

# HANDBOOK OF GERMAN ESPIONAGE WAS PRODUCED

Remarkable Exhibit Put in Evidence in the Great Bergen Spy Case in Norway--- Was Found in the Pocket of an Employee of a German Information Agency--- Some Extracts Gleaned From It.

(Corres. Associated Press.)  
Christiania, Norway, Jan. 30. — An official handbook of German espionage, one of the most remarkable documents of the war, was produced as evidence in the course of the great Bergen spy case, which has just been ended in the courts with the conviction of six of the defendants.

## YOU'RE BILIOUS, LET CASCARETS LIVE LIVER AND BOWELS

Don't stay headachy, constipated, sick with breath bad and stomach sour.

Get a 10-cent box now.

You men and women who can't get feeling right—who have headache, coated tongue, bad taste and foul breath, dizziness, can't sleep, are bilious, nervous and upset, bothered with a sick, gassy, disordered stomach, or have a bad cold.

Are you keeping your bowels clean with Cascarets, or merely forcing a passageway every few days with salts, cathartic pills or castor oil?

Cascaret swork while you sleep; cleanse the stomach, remove the sour, undigested, fermenting food and foul gases; take the excess bile from the liver and carry out of the system all the constipated waste matter and poison in the bowels.

A Cascaret tonight will straighten you out by morning — a 10-cent box from any drug store will keep your stomach sweet, liver and bowels regular, and head clear for months. Don't forget the children. They love Cascarets because they taste good—never gripe or sicken.

The handbook was found in the safe of Herr Paasche, one of the employees of the so-called German Information Agency. Its title page bears the inscription "Duties of the Espionage Service," and it contains, in the words of the court, "the objects and methods of the German information agency in Scandinavia."

The introduction says that important information can be obtained through the neutral or enemy ships which come to Scandinavian ports, regarding such points as minefields, minebelts, changes in lightships, etc. "By such information," it explains, "our U-boats can be shown not only safe routes but also objects of attack." The following is a summary of one chapter:

"Through shipping only can we get to know the enemy's guardships, where his ships are stationed, knowledge of his cruisers and other information. The best source is a ship captain, but they are difficult to obtain. The younger mates are easier to get as their wages are not high. But if neither of these is available, the most likely person on a ship should be approached. Monthly payment of 50 to 500 kroner is available. Captains on English passenger routes are usually paid 300 kroner. Mates

on neutral tramp steamers between England and France, 100 to 125 kroner.

"Much information can be gained from passengers, also," says the handbook. The importance is shown of maintaining a good connection with representatives of the neutral press.

The hiring of commercial or other persons who travel in the enemy's country is suggested. "The best persons," says the handbook, "are commercial travellers who have been accustomed to travel for some firm, and who carry on an actual and continuous business. Just now also waiters, barbers, metal workers, for shipyards and ammunition factories, and nurses are much sought after in England. Women are especially recommended as good agents for obvious reasons."

The greatest danger is said to be in the sending of information. "But this," says the writer of the handbook, "is reduced to a minimum by our chemical agents in Germany who have taken special interest in this, and have prepared means which, owing to the inferiority of the enemy's chemical knowledge he is unable to detect. The materials are given to

The old reliable remedy for rheumatism, neuralgia, sore throat and sprains.

Best Liniment Made  
Mr. A. E. LAUNDY, EDMONTON, writes: "I fell from a building and received what the doctor called a very bad sprained ankle, and told me I must not walk on it for three weeks. I got MINARD'S LINIMENT and in six days I was out to work again. I think it the best Liniment made."

## We Can't Do Without

Zam-Buk in our home. It is so very good for the many little accidents which are of almost daily occurrence," writes Mrs. A. B. Lloyd, of Ruby Creek, B.C.

"I have also used Zam-Buk for a very bad scald, which pained me intensely at first. Applications of Zam-Buk, however, soon brought relief and before long the scald was quite healed."

Zam-Buk is equally good for eczema, chronic sores, blood-poisoning and piles. All dealers, 50c. box.

agents in a form which attracts no attention."

One of these methods illustrated in the course of the trial was by means of handkerchiefs, on which information was conveyed by means of invisible ink.

## NEW FOOD REGULATIONS FOR CANADA

(Canadian Press direct wire.)  
London, Ont. Feb. 7. — Information from Ottawa with respect to the drastic regulations which, it is expected, will be announced by the food controller in the course of a few days has reached this city. P. Tustin of Winnipeg, formerly chief of the sanitary commission of that city will, it is understood, be appointed to administer the new regulations.

