DIAMONDS are not solely vanity. They are regarded by banks as collateral. A diamond is money invested in a rising market, for prices of fine diamonds are increasing yearly. Imperfect and flawed diamonds have little intrinsic value. We import only the highest grade fine white perfect stones. Many new and beautiful ring mountings are displayed in our new stock.

BETHLEHEM CO. LIKELY TO BUY BURNT HILL MINE

Timmins Interests Desirous of Withdrawing—Report of W. L. Cummings to Settle Matter.

The recent visit of Mr. W. L. Cummings, one of the expert mining engineers of the Bethlehem Steel Company to the tungsten mine at Burnt Hill, York county, is understood to be the forerunner of the purchase of the mining property by that company. At present Mr. N. A. Timmins of Hollinger mine fame and the interests which he represents hold ninety per cent. of the stock of the company operating at Burnt Hill. He is desirous of devoting his energies to other branches of mining industry and on that account would like to see the American company take over the mine.

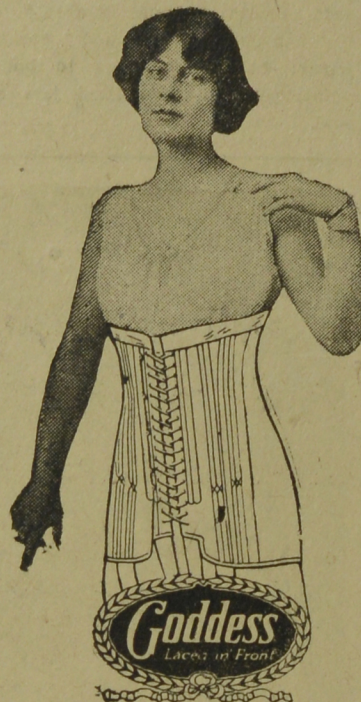

Aided Munition Work.
The Timmins people took up the Burnt Hill proposition largely at the request of the Imperial Munitions Board as the tungsten was wanted for the manufacture of big guns for the British navy, it being an important constituent of the inner tubes of the guns on account of its hardening qualities. It is said that some \$75,000 has been spent by the owners on the Burnt Hill mine.

Purchase Probable.
Mr. Cummings was very favorably impressed with the mine and it believed that his report will result in the Bethlehem Steel Co. taking over the property and using the output in connection with their steel making business in the United States.
