Much Trouble in Sight for New Labor Government

Independent Wing of the Party Want a Vigorous Program Towards the Achievement of Socialism—Will Make More Trouble For the Premier Than the Opposition—Lloyd George, the Stumbling Block.

(By HERBERT BAILEY, British United Press Staff Correspondent.)

LONDON, June 11—The troubles of Britain's new Labor government have already begun. The Independent Labor party, which controls nearly two hundred Labor members, wants a vigorous and progressive program towards the achievement of socialism which would be impossible to carry through the present parliament owing to Lloyd George holding the balance of power.

The Independent Labor party apparently has little realization of practical politics, and Premier MacDonald will have far more trouble in handling his own men than all the opposition together.

In a recent game at Moncton, in which his team defeated the C. C.'s by an 11 to 7 score, young Dinsmore allowed only six hits and never in any danger. NO INCREASE IN INDEMNITY THIS SESSION

Ottawa, June 10—The government does not propose to take any steps to provide increased sessional indemnities for members of the House of Commons or the Senate during the life of the present parliament. This matter which has been the subject of discussion in caucus and conjecture in parliamentary corridors, has finally been decided insofar as the government is concerned. The decision is against any increase, not only this session, but during any subsequent session of the present parliament. The increase favored by advocates of higher pay for members amounted to \$2,000, bringing the indemnity for members and Senators up to \$6,000 a year. The government, taking cognizance of the move for an increase, gave the matter consideration and decided in the negative.

With the government definitely decided against increased indemnities, members who have been reluctant to leave before the matter was decided may be glad to conclude the business of the session as rapidly as possible.
