests.

Kansas City, Mo., May 5.—Theoretically Billy Sunday was very tired on Monday from talking against the rain three times on Sunday, but only theoretically. Actually he was never brighter and never felt better, he said. It was his weekly day of rest.

"Sunshine is the greatest thing in the world," he remarked. "If everybody had as much sunshine in his soul as pours through these windows, what a mighty fine world this would be."

Sunday has no apologies to offer for bringing the words "hell" and "damnation" into common use in Kansas City. News was carried to him that his language in his sermons yesterday had shocked some people.

"Tell them to stay away, then," he said. "If they don't like to hear it, let them give their seat to someone who does."

"I am an old fashioned preacher. I preach the Bible as it is, and no one can come to me and say how I am to do it. The Bible preaches hell. Christ preached hell and damnation."

"The Pharisees in Christ's time lived by rule rather than by heart, and they tried to get Him to tone down His sermons, but He would not let that bunch of hypocrites spit on Him or make a doormat out of Him. He told them where to head in."

"There are a lot of people in Kansas City like the Pharisees. They do not want to hear about hell; but I have only started. Some of them will hear about hell until they think they can smell it."

"Are you preaching a literal hell?" he was asked.

"Yes. Of course the terms 'fire and brimstone' represented in biblical times the acme of punishment, just as golden streets in heaven represent to us the utmost of joy."

"The boobs who are headed for hell need not doubt that it will be hot enough for them."

FREDERICTON EXPERIMENTAL FARM WAS CRITICIZED

Objection Taken in Parliament to an Expenditure of \$50,000 on the Place Last Year---Large Sum Spent on a Piggery---Lots of Stumping Powder was Used.

A \$50,000 piggery at the Fredericton Experimental Farm, and a total expenditure during the year of some \$50,000, figured in the discussion on agricultural estimates in the House of Commons on April 13. A few extracts from Hansard follow here:

Mr. Pugsley—I should like to call attention to the fact that for the year ended March 31, 1915, Public Works Department has expended upon the Experimental Farm at Fredericton \$10,701.56. In addition to that \$10,000 odd, there has also been expended on the farm during the same year upwards of \$40,000. So in one year there has been expended upon a comparatively small farm upwards of \$50,000. It is an "upland farm and cannot be over 200 acres in extent I should think, and to expend \$50,000 in one year in tilling, building, ploughing, stumping, etc., strikes me as an enormous expenditure. Can the minister explain why, in addition to the \$43,000 that was expended on the farm by the Department of Agriculture, he thought it necessary to expend \$10,000 more, making for the year a total expenditure of upwards of \$50,000?

Mr. Rogers—Of course my hon. friend understands that I have nothing to do with the stumping that takes place on the farm. It was found necessary last year to build a superintendent's house, a piggery, an implement shed; these account for the \$10,000.

Mr. Pugsley—How much did the piggery cost?

Mr. Rogers—\$5,000.

Mr. Oliver—How many pigs are kept there?

Mr. Rogers—The acting Minister of Agriculture will be here tomorrow, and will be able to tell my honorable friend that.

Mr. Turriff—It is just in matters of this kind that we should economize. The wisdom of spending \$5,000 on a piggery might be questioned even in ordinary times, but particularly in war times. If the idea of an experimental farm is to set an example to farmers around, how many farmers does the minister expect will be able to afford \$5,000 on a piggery? This item seems to me an unnecessary expense in these times, and also the item we were discussing a moment ago, of \$150,000 for new buildings and repairs. The experimental farm ought to be able to do as well as the ordinary farmer, especially in a time like this. I think the minister could well afford to cut this \$150,000 item in two.

Mr. Rogers—There is some reason in what my hon. friend says. Last year we came to an understanding, and I do not think my hon. friend will have anything to complain about in future.

Mr. Pugsley—How is it the Public Works Department is buying stumping powder for this farm at Fredericton? I see the Agricultural Department expended \$700 for that purpose last year. There was no election on down there, so how comes it the minister was spending money on stumping?

Mr. Rogers—They were probably stumping for the location of the building.

Mr. Pugsley—This is stumping powder. Does it not strike my honorable friend that as the Minister of Agriculture had spent \$700 on stumping powder, this farm could have got along very well without the Minister of Public Works spending \$10 more. While \$10 is not a large item, \$700 is a large amount to spend on stumping powder.

Mr. Rogers—I think my honorable friend will find that that \$10 item is under the Department of Agriculture.

Mr. Pugsley—No, it is under Public Works, according to the Auditor General's Report. I should not expect to find such a small item as \$10 for stumping powder among the expenditures of the Agricultural Department. They buy it in \$700 worths.

Mr. Rogers—Perhaps it was spent on stumping the piggery site.

Mr. Pugsley—That is a new theory to put forward. It seems absurd to spend \$50,000 on that farm when the war is on, and I was very much struck when I saw the item in the Auditor General's Report under the Department of Agriculture. It shows, as so many other things show, that the ministers, except on rare occasions, do not realize that a war is on, or that there is any difficulty in raising money. Does not the minister think that \$53,000 is an extraordinary amount to spend on this farm, while the war is on? But the minister will not look into it; my words will fall upon deaf ears. Unfortunately the Minister of Agriculture is ill, but some other minister ought to give an explanation of this item. My hon. friend from Edmonton suggests that as stumping powder was bought, perhaps the Minister of Militia could tell us something about it. Perhaps the item got into this account by mistake. At all events, of this \$53,000 that was spent by the Departments of Agriculture and Public Works, upwards of \$500 was for stumping powder.

