

PIMPLES AND BOILS ALL OVER FACE AND BODY

When the blood becomes impure you will find that pimples and boils will break out all over the body, and although they are not a dangerous trouble, they make you appear unsightly both to your friends and yourself.

Burdock Blood Bitters will cleanse the blood of all the impurities and poisons which cause the skin to break out in these eruptions.

Miss Sylvia Swanson, Theodore, Sask., writes: "I am letting you know what great value your B.B.B. has been to me. A year ago I started to grow pale and weak, the cause being bad blood. I got so many pimples and boils all over my face and body that I would not let strangers see me, and I used to avoid company. I tried many remedies, but all seemed a failure. I read about how good your B.B.B. had been to thousands of people, so I got a bottle and after I had finished the second one my pimples and boils had all disappeared. People thought it a miracle how well I looked."

Your grand old remedy sure has been as good as gold and better to me."

Burdock Blood Bitters has been manufactured for the past forty years by The F. Milbarn Company, Limited, Toronto, Ont. See that our name appears on the wrapper.

AMERICAN SITUATION WORRIES THE GERMANS

A despatch to the Exchange Telegraph from Amsterdam says:

"Political circles in Berlin are much upset by the reports of the indignation aroused in America by the announcement of Germany's submarine blockade, it having been believed that the United States' understanding of Germany's desperate position would start negotiations to bring about an early peace conference. There is still hope that President Wilson's answer will be conciliatory and afford a basis for negotiations."

Wonderful Bilious Remedy Actually Prevents Attack

There are two great causes of biliousness—they are constipation and defective liver action.

When Dr. Hamilton's Pills are taken they not only correct constipated bowels, but act upon the liver as well.

Quite unlike ordinary medicines, which purge and give temporary relief, Dr. Hamilton's Pills remove the conditions which cause biliousness, and thus permanent cures are effected. No person who occasionally uses Dr. Hamilton's Pills will ever suffer from the headache, bad stomach or bilious complaint. Get a 25c. box today.

Most men would rather borrow than be caught begging or stealing.

The jewelry that we care most for these days is a 14 carot Irish stew.

A courageous man will try anything once—but a fool wants to try everything once.

HUNS HAVE ABANDONED HOPE OF VICTORY IN THE FIELD

London, Feb. 2.—Twenty-four hours reflection over Germany's latest threat appears to have left the British public less worried than appears to be the state of public mind in most neutral countries.

Two points of the issue stand out strongly in all public criticism. First, that the German decision is the result of desperate and virtual confession that she has abandoned hope for military victory in the field, and second, that, having shown no restraint in recent months in her submarine warfare on shipping bound to opposing belligerent countries, it is needless to feel dismayed at what she is likely to do in the future, since probably all available submarines have been in full employment and it is unlikely that in the near future Germany can have as much greater a number of under water boats at her command.

It cannot be said that the British public is displaying any especial alarm. There are some who are even inclined to welcome the threats as providing a useful stimulus to the government and the nation. To the former as tending in the direction of inducing the Admiralty to take whatever steps are possible to counteract submarine activity, and to measures on the part of the government to speed up the construction of merchant ships in order to replace daily losses; to the nation in inducing a stronger recognition of urgent economy, especially in the consumption of food.

In this connection there has been considerable criticism of the government's action in taking skilled farm hands for the army when the impera-

tive need of the country was to increase the food production at home to the utmost.

This question of the conflicting interests of the army and agriculture may be brought to a head by the present situation.

The German press, on the other hand, appears less confident of the happy results of the latest stroke. The German papers are warning their readers not to expect too much immediately from the new submarine campaign. Disappointment seems to be reflected in the German press that the new move has failed to bring about further negotiations with the United States on the peace question.

CONSPIRACY TRIAL OPENS AT DERBY

The Attorney General Briefly Outlines
The Case for the Prosecution.

Derby, Eng., Feb. 3.—The Guildhall was crowded and many persons were unable to obtain admission when Attorney General Sir Frederick E. Smith today opened the case against the four persons accused of conspiracy to murder Premier David Lloyd George and Hon. Arthur Henderson, members of the war council.

The accused are Mrs. Alice Wheelodon, her two daughters, Miss Ann Wheelodon and Mrs. Alfred George Mason, and Mrs. Mason's husband.