Every branch of trade will be licensed to do certain trades. For instance the manufacturers can deal with the wholesaler or the retailer, but he shall give no preference to buyers. If a price is made for bulk sales that price must be available for all buyers of that quality of goods. Any attempt to rebate on the price will come under the terms of the secret commissions act. Wholesalers must deal only with the retailers unless as well as taking out a wholesale license they take out a retailer's license and all license numbers must appear on all stationery, etc. The license fee of retailers will be \$1. The minimum fee charged to wholesalers will be \$50 and will increase according to the bulk of business done. Licensed stores must be able to show that the goods packed, sold and displayed are handled under sanitary conditions. Regulations affecting the delivery problem will also be made, it is understood. The motive will be to curtail the number of deliveries that a store might make.

## PRICE OF BEER TO BE BOOSTED

Montreal, Feb. 6.—Local brewers have decided to increase the price of beer one dollar a barrel, beginning tomorrow morning. The beer that has been selling at \$7 a barrel will be \$8 after this and the finer grade will be \$8.50 a barrel. The increase is due to the anticipated prohibitory legislation at Quebec.

## The present grade of Mother's Favorite Flour

will soon be off the market until after the war is over. If you want any of this superior Bread Flour you should place your order at once.

## No Dipping, No Scrubbing

WHEN YOU USE SANI-FLUSH REGULARLY.

Just sprinkle a little in the bowl each morning and a further-to odious task is made easy. The result is a clean, white, sanitary closet. SANI-FLUSH is patented, nothing else like it. It's meant to clean toilet bowls and it does it thoroughly. Should be used in residences, stores, business offices, hotels, factories and wherever closets are installed.

It does not injure the plumbing.

## Horse Breeding and Environment

At the present time there is an enormous demand for heavy work horses which cannot be adequately met with, and as a consequence, prices are higher than they have ever been before. This condition though chiefly caused by the use of a large number of horses for war purposes, is likely to continue for many years after the termination of the war. Nowhere is the demand keener than in Western Canada where considerable areas of arable land are available for putting into crop. The market there is an immense one. Farmers are breeding more land every year, and although large numbers of tractors are being used, many farmers prefer to use horses. New settlers continue to arrive in increasing numbers. It has always been possible to sell locally bred horses at prices altogether out of proportion to the cost of production. The country is particularly adapted to the industry, and large as are the returns from other branches of farming in Western Canada, in none are they larger than those which the farmer who engages in the raising of horses may expect.

In an article written by Mr. E. A. Davenport, of Acme, Alberta, which appeared in a recent issue of the "Farmer's Advocate" (Winnipeg) some of the advantages possessed by Western Canada as a horse raising country are pointed out. Mr. Davenport has been a successful breeder of Percheron horses in Alberta for a number of years, and writes from experience.

"We are fortunate in Western Canada that our climatic conditions are favorable for the production of healthy horses, that our soil conditions are such that the feed grown is wholesome and nourishing for the construction of a strong, perfect and enduring frame. The atmosphere is bright, bracing and pure, with the oxygen required for lung development and blood building, while abundant sunshine benefits animals and plants alike. For the development of dense, flinty bone of sufficient calibre mineral matters must abound in the food and drink of horses. Without these requisites of nourishment imperfect animals will be produced. Western Canada in regard to these requirements is eminently adapted for the breeding and rearing of horses of the highest type and quality. Her soils are rich in mineral matters; her drinking waters are strongly impregnated with minerals; her feeds are both rich in proteins and earthy materials, and especially fitted for perfect frame building. We can at all times supply our horses with nutritious feed from never-failing sources.

"Of the commercial foods bran is proving to be of particular value in the feeding of horses as it furnishes materials for the development of

strong bone, dense tendons, tough hoofs and powerful muscle the essentials for which the Western horses are already famed.

"It may, therefore, be stated with confidence that Western Canada favors these desirable qualities which are less perfectly developed where the climate is hotter and consequently less bracing, and where the character of the soil is better adapted for the production of corn and other food materials more or less deficient in frame building ingredients. We can almost better than any other section of the country produce draft horses of ideal quality and development as regards frame vigor, stamina, constitution, action docility and durability. There are no more important or necessary requirements than these in a horse that works hard in the city or upon the farm."

## New Silks

In Paillette, Poplin, Messaline, Taffetta, Peau-de-soie, habutae and Fancy Plaids

PAILLETTE SILKS in shades of Black, Light and Dark Grey, Pale Blue, Copen Blue, Pink, Light and Dark Rose, Bisque, Brown, Burgundy, Resda, Green, Prunell, Mulberry, Russian Green, Paddy Green, Mauve, Bottle Green, Maize, Ivory, Bright Red and Cerise.