Mr. Rogers—Fredericton is the capital of New Brunswick; a very important province, and a very important city. Unfortunately, as regards the farm, the district is well wooded, and it was necessary to do a great deal of stumping. My hon. friend spoke of other kinds of stumping a moment ago. I am sure he will realize on reflection that the stumping at the farm is not nearly so expensive as the kind he best understands. As regards the \$10 item, the one for which I am responsible, I understand that this was to clear the ground for the buildings that were erected last year at a cost of over \$10,000.

Mr. Pugsley—If stumping powder is used for blasting rock, I can understand that \$700 worth be used on this particular farm, because I am told it is a very rocky farm and one which nobody with a sincere desire to establish an experimental farm would have thought for a moment of choosing. I am told it was selected because it was near the capital and because the gentleman who preceded the present member for York, N.B., happened to live in the capital and quite near the Experimental Farm, and evidently had a great fancy for the sloping hillside of this particularly rocky tract of country which overlooks the St. John river.

Mr. Rogers—I am sure my honorable friend will acknowledge that he is a good judge.

Mr. Pugsley—Well, probably he is a better judge now of legal matters than he was when he was a member of this House as to what would make a good experimental farm. I suppose, however, we shall have to let this item go. It is only \$53,000 more gone into the sink-hole.

AMERICANS WANT CANADIAN PAPER

New York, May 4.—The New York Times, in urging action that will admit Canadian print paper freely to the United States, says:

"It will be recalled that the Canadian reciprocity treaty, which failed as a whole, contained one clause that survives and remains effective. That clause allowed free entry into the United States of Canadian paper and pulp when made from wood whose export was unrestrained in any manner, as by requirement of license or payment of export duty. The dominion imposes no restriction upon export, but the provinces do, especially Quebec and Ontario. In order to promote the home manufacture of the raw material the provinces restrict the export of the wood so that it may be sold as paper. The restriction applies especially to the crown lands in the provinces, which supply nine-tenths of the Canadian product and the United States was able to give free admission only to the products of free lands. There is no intention to criticize the action of the provinces, for it is too much

NEW STRENGTH IN THE SPRING

Nature Needs Aid in Making New Health-Giving Blood.

In the spring the system needs a tonic. To be healthy you must have new blood, just as the trees must have new sap to renew their vitality. Nature demands it and without this new blood you will feel weak and languid. You may have twinges of rheumatism or the sharp stabbing pains of neuralgia. Often there are disfiguring pimples or eruptions on the skin. In other cases there is merely a feeling of tiredness and a variable appetite. Any of these are signs that the blood is out of order.—that the indoor life of winter has lessened your vitality. What you need in spring is a tonic medicine to put you right and in all the world of medicine there is no tonic can equal Dr. Williams' Pink Pills. These Pills actually make new, rich, red blood—your greatest need in spring. This new blood drives out the seeds of disease and makes easily tired men, women and children bright, active and strong. Mrs. Eugene Cadarette, Amherstburg, Ont., says: "I suffered for a long time from dizziness, pain in the back and sick headache and nothing I took did me any good until I began Dr. Williams' Pink Pills. These cured me after taking six boxes and I now feel better than ever I did in my life. I had fallen off in weight to eighty-two pounds and after taking the Pills I had increased to one hundred pounds."

These Pills are sold by all medicine dealers or can be had by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

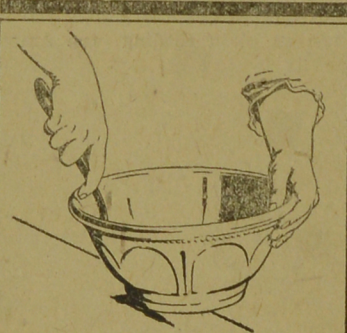

Like our own tariff practice not to be understood and excused, by protectionists at least. But the war has changed conditions. We need the wood more and would buy greedily the paper or pulp made from the wood. Canada also is under stronger need to sell all of them than to protect home manufacturers at this time. Canada needs larger credits in the United States and could supply herself with them in no easier or better way than by making this large item of export eligible for free import to the United States."

IF ALL PLAYED OUT TRY THIS PRESCRIPTION

When that overpowering weariness and a never-rested feeling comes over you, it shows some serious disorder is undermining your health. The cure is simple. Build up the system and nourish the body back to health by pure, wholesome blood.

The one sure means of doing this is with Dr. Hamilton's Pills. They are a marvellous aid to appetite—convert all you eat into nutriment and tissue-building material. Thus a weak body is supplied with new nerve fibre, hardy muscle and firm flesh. Lasting good health is sure to follow. If you really want to get well, and stay well, use Dr. Hamilton's Pills, 25c. per box at all dealers.

SUMMER RECOLLECTIONS.
Har—How was ur date?
Old—Scrappy. She wanted me to stop kissing her, so we compromised.
Har—How's that?
Old—She kissed me.

Thorough mixing is what makes cake delicate and tender

Lantic Sugar

makes the best cake because it creams quickly and thoroughly with the butter which is the hardest part of the mixing. Its purity and extra "fine" granulation make it dissolve at once.

2 and 5-lb. Cartons
10 and 20-lb. Bags

"The All-Purpose Sugar"

SPORTS HATS

"SOMETHING ABSOLUTELY NEW, NOVEL AND PRACTICAL," is what the Sports maid is asking for, and we are ready to fill all orders with a wide variety of design and coloring.

STRIPES PREDOMINATE. It may be in the foundation or we may find it only in the trimming, but in almost every case the stripe will be in evidence.

SAILORS, PANAMAS, LINEN and CANE SEAT, all are features of the midsummer outing hat.