The Attorney General, in his opening, referred to the prisoners as dangerous people, bitterly hostile to the country. They were, he declared, shelterers of fugitives from the army who were doing their best to injure Britain in her present crisis.

The prisoner Mason, he pointed out, was a chemist of very considerable skill, who had made a study of poison and might be considered an expert in such a matter.

A sensation was created when Attorney General Smith alleged it had been intended to murder the Premier by means of poisoned darts, to be shot at him while he was playing golf at Walton Heath.

Both the Premier and Mr. Henderson were to be killed by means of poison, the Attorney General announced, contained in tubes sent from Southampton to Derby and handed by Mrs. Wheelodon to an agent employed by the military authorities, and who had ingratiated himself into their good favors.

"CASCARETS" FOR A COLD, BAD BREATH OR SICK HEADACHE

Best for the Liver and Bowels, Bad Breath, Bad Colds, Sour Stomach.

Get a 10-cent box.

Sick headache, biliousness, coated tongue, head and nose clogged up with a cold—always trace this to torpid liver, clogged, fermenting food in the bowels, and sour, gassy stomach.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue, it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will surely straighten you out by morning. They work while you sleep—a ten cent box from your druggist means your head clear, stomach sweet and your liver and bowels regular for months.

OUR RELATIONS WITH U. S. NOT AFFECTED

Ottawa, Feb. 3.—That the relations between Canada and the United States will not be affected—at least not in any adverse sense—by the developments today at Washington, is the oft-happening impression in official circles. The severance of diplomatic relations between the United States and Germany is regarded here as a distinct indication of friendliness towards the Allies' cause and the expectation is that it will lead to the definite entry of the United States to the war.

The Republic thus will be ranging itself alongside Canada and fighting for the same object.

Even if open war should not be declared the fact that Bernstorff is given his passports and official relations terminated show that Germany and her campaign of frightfulness are to be combatted.

The novelist or movie writer who makes his lovers marry and live "happily ever afterwards," has improved on Providence.

A few men who imagine that they are in politics imagine also that the same means of fooling some of the people can be used twice.

Nothing preaches prohibition so eloquently as a pneumonia epidemic.

CANADIAN BIG GAME AT HOME

THE camera brings the features of big game and their haunts to our firesides. All along the Rocky Mountains strange wild beasts roam in abundance. Many of them are not familiar to the human eye at all, but there are others with which every sportsman is acquainted. Perhaps there is no place in the Dominion so interesting from the point of view of the hunter as the Canadian Pacific Rockies, with their majestic snow-capped peaks, 40 of which are over 11,000 feet high. At Banff there is a big National Park where nobody may intrude in pursuit of game, for a wise Government has decided that big game must not be hunted indiscriminately, and has instituted

laws for their protection. But outside the preserve the hunter is free to enjoy his sport, and there is plenty of it to be had: the grizzly bear, mountain goat, wild mountain sheep and lynx take up their abode in large numbers in these parts. In the open seasons many a party sets out with guides and ponies from Banff. The spring is the best time to hunt the grizzly bear when his fur is still thick after the winter's sleep. Often it is difficult to bag him, but his skin is a trophy of which any hunter may be proud. It is a pretty sight to watch a wild goat as he stands on some cliff seemingly admiring the picturesqueness of the landscape that lies beneath him. While in

pursuit of the Rocky Mountain goat the hunter has to take some serious risks; he has to ascend precipitous crags, hanging on almost by the skin of his teeth. The goat can dash along from rock to rock with the same graceful ease and velocity as that displayed by a bird travelling from twig to twig on some adjacent fir tree. But it is the danger and excitement of the chase that gives the hunter the greatest delight. It is as difficult to shoot the bighorn or wild mountain sheep. After feasting himself on the lowlands in the grey early morning the bighorn ascends to the fastnesses of the mountains. It is almost an impossible task

for the hunter to get within range, and if ever he does get there he must not make the least noise or show himself, for the bighorn is both timid and observant, and when he is startled once there is little chance of again coming into close quarters with him. The bighorn's flesh is pronounced by epicures to be most delicious and his horns make very beautiful ornaments. In its cosy coat of soft ashy grey fur the lynx seems to be like a cat, and he certainly is of the cat family. He is rather pretty, and though not such a prize trophy for the sportsman as some of the bigger forest neighbours, he is always welcome to a rifle bullet.
