The Flavour Lasts!

THE MACHINE GUN IS THE MOST EFFICIENT WEAPON

Has the Same Effect on Men in Massed Formation as a Scythe Has on Ripened Wheat---Cuts Broad Swath and Nothing Can Stand up Against It---Good for Six Hundred Shots a Minute.

London, April 9. (Correspondence of the Associated Press.)—"Of all the weapons used in the present war, the machine gun has unquestionably proved itself the most efficient," says a British expert in the Daily Mail. "Probably a majority of the casualties in the war have been caused by this weapon; certainly the greater proportion of the enormous losses during the fighting of the last few weeks have been so inflicted."

"Any type of machine gun in the hands of a skillful operator has the same destructive effect upon men moving in mass formation that a keen edged scythe has in a field of ripened wheat. It cuts broad swathes; nothing can stand against it."

"A well served machine gun is the most formidable thing that attacking battalions have to face. It is not merely the front ranks that suffer. At anything approaching close range, the bullets will go through the front-rank men, often through the second rank as well, and kill or wound those immediately behind them."

There are several types of machine guns now in use in the British army, such as the Lewis, the Maxim, the Vickers and the Hotchkiss. All

are very mobile. They can be moved quickly from one place to another, advantage being taken of any cover that offers. Each class of machine gun has with it a squad of about ten men. Should they find themselves pressed too closely, they pick up their weapon and fall back with it, re-opening fire upon the enemy from the next favorable position.

One authority has declared that in the field one machine gun is worth almost a whole battalion of men armed with rifles. Few soldiers can keep up 15 rounds per minute rapid-fire with a rifle, but a machine gun can discharge 600 rounds in a minute, and the Vickers can discharge 1,600 rounds

Slants of Humor

THE KIND MEN LIKE.

I know a stunning little blonde,
She's always smartly gowned.
Her nose turns up, her toes turn out,
Her brain turns 'round and 'round.
Her brain turns 'round and 'round!
Alas,
It has no inner tube!
But she's the kind of girl men love—
A fascinating boob!

REPRISALS OFF.

"Did nurse tell you I'd been naughty, mamma?"
"No, darling."
"Well, then, I won't tell you that nurse dropped the toast in the fire."

COUNTER BARRAGE.

First Munitioneer—My old man's won this medal. Don't it make yer jealous?
Second Munitioneer (with great hauteur)—Not me! My Bill went out to kill Germans -- not collecting souvenirs.

A SENSE OF FITNESS.

Having just learned over the phone that he could not get an ounce of coal, Bangs, the terrible tempered, went into the parlor uttering the most awful imprecations.

"William," exclaimed his wife, "if you must swear, for mercy's sake don't do it standing on the prayer rug."

Wood's Phosphorine.
The Great English Remedy.
Tones and invigorates the whole nervous system, makes new blood in old veins, cures Nervous Debility, Mental and Brain Worry, Lascivency, Loss of Energy, Partiality of the Heart, Failing Memory. Price 21 per box, six for \$5. One will please, six will cure. Sold by all druggists or mail it, plain pkg. on receipt of price. **THE WOOD MEDICINE CO., TORONTO, ONT. (Formerly Widdowson)**

without stopping. Bullets pour from the muzzle in a rapid devastating stream and, as these guns use the same kind of ammunition as a rifle, there is little difficulty in keeping them fed.

The Lewis gun is described as the most mobile. One man fires it, using 47 rounds in succession. Beside him is another man who puts on fresh trays of ammunition as required, the change being made in two seconds. Meanwhile other men are hard at work filling trays and passing them on for use. The gun has an effective range of about 1,200 yards and can be fired either from a stand or a parapet the gunner placing the piece to his shoulder as he pulls the trigger.

The Maxim and Vickers are fired from a tripod, the gunner squatting with legs a-straddle and pressing a eyk. As long as he keeps his finger on the key the gun continues streaming out bullets as the belts, each holding 250 cartridges, fly through it. Gripping the handles with both hands the gunner moves his weapon back and forth, playing on the advancing troops much as a fireman plays a hose on a burning building. Guns of this kind can also be used for putting by barrages, and it is possible to attack with them targets one cannot see.

At the beginning of the war, the British army had two machine guns to each infantry battalion. The number is now much larger. In addition, a special machine gun corps has been formed.

HAVE WON THE WAR.

Well, we see the Germans
Have won the well-known war again.
This is the fifth time they
Have won this war. The trouble
Seems to be that the war positively
Refuses to stay won. It's a most
Cantankerous war that way.
Wars are always fickle. Recently
The Germans have won the war
Only about once a year.
With a little more efficiency
The Germans ought to be able
To win the war about twice a year,
And keep the home folks kidded.

AMENDED REGULATIONS AS TO FLOUR

The Canada Food Board has amended its recent regulation dealing with the amount of flour that a consumer may hold in order to allow a farmer to maintain the flour manufactured from wheat in his own possession, on condition that he reports to the Canada Food Board the amount of flour thus held. Evidently the Board desires full knowledge of the amount of flour in Canada, and means to exercise such control as may be found necessary for the public welfare. At the same time it is anxious to avoid all unnecessary inconvenience or hardship.

Another amendment allows an individual to hold at least twenty-five pounds without regard to his rate of consumption, and to retain in his possession even more than this amount, when it is contained in a broken package purchased prior to the issuing of the order.

The amendment reads as follows:
"Section one of Order No. 31 of the Canada Food Board, dated the 25th day of April, 1918, as amended by adding the following sub-sections:

(c) A bona fide farmer shall be permitted to hold, subject to the order of the Canada Food Board, the amount of flour made wholly or in part from wheat he may have in his possession in excess of the amount prescribed by the above order, if on or before the 5th day of June, 1918, he reports to the miller or dealer from whom it was purchased or by whom it was manufactured, the excess amount held by him. It shall then be the duty of such miller or dealer to report all such holdings to the Canada Food Board on forms to be supplied and at such times as he is directed.

(d) Any person holding or having in his possession not more than 25 pounds of flour made wholly or in part from wheat, or who holds or has in his possession at the date hereof part only of one original package in which such flour is purchased, though the amount exceed 25 pounds, shall be permitted to hold same."
